CDE L.D., EXTEMP, TEAM DEBATE, CONGRESS AND LINCOLN DOUGLAS DEBATE CAMPS

The Best in the Nation

More rounds, More classes, More success, Guaranteed.

* In 1990 became the first U.S. debaters to win the World College Debate Championship.
* In 1991 CDE graduates won two events at Nationals plus second and fourth place trophies.
* In 1993 CDE graduates won three events at Nationals plus two second places and two third place trophies.
* In 1994 CDE graduates were the first U.S. team to ever win the World High School Debate Championships.
* And at NFL Nationals 5 of the 12 Lincoln Douglas finalists were CDE graduates.
* In 1995 CDE graduates won three National Championships.
* In 1996 CDE graduates took second in L.D. Nationals, won three National Extemp Championships, and second in debate nationals.
* In 1997 CDE alumni won two National Championships.
* In 1999 CDE alumni won the National Debate Championship and another National Extemp Championship.
* In 2000 won our 12th National Extemp Championship

This year YOU are invited to join us.

$1325, Alumni $1125, Commuters $540, Teachers and Coaches $540
(Held at Northern Arizona University in Flagstaff).
Costs include tuition, room, meals, free tourist day, 1,500 debate blocks or 400 articles, 15-24 critiqued practice rounds. Acceptance guaranteed or money refunded.

Both camps will be headed by WILLIAM H. BENNETT, the former national debate champion, author of over 50 texts and books, and coach of 9 national champions and championship debate teams.

Teacher-student ratio is guaranteed to be 8-1 or lower. Class actions are monitored.

Each camp is limited to the first 70 applicants. A $95 application fee must accompany your entry. Check or credit card accepted.

- Internet Research Book $47
- Team Debate Package $215
- Topic Debate Video $49
The Liberty Debate Institute is a summer workshop open to high school students of all experience levels in both policy and Lincoln-Douglas Debate. It is sponsored by Liberty University and the Liberty University Debate Team. It is designed for beginning students who want to learn how to debate in the classroom or in competition, as well as for intermediate and advanced (junior varsity and varsity) debaters who want to sharpen their debating skills and knowledge while getting a head start on preparing for the competitive debate season.

If you are looking for a place to dramatically improve your argumentation and speaking skills, your knowledge of this year's national topic, and your understanding of debate theory, then the Liberty Debate Institute should be your choice for a summer debate workshop.

**Workshop Features**

- Affirmative case and topic-specific negative research and strategy
- Instruction on effective and persuasive speaking skills
- Debate theory instruction, discussion and analysis
- Professional administration and dorm supervision
- Extremely low faculty/student ratio

★ Elite Performance Lab ★

A selective three week, limited enrollment policy lab tailored exclusively for the championship debater and headed by accomplished debater and coach, Kamal Ghali.

RULES FOR TED TURNER DEBATE AND A CHANGE IN EXTEMP RULES

Ted Turner

The new Ted Turner debate has been enthusiastically received around the country and many schools and students are anxious to enter this new trial event at their NFL district tournament.

With the widespread publication of rules and procedures in the Rostrum, at www.nfl frontline.org and in the district chair newsletters, all coaches and participants should be fully aware of these new rules and procedures. Excuses of "we didn't know" will not be accepted in case of rule violations.

To review:

1. Each school may enter one (1) Ted Turner Team of two (2) debaters which does not count against the school entry formula based on chapter strength (see page TD-2 of the District Manual.)

2. Schools may enter additional Ted Turner teams which do count against the entry formula - but a school may not enter more than a total of four TT teams at the district tournament.

3. A student who enters Ted Turner debate may not enter any other district tournament event. Double entry by a Ted Turner debater is prohibited and grounds for disqualification in every event entered by that student.

4. Ted Turner participants may enter the district Congress. If a TT debater qualifies for Nationals in both TT and Congress that debater may only enter Nationals in TT (to protect the partner).

5. The Ted Turner contest shall be conducted according to NFL debate pairing rules (pages TD 10-11) except all references in these rules to side assignments are void. All TT debates begin with a flip - even if the same teams are meeting again. Also, when pulling up a team to meet an undefeated, sides are irrelevant.

6. Every district may send one and only one TT team to nationals, regardless of the number of district entries.

Extemp

At the Fall meeting the Council removed the Question and Answer from the final round of Extemp at the District Tournament.

Also note that at Nationals only there will be a 3-minute CX period in each extemp final round.

International Debate Opportunities from IDEA

See pages 107-109

MARCH Ted Turner Debate Topic

R: Affirmative action should not be practiced in college and university admissions.

Lincoln Financial Group/NFL MARCH/APRIL L/D Topic

R: When in conflict, the letter of the law ought to take priority over the spirit of the law.

NEW 2004 Policy Debate Topic

R: That the United States federal government should establish an ocean policy substantially increasing protection of marine natural resources.

The Rostrum provides a forum for the forensic community. The opinions expressed by contributors are their own and not necessarily the opinions of the National Forensic League, its officers or members. The NFL does not guarantee advertised products and services unless sold directly by the NFL.
Add your voice to history:

Lincoln Financial Group is the proud corporate sponsor of the NFL

November 19, 1863 was a gray and somber day in Gettysburg, Pennsylvania.

President Abraham Lincoln, his re-election prospects dimming as the Civil War dragged on, was on hand to dedicate a battlefield cemetery. The toll of dead and wounded in that valley was staggering: 23,000 for the Union Army, 28,000 for the Confederates.

Moreover, Lincoln’s son Tad was gravely ill and this weighed on his mind: His 11-year-old son Willie died of fever the year before.

There was an audience of 15,000. Souvenir hunters scoured the battlefield for bullets, buttons and shell fragments. An acclaimed orator, as was the custom, delivered a two-hour address. His performance moved the crowd, but his words are long forgotten.

Then Lincoln rose to speak, donning spectacles and unfolding a single sheet of paper. The next few minutes changed the world.

Lincoln’s Gettysburg Address stands as the single greatest American speech, rededicating the nation to its founding principals. We return again and again to the 10 sentences — 268 well-chosen words — that have served ever since as a moral compass for democracy.

His brief remarks proved the poet’s adage, “Houses of history are made of words.”

National Forensic League speech and debate activities provide a workshop for coming generations to find their voices and build new houses of history. And Lincoln Financial Group – founded nearly a century ago with Robert Lincoln’s approval to use his famous father’s name and likeness – is proud to be the corporate sponsor of the NFL.

Each year, Lincoln Financial Group:

- Underwrites the NFL’s national high school speech and debate tournament
- Awards college scholarships to first-place winners in each of the 10 tournament events
- Provides prizes for every student who qualifies to compete nationally
- Awards scholarships to the first- through fourth-place winners in the Lincoln-Douglas Debate program

Also, we’re sponsoring our third annual video speech contest for NFL members:

- The top two winning students will receive college scholarships
The coaches of the two students will receive honoraria.

The contest deadline is March 24. See the details in this issue of *Rasstrum*.

Before the national competition, we'll also sponsor *Lincoln Financial Group Refreshers* at over 20 NFL District Tournaments:

- Refreshers are hospitality tables where students and coaches can grab a snack and beverage between rounds.
- Each participating NFL member and coach who visits the table receives a gift (*pictured at right*).
- A Lincoln Financial Group representative will be at the table to wish the students good luck and to show our support of their hard work.

Our support for the NFL and other educational efforts extends a tradition that began with the establishment of a museum and library dedicated to Abraham Lincoln in 1928. This world-class facility in Fort Wayne, Ind., the home of our flagship affiliate, Lincoln Retirement, draws visitors from around the U.S.

A Fortune 500 financial services company, the business of Lincoln Financial Group is providing clear solutions to help meet the financial goals of our clients, many of them teachers and administrators at some 3,000 schools and universities across the country.

Our association with the NFL began in 1995 with the sponsorship of the Lincoln-Douglas Debate program. We expanded the partnership in 1998, becoming the national corporate sponsor of the NFL. We believe this is a sound investment in the lives of America's young people, and consistent with our company's strong commitment to education.

These relationships — and our long-standing commitment to education — underscore our sponsorship of the NFL. If you're not already active in your local NFL chapter, find out how you can become involved. If you currently participate in the NFL, you've joined in the opportunity to add your voice to history.
Contest
Your speech could win $2,000 and qualify you for Nationals.

In turbulent times, it is easy to be stampeded into making unwise financial decisions...and follow the crowd in a panic. That's why it's important to have a sound financial strategy now more than ever.

The Lincoln Financial Group Video Speech Contest gives you an opportunity to learn about the advantage of retirement planning and compete for a scholarship for your future education at the same time.

What are the prizes?
- The first-place winner will receive a $2,000 scholarship
- The second-place winner will receive a $1,000 scholarship
- Both winners will qualify for expository speaking at the 2003 NFL National Tournament in Atlanta, GA.
- Video excerpts from the winning speeches will be online at LFG.com and at the 2003 NFL National Tournament in Atlanta.
- Coaches of each winner will be awarded a $500 honorarium.

What's the topic?
Taming the Bull and the Bear...the importance of a sound financial strategy

Who's eligible?
You are - if you are a high school speech student and a member of the National Forensic League.

How does the contest work?
- You must prepare an original expository speech no more than five minutes in length.
- The speech must be videotaped - production quality will not be part of the judging. Lincoln will retape the winning speeches, if necessary, for the excerpts on LFG.com and at the 2003 NFL National tournament.
- Only one videotaped speech per school may be submitted. If several students in your school wish to participate, a local school elimination should be held.

What's the deadline?
All entries are due to Lincoln Financial Group on or before March 24, 2003.

Entries should be mailed to:
Lincoln Financial Group
NFL Video Speech Contest
1300 S. Clinton St. – 7H00
Fort Wayne, IN 46802

Include with the videotape a typed transcript of your speech and include the name, address and phone number of the student, coach and school.

Who's judging?
A panel of judges from Lincoln Financial Group will select the winners. Judges' decisions are final. Winners will be contacted by April 30, 2003 and will receive their awards at the 2003 NFL National Tournament.

Who is Lincoln Financial Group?
Lincoln Financial Group is a diverse group of financial services companies, all dedicated to helping make the financial world clear and understandable so you can make informed decisions to help meet your financial objectives. As the NFL's overall corporate sponsor, Lincoln funds the national tournament and provides $78,000 in college scholarships and awards.
Imagine a hospital where patients are used to regular beatings by the hospital attendants. Imagine a facility with untrained nurses and attendants regularly giving medications to patients based on their own unqualified decisions. Imagine watching this institution for the mentally ill "degenerate into little more than concentration camps on the Belsen pattern."

Now, imagine mentally ill patients wandering the streets aimlessly, being readmitted to hospitals as much as 30 times in some cases, and living in rat-infested attics at halfway houses.

This imagery is drawn up by two articles that appeared 35 years apart in Life Magazine, reflecting what society has created for the mentally ill. The first article, published in 1946, shocked America with an indictment of the nation's mental hospitals more graphic and damning than anything previously published. The second article, which appeared in 1981, described in words and pictures the fate of patients who had been deinstitutionalized from state mental hospitals (1). The fate of such individuals was summarized by a psychiatrist who observed, "the majority get dumped amid the broken promises."

"Broken promises" is the motto used by policymakers when it comes to improving the lives of seriously mentally ill who were abused and neglected in the nation's mental hospitals and then were dumped out of these hospitals into communities with few facilities, and inadequate housing and aftercare (2). It is clear that these broken promises have led to a situation that must be rectified, if we are to call ourselves a civilized society. Policy makers have perpetuated the situation with their substan-

tial inattention to the problem, and unwillingness to implement a new system that will give adequate care for those unfortunately inflicted with severe mental illness.

This report chronicles the past 40 years of America's war on the chronically mentally ill amid the broken promises. It is a story that bears constant repeating. In order to start making progress in this battle, it is critical that we understand where our nation has been in its approach in helping the chronically mentally ill.

A Ray of Sunshine in the Fog
Over five million people in the U.S. suffer from chronic or serious mental illness. These conditions include schizophrenia, bipolar disorder (manic depression), major depression and panic disorders, among many others.

The modern era in public services for people with chronic mental illnesses began immediately following World War II with the recognition that such conditions were common and that state mental institutions were, on their best days, remarkably untherapeutic, and, on the worst days, snake pits. The initial response of the federal government was to create a National Institute of Mental Health (NIMH), to which it gave responsibility for research on chronic mental illnesses, and for the training of increased numbers of mental health professionals, including psychiatrists, psychologists, psychiatric social workers, and psychiatric nurses (3).

But, servicing the chronically mentally ill remained the exclusive responsibility of state government until 1963, when Congress passed John F. Kennedy's Community Mental Health Centers (CMHC) Act. In describing what the legislation would accomplish, President Kennedy said "reliance on the cold mercy of custodial isolation will be supplanted by the open warmth of community concern and capability (4)." No longer would it be necessary for the mentally ill to undergo "a prolonged or permanent confinement in huge, unhappy mental hospitals ... If we launch a broad new mental health program now, it will be possible within a decade or two to reduce the number of patients now under custodial care by 50 percent or more (5)."

As the centerpiece of Kennedy's mental health new
policy, CMHCs would integrate “diagnostic and evaluative services, emergency psychiatric units, outpatient services, inpatient services, day and night care, foster home care, rehabilitation, consultative services to other community agencies, and mental health information and education.” The role of the federal government was to stimulate “state, local and private action.” The President urged Congress to authorize construction grants and short-term subsidies for staffing as well as $4 million for state planning. The President’s message received national publicity and aroused relatively little overt opposition from Congress (6). The legislation, proclaimed Robert Felix, “reflects the concept that many forms and degrees of mental illness can be prevented or ameliorated more effectively through community oriented preventive, diagnostic, treatment, and rehabilitation services than through care in the traditional—and traditionally isolated—state mental hospital (7).”

The CMHC Act and subsequent efforts of federal and state governments to improve services seemed reasonable during this period and clearly motivated by the best of public policy intentions. These efforts coincided with the introduction of antipsychotic medications, which became widely available by the late 1950s, making deinstitutionalization of people with mental illnesses possible. Deinstitutionalization is the name given to the social public policy of moving chronically mentally ill people out of large state hospitals and then closing part or all of these hospitals (8). Deinstitutionalization, defined by the Director of the NIMH would entail three major goals:

- The prevention of inappropriate mental hospital admissions through the provision of community alternatives for treatment;
- The release to the community of all institutionalized patients who have been given adequate preparation for such a change; and
- The establishment and maintenance of community support systems for non-institutionalized people receiving mental health services in the community (9).

In the 30-year period from 1955 to 1984, the number of patients in public state mental hospitals dropped from 552,000 to 199,000, a reduction of just under 60 percent. Hundreds of thousands of chronically mentally ill individuals who previously had been held in custodial state mental hospitals were discharged to what was supposed to be adequate, seamless community care. The federally funded CMHC’s income assistance programs such as Supplemental Security Income (SSI) and Social Security Disability Income (SSDI), and increased numbers of mental health providers were supposedly all going to work with state governments to provide care and services for these individuals in this transition of deinstitutionalization (10).

Like Ships Without Rudders

Although deinstitutionalization sounded promising in theory, it has actually been a major contributing factor to the mental illness crisis in the U.S. When one surveys the horizon of mental health policy, it is clear that whatever was intended to happen did not occur, and that deinstitutionalization for the most part was a disaster—a psychiatric Titanic. The lack of housing for released chronically mentally ill patients, the failure of community mental health centers to provide aftercare and necessary services, increasingly rigid commitment laws, and the mental health professionals’ abdication of responsibility for the chronically mentally ill all were becoming apparent.

A community policy was based on the perception that chronically mentally ill patients could be treated outside of institutions. Underlying this belief were four basic assumptions:

- That patients had a home;
- That the organization of the household would not impede rehabilitation;
- That they had a sympathetic family or other person willing and able to assume responsibility for their care; and
- That the patient’s presence would not cause undue hardships for other family members.

In 1960, however, the assumption that patients could reside in the community with their families while undergoing rehabilitation was not supported by statistics. This was barely considered during the policy and legislative deliberations between 1961 and 1963; even though it was crucial to the implementation of the new policy because in addition, the act did not define the essential services that community mental health centers were required to provide to people with chronically ill mental conditions (11).

In the late 1960s, the number of halfway houses available for discharged patients was minimal. A 1971 NIMH survey identified only 196 such houses in the entire United States, with a total capacity of 6,170 persons. Therefore, some of the chronically ill patients were placed in nursing homes and others went to boarding houses, single-room-occupancy hotels (SROs), and similar low-income housing. Such housing was often clustered in towns near the state hospital or in poorer areas of cities, and by the mid-1970s many of these communities were expressing heightened concern about the increasing ghettoization of the mentally ill. Some of the lower-income housing for the chronically mentally ill was adequate and well maintained, but most of it was not (12).

In addition to the adequate and decent housing, most individuals released from state mental institutions need continuing psychiatric follow-up care. This includes such activities as assuring that the person receives proper medications, encouraging participation in social activities, providing vocational counseling, identifying community resources, and generally assisting individuals to live as normally as possible despite their mental illnesses.

The Sea is so Rough, and My Boat is So Small—Children in the Mental Illness Delivery System

In addition to the plight of adults with severe mental illness, the neglect of children is particularly evident in the mental health care system as well. Although reform efforts have improved children’s services over the past 25 years—from a time when large numbers of children were institutionalized without any effective treatment—they remain woefully inadequate. An attempt to develop services was made in the 1970s, but by the early 1980s it was clear that children with emotional disorders were often not able to get access to these services. The disturbing findings of a 1982 Children’s Defense Fund (CDF) report found that only a minority of the more than two million children with severe emotional disturbances received adequate mental health services. The report com-
cluded that children’s services were not coordinated and were not provided to children within their homes and communities (13).

In 1986, the federal government established the Child and Adolescent Service System Program (CASSP), to assist states reorganize their agencies responsible for providing mental health services to children and their families. A goal was to ensure collaboration among agencies serving children. Typically, although children with serious emotional disorders were served by education and child welfare agencies as well as traditional mental health providers, the collaboration among these agencies was very limited. The CASSP philosophy envisioned the child as the focus of mental health care services and the professional caregivers as partners with the families serving these children. It promoted individualized care provided in the least restrictive setting and in the community. Ideally, the services available in the community would make it unnecessary to place children in institutional settings. And, in theory, limited reliance on psychiatric institutions or residential treatment centers could reduce the cost of care.

But like deinstitutionalization for adults, CASSP looked good on paper but in actual practice it suffered a similar fate. CASSP did have a significant effect on how states organized mental health care services. Unfortunately, it was a small program constrained in scope and power. Its funds were both limited and restricted, and could not be used to support services directly or to fill gaps in existing mental health services.

The Old Man and the (Undiscovered) Sea – Recognizing Mental Illness in Older Adults

Recent history surrounding treatment for older adults with mental illness parallels the history of gaps and fragmentation in treating adults and children. According to the Surgeon General’s report, almost 20 percent of adults above 55 years of age experience specific mental disorders that are not part of the “normal” aging process (14).

The President’s New Freedom Commission said that nearly 35 percent of older adults have major depression, however, most are not properly recognized and treated. Untreated depression causes significant disability, and most tragically suicide. The Institute of Medicine reports that the older men have the highest rates of suicide in the U.S. What is of most concern is that the growing number of older adults will dramatically increase and magnify existing problems (15).

Fragmentation of services and insufficient availability of services and support networks undermine treatment for older adults in community-based settings for both consumers and families. Under-funding for older adults with mental illnesses remains a chronic problem and the Federal Block Mental Health Grant (PL 99-999) has not directed states to dedicate a specific percentage of these block grants to older adults.

Rearranging the Deck Chairs on the Titanic

While policymakers were touting the legislation of 1963 and adding it to having revolutionized treatment and care for the mentally ill, there was little or no actual evidence to prove such optimistic assertions. The federal government was in no position to provide regulatory oversight of the large numbers of CMHCs. More importantly, the focus of federal policy shifted significantly because of a growing perception that substance abuse represented major threats to the public at large. Beginning in 1968 Congress enacted legislation that sharply altered the role of CMHCs by adding new services and programs for substance abusers, children and elderly persons. Congress believed that the act of 1963 had resolved most of the major problems of the chronically mentally ill and that greater attention should be paid to other patient groups in need of mental health services (16).

As the services provided by the CMHCs grew, the interests of the chronically mentally ill — clearly the group with the most significant treatment problems — slowly receded below the surface.

Changes in the presidency in 1968 added another contentious element. Between 1970 and 1972 the Nixon administration persistently cut NIMH programs, many of which survived only because of a sympathetic Congress. Differences came to a head in 1973 when the administration recommended that the CMHC program be terminated altogether. Moreover, funds already appropriated under the CMHC legislation were impounded. They were later released under court order (17).

In mid-1975, Congress finally passed a mental health law. Recognizing the patchwork nature of the existing system, the legislation substantially altered the definition of a CMHC. Under the regulations governing the original act of 1963, CMHCs were required to deliver five essential services. The new law mandated no less than twelve. These included screening, aftercare and therapy for released patients, as well as specialized services for children, the elderly, and alcohol and drug abuse patients. A two-year grant program offered temporary assistance to enable centers to institute these services. In 1977 and 1978 Congress extended the program’s authorization for one and two years, respectively. By then there were about 650 CMHCs, a total far below an original goal of 2,000 centers by 1980 (18).

By 1976 most of the individuals who had played a prominent role in shifting policy away from state mental hospitals since World War II had largely passed from the policy scene. No one of stature had replaced Robert Felix, who had skillfully presided over the creation of a powerful federal presence and orchestrated the passage of the legislation of 1963. However, hope arrived with the inauguration of Jimmy Carter in 1977. In one of his first acts, Carter signed an executive order creating the President’s Commission on Mental Health to review national needs and priorities and to make necessary policy recommendations (19).

A task force panel on assessing CMHCs noted “the total program is moving away from caring for the most severely mentally disabled, the type most likely to spend time in a state hospital.” This view was confirmed by an influential GAO report in 1977(20).

Unfortunately, the Commission’s final report offered at best a mixed bag of diverse and sometimes conflicting policy recommendations that touched virtually every element of the mental health system. It supported linkages between family and community networks, on one hand, and mental health agencies on the other. It called for a more responsive treatment service system; a national plan to meet the needs of the chronically mentally ill; more effective ways of financing services and treatment; and an increase in the number of mental health personnel and greater diversity in recruitment. It offered something to virtually every stakeholder group (21). However, it clearly lacked policy provisions, and did not face fiscal realities. Congress based a great deal of their decision-making on this report when passing the Mental Health Systems Act in 1980, which proved to cause more problems in the end.

Swept Way in the Budget Policy Currents

The Mental Health Systems Act of 1980 had hardly become
TWO-WEEK SESSION
June 29-July 12, 2003

JAYHAWK EXTENDED DEBATE INSTITUTE
June 22-July 12, 2003

COACHES WORKSHOP
July 10-July 11, 2003

Outstanding Faculty: The squad leaders include college debate coaches and exceptional senior debaters from around the nation. This year, JDI will be headed by Dr. Scott Harris, KU’s Director of Debate. Many of the topic and theory lectures will be delivered by Dr. Robert Rowland, former Director of Forensics at KU and Baylor University. Other members of the faculty include quality coaches and debaters from across the country. Combined, our faculty have over a century of competitive debate and coaching experience.

Outstanding Resources: The University of Kansas holds over 5 million volumes in its library system. The campus is also home to a large federal document depository and a nationally-renowned archive. Students will find a wealth of resources related to the oceans topic at KU.

Outstanding Facilities: Students stay in air-conditioned residence hall rooms and eat in an award-winning dining facility. All the things a student might need during their stay - including a bank, restaurants, recreation facilities, basketball and tennis courts - are available on the beautiful Mt. Oread Campus at KU.

Outstanding Value: Over the last four years, the Jayhawk Debate Institute has maintained an average 8 to 1 student/staff ratio. Students who attend have a chance to work with a variety of college coaches from among the nation's top college and university programs. Our students leave Lawrence prepared to debate a variety of positions that can be used locally and on the national circuit.

Outstanding Track Record: Over the past several years, students attending the Jayhawk Debate Institute have returned to compile strong competitive records in national and regional competitions.
Outstanding Options

THE TWO-WEEK POLICY DEBATE SESSION
The two-week policy debate camp will offer labs in advanced, intermediate, and novice divisions. The advanced division is for experienced high school debaters. Students are exposed to advanced theory and work intensively on developing in-depth approaches to the topic. The intermediate division is for students with some experience who seek to improve their basic skills and to begin investigating more advanced theoretical concepts. All students are given ample opportunity to research both affirmative and negative aspects of the topic. A tournament concludes the two-week camp.

THE JAYHAWK EXTENDED DEBATE INSTITUTE (JEDI)
The most advanced workshop offered by the Jayhawk Debate Institute. The three-week session is for advanced high school debaters. Students will receive extensive assistance in research, argument construction, and debate skills. They will participate in tournaments and receive special instruction in advanced debate theory. The JEDI is directed by Dr. Scott Harris, Director of Forensics at KU. JEDI students should expect to participate in ten tournament-style practice rounds during the institute as well as numerous, individualized practice sessions. Students participating in this session should expect to be doing a great deal of original research during their stay at the institute.

COACHES' WORKSHOP
The KU coaches' workshop is under the direction of Dr. Scott Harris and Dr. Robert Rowland. It will offer extensive analysis of the Ocean Policy topic as well as theory and practice relevant to coaching high school debate.

LOW COST!
With Room and Board: $1100 (3 Weeks) or $800.00 (2 Weeks)
Without Room and Board: $725.00 (3 Weeks) or $475.00 (2 Weeks)
A $50 non-refundable deposit is required at the time of application.
Dorm size constraints force us to cap enrollment, so apply early to assure acceptance

law when its provisions became moot point. The election of Ronald Reagan led to an immediate reversal of policy. With a new mandate to reduce both taxes and federal expenditures, the new administration proposed a 25 percent cut in federal spending. More importantly, it called for a conversion of federal mental health programs into a single block grant to the states carrying few restrictions and having no policy guidelines. The 1981 Omnibus Budget Reconciliation Act provided a block grant to states for mental health services and substance abuse (22). The new legislation did more than reduce federal spending; it also reversed nearly 30 years of federal involvement and leadership. Federal funding was reduced at precisely the same time that states were confronted with significant social and economic problems that increased their financial burdens.

Mental health budget problems began soon after Ronald Reagan became president. Although President Reagan proclaimed in several proclamations that “the cost of inappropriate or inadequate response to mental illnesses are enormous,” the Reagan Administration continually cut back on funding. It was during the Reagan presidency that the problem of the homeless mentally ill became an important public issue, discussed prominently by the media. No leadership had emerged from the Reagan administration on the problem of homelessness in general or the homeless mentally ill in particular. The debate of deinstitutionalization, however, rose above politics (23).

In January 1989, President George Bush inherited the homeless problem as one of the major domestic issues facing his administration. In his inaugural address Bush mentioned the problem, and at a news conference the following month he was more specific.

“We must care about those in the shadows of life,” and I, like many Americans, am deeply troubled by the plight of homelessness. The causes of homelessness are many, the history is long, but the moral imperative to act is clear. Thanks to the deep well of generosity in this great land, many organizations already contribute. But we in government cannot stand on the sidelines. In my budget, I ask for greater support for emergency food and shelter, for community services, and measures to prevent substance abuse and for clinics for the mentally ill—I propose a new initiative involving the full range of government agencies. We must confront this national shame.”

In May 1990, the Interagency Council convened the task force on Homelessness and Severe Mental Illness on the Homeless, under the guidance of Secretary Jack Kemp of Housing and Urban Development. The task force developed a national strategy and specific action steps designed to end homelessness among people with severe mental illness. The key word here is that it was a national, not a federal, plan of action.

The Task Force offered several recommendations including:

- Making Access to Community Care and Effective Services and Supports (ACCESS) grants available to states. This effort was to test promising approaches to services integration with 20 to 30 communities selected to receive immediate assistance in ending homelessness among severely mentally ill individuals. The recommendation called for extensive pre- and post-award technical assistance to help each community take full advantage of available resources and offer expedited review of waiver requests and eligibility claims.

- NIMH and the Department of Justice will develop a Memorandum of Understanding (MOU) to stimulate appropriate settings among severely mentally ill persons who are appropriately placed in jails.

- HUD will seek congressional approval to reprogram funds for the Tenants’ Rental Assistance Component of the Shelter Plus Program in 1992, and will seek funding for 1993.

- HHS will continue to increase outreach activities to homeless individuals, especially to homeless, especially to homeless mentally ill persons.

- NIMH will identify exemplary comprehensive projects that integrate housing and support services for severely mentally ill persons and will disseminate information on how they were developed and how they can be adapted to other communities.

Some of the recommendations were implemented including the Access study which was funded and completed from 1993-1998. But for hundreds of thousands of people with severe mental illness, many were still a long way from home.

**Getting Low on Provisions**

Although there was some progress on the homeless problem, it was insufficient. Over the past 20 years, the federal appropriations for the mental health block grant had fallen in real terms. In 1980, CHMCs received $293 in annual federal appropriations—a small amount in overall mental health spending, but nonetheless an important proportion of the resources available for housing. However, even the modest amount looks significant today. In 1981, when the CHMC law was repealed and the mental health block was enacted in its place, spending was reduced by 14 percent. Following this substantial funding cut, the block grant has continued to drastically lose ground to inflation (25).

States were in the position of having to make a direct appropriation of their general funds to aid community services for the mentally ill and create a shift from the state mental institutions to the community in the process of deinstitutionalization of the mentally ill. However, instead of meeting these needs, states have been reducing spending on mental health services. For example:

- State only appropriations for mental health services were significantly lower in 1997 (adjusted for inflation and growth in population) than they were in 1955, when most people with mental illness were in state institutions. Given that institutions provided little in the way of treatment at that time, it would be expected that state spending for mental health would have grown, as new and effective approaches to treatment and supports were developed.

- State funding for mental health lost ground, by 7 percent, between 1990 and 1997. This was true for nearly every state.

- State funding for mental health have been falling in relation to other state spending. Spending on mental health services grew more slowly than (1) total state-government spending, (2) state-government funding on health and welfare and (3) spending on corrections. During the 1990s, state mental health spending grew by 33 percent, but the total spending grew 56 percent, funding on health and welfare services grew by 50 percent on corrections, by 68 percent (26).

The overall change in real buying power for state mental health between 1955 and 1997 is shown on the chart below. While
other funds supplement these state expenditures (for example, the federal Medicaid match and the federal mental health block grant), these falling numbers represent a reduction of state’s own efforts over the years.

Shifting Sands — The Fiscal Shell Game of Public Mental Health Financing

One of the biggest impediments to improving public services for people with chronic mental illnesses is the Byzantine nature of its funding. The financial support of a state mental hospital, community mental health centers or psychiatric outpatient clinic is so complex that a successful administrator must be equal parts certified public accountant, lawyer, and magician.

A community mental health center, for example, currently receives funds from the following sources:

- allocation from state departments of mental health
- allocation from local city or county departments of mental health
- federal Medicaid funds
- state Medicaid matching funds
- federal Medicare funds
- federal mental health block grant
- federal social services block grant
- medical insurance from insurance companies, each of which is different
- charitable organizations
- fees paid by patients

Many of these state and federal sources of financing have strings attached specifying what they can and can’t be used for. As the source of funds for individuals with chronic mental illness has shifted almost exclusively from the state to a complex set of federal, state and local programs, a fiscal shell game has evolved.

Each level of government tries to shift more of the fiscal responsibility for the care of the chronically mentally ill to other levels of government. Thus the federal government attempts to reduce the number of mentally ill individuals receiving SSI benefits and shift their support to local welfare programs, the state government closes more psychiatric beds in state mental institutions thereby forcing chronically mentally ill people needing inpatient care to go to general hospitals where federal Medicaid will pay some of the costs, and local governments close psychiatric beds in metropolitan hospitals forcing chronically mentally ill individuals back into the state system (27).

The consequences for the chronically mentally ill of this giant fiscal shell game, played among levels of government, are predictable. In many states, the system of public mental health care already deeply eroded, has crumbled completely as administrators at each level of government push financial responsibility for patient care back and forth while simultaneously professing to be involved in what is best for patients.

For patients who might need re-hospitalization following discharge, state officials have decreed that they must first go to psychiatric units of general hospitals rather than return directly to state hospitals. Unfortunately, however, many general hospitals did not want the seriously mentally ill as patients. Patients needing hospitalization were thus caught in a “Catch-22” situation in which they could not be re-admitted to a state mental hospital without first going to the psychiatric unit of a general hospital that refused to accept them. The tragic consequences of such policies were, and continue to be, evident everywhere (28).

The system of funding public services for people with mental illnesses in the U.S. is, in short, more thought-disordered than most of the individuals the system is intended to serve. At the federal level, funding programs strongly favor hospitalization for people with mental illnesses despite an official policy of deinstitutionalization. This contradiction as one official so aptly named represents a “psychiatric chimera” — an official policy of deinstitutionalization grafted onto an everyday practice of hospitalization.

States’ own appropriations for mental health services are far lower today than they were in 1955 (the peak year for warehousing people in state institutions). If the $8 billion appropriated in 1955 is adjusted for inflation and population growth, spending today is 30 percent less than the 1955 level. Given that state mental hospitals provided little in the way of real treatment at that time, this is an unambitious benchmark. State expenditures should in fact have increased significantly (29).

The situation became particularly dire in the late 1980s and 1990s, as more and more state mental hospitals were closed. However, the resources previously allocated to these hospitals were not reinvested in the alternative services necessary to meet the needs of the same population in the community. Instead, state appropriations for mental health have lost ground. Between 1990 and 1997, for example, per capita state mental health expenditures fell 7 percent when adjusted for inflation. This drop in mental health appropriation purchasing power occurred in virtually every state.

State funding for mental health care has also experienced much lower increases than total state spending and spending for corrections. During the 1990s, states’ expenditures for mental health care services grew 33 percent, while total spending grew 56 percent and spending on corrections, 68 percent. As a result, the share of state spending devoted to mental health is dropping — by 15 percent from 1990 to 1997 (from 2.1 percent of state expenditures in 1990 to 1.81 percent in 1997) (30).

In Harms Way — Medicaid and Mental Health Benefits

Medicaid is now the primary payer of public mental health services. States have relied heavily on its funding for community mental health services over the past 20 years.

Medicaid agencies have greatly influenced the development of public mental health care, especially related to organization, financing, services covered, and access.

- Medicaid now pays for more than 50% of the public mental services that states administer.
- It is expected that Medicaid financing of mental health services will reach 60% by 2007. The beneficiaries of these services represent 30% of the Medicaid “high cost” enrollees.
- Depending on the state, between 25% and 50% of persons receiving state mental health services only receive them from Medicaid.
- Among 6-14 year olds, about 25% of Medicaid spend-
The Scholars Program at the
Emory National Debate Institute
June 15 - June 28, 2003 • Emory University, Atlanta, Georgia

The Emory National Debate Institute, which has contributed to the education of high school debaters for a quarter of a century, now offers a specialized workshop-within-a-workshop catering to experienced high school debaters with advanced skills. The Scholars Program, which was conceived and designed by some of the nation’s most competitively successful college coaches, gives accomplished debaters the opportunity to receive the kind of instruction, research opportunities, and feedback they will need in order to meet their competitive goals for the coming year.

The Scholars Program will take place alongside the established Emory National Debate Institute, under the Direction of Melissa Macy Wade. Those who enter the Program will have access to the entire faculty of the ENDI. However, the Scholars Program contains a number of additional features designed specifically to benefit the advanced debater.

Special Features of the Scholars Program

**Advanced curriculum:** Every aspect of the Scholars Program has been redesigned by our staff of accomplished coaches, from the lecture schedule to the structure and pace of lab groups. Members of the Program will receive advanced library instruction, including guided research in the Woodruff library system and targeted use of Internet resources. Our curriculum helps students understand and utilize the most advanced modern debate positions, but without sacrificing their ability to win rounds with traditional skills and strategies.

**Emphasis on evidence accumulation:** Rather than forcing experienced students to endure redundant basic lectures, we let Scholars get on with the business of researching the topic and practicing advanced techniques.

**Amazing staff-to-student ratio:** We maintain a 1:4 staff-student ratio in lab groups, and each student will interact with nearly every member of our large Scholars Program faculty.

**Unique, separate lectures:** Outside their lab groups, members of the Program will receive direct instruction from top-rated college coaches. Even in lecture settings, our staff-student ratio is unusual, with no more than 20 students listening to one instructor. Furthermore, we offer a small group theory seminar menu targeted to students’ needs and interests.

**Numerous debate rounds:** Our curriculum includes a minimum of 12 rounds, with extended time for critiques from our staff.

**Select faculty:** The Program will be directed by a select group of the nation’s best debate minds. Past Directors of the Scholars Program have included award-winning college coaches, multiple NDT winners, and some of the country’s most prominent high school coaches. In the last few years alone, Joe Zumpetti (Director of Forensics at Mercer University), David Heid (winner of the 1996 NDT), Jon Paul Lupo (winner of the 2000 NDT), and Kacey Wolmer (NDT first-round debater and multiple participant in the finals of CEDA Nationals) have all been a part of the Program’s administrative team. The rest of the Scholars faculty will be selected from among the ENDI’s staff of accomplished college debaters and coaches.

**Great value:** Scholars will pay the same price as other students at the Emory National Debate Institute. We are a nationally competitive institute at a discount price.

You must apply for the Scholars Program at the ENDI. Those seeking admission should call or write:

Melissa Macy Wade
P.O. Drawer U, Emory University • Atlanta, GA 30322
Phone: (404) 727-6189 • email: lobrien@emory.edu • FAX: (404) 727-5367
Features of the Policy Division
Under the Direction of Bill Newnam

Experienced staff: Our senior level staff has worked at this Institute and many others, including American University, Bates College, Baylor University, Berkeley, Dartmouth College, Georgetown University, University of Iowa, University of Kentucky, Northwestern University, University of Michigan, Wake Forest University, Stanford University, and Stanford University.

Excellent staff-student ratio: The Institute offers debaters the opportunity to work with one senior level instructor accompanied by at least one active college debater in small lab groups of 10 to 20 students.

Flexible curriculum: The Institute has always provided students a wide variety of instruction suitable to their levels of experience. Each laboratory group has explicit objectives and a field tested curriculum for the two-week period, dependent upon their level of experience.

Commitment to diversity: The Institute has always been committed to making instruction accessible to urban and rural areas. We have several funded scholarships dedicated to promoting diversity. Additionally, ongoing grants make it possible to support many students from economically disadvantaged areas.

Dormitory supervision: An experienced staff including high school teachers, graduate students, and college upperclass students will supervise the dormitory.

Coaches workshop: An in-depth coaches workshop is conducted. Topics will include administration, organization, and coaching strategies. A full set of lectures appropriate for the classroom will be developed.

Inclusive Fees: The standard Institute fee includes tuition, housing, food, lab photocopying fees, entertainment, a t-shirt, and a handbook—the works.

Features of the Lincoln-Douglas Division
Under the Direction of Jim Wade

Experienced staff: The Director of the Lincoln-Douglas division has been in the activity for over twenty years, and has served in his current position for ten years. Other staff members include an array of the finest college coaches, as well as some of the top college debaters in the nation.

Excellent staff-student ratio: The Institute offers debaters the opportunity to work with one senior level instructor accompanied by at least one active college debater in small lab groups of 10 to 14 students.

Flexible curriculum: The Institute has always provided students a wide variety of instruction suitable to their levels of experience. Our classes deal both with general philosophical issues and practical technique. There is a strong emphasis in lab groups on building speaking experience and providing constructive critique. A typical day involves three classes dealing with philosophy or technique and theory, followed by five hours of practical lab sessions.

Commitment to diversity: The Institute has always been committed to making instruction accessible to urban and rural areas. We have several funded scholarships dedicated to promoting diversity. Additionally, ongoing grants make it possible to support many students from economically disadvantaged areas.

Dormitory supervision: An experienced staff including high school teachers, graduate students, and college upperclass students will supervise the dormitory.

Inclusive Fees: The standard Institute fee includes tuition, housing, food, lab photocopying fees, entertainment, and a t-shirt—the works.

ing is for mental health services; in some states it is as high as 40% (31).

The Early Periodic, Screening, Diagnosis, and Treatment (EPSDT) benefit of Medicaid is mandatory. The Medicaid EPSDT mandate requires states provide children with early, periodic and comprehensive assessments of both physical and mental health development; ensure that necessary referrals to treatment and service providers are made without delay and follow-up must be done to ensure that a child receives a complete diagnostic evaluation; and ensure that children receive the health care and treatment necessary to treat their physical or mental condition discovered by the screening services.

Medicaid also plays a fundamental role in the provision of outpatient pharmacy services to lower-income populations. Prescription drug coverage is one of the most widely utilized benefits in Medicaid, and is the fastest growing area of Medicaid spending.

But storm clouds are missing which means more broken promises for people chronic mental illnesses. Several economic forces are in play that are likely to impact the financing and delivery of needed services for people with serious mental illnesses. The acceleration of Medicaid spending growth, fueled by rapidly escalating health care costs, has attracted the close attention of both federal and state federal policymakers. At the core of this tension are deteriorating economic outlooks and declining revenue which have strained state budgets, while the federal budget also faces deficit. Due to the sputtering economy over the last two years, the number of people who have become eligible for Medicaid has dramatically increased which has placed more pressure on state policymakers to implement short-term solutions to control Medicaid costs. In essence, 50 perfect economic storms are being channeled up in the states threatening basic health care services for the most vulnerable populations, including people with severe mental illness.

Controlling the Storm Surge —
Limits on Access to Medications

The threat to mental health services is beginning to play itself out at the state level with a tidal wave of initiatives to limit Medicaid expenditures for prescribed drugs. The raw numbers that are staring down at Medicaid officials are likely to cause knee-jerk and systematic reactions to escalating drug costs and utilization.

- It is estimated that total spending for outpatient prescription drugs in Medicaid was $2.1 billion in 2000. This figure represents roughly 10% of total Medicaid expenditures in 2000 (32).

- Medicaid spending for outpatient prescription drugs increased by an average of 18.1% per year from 1997 to 2000, compared to 7.7% for total expenditures.

- It is estimated that nearly 12% of total Medicaid prescription drug expenditures are attributable to the use of psychoactive prescription drugs (33).

The current double-digit growth rates of Medicaid spending have serious implications for states and the federal government as they face deteriorating economic outlooks and declining revenue growth. As drug expenditures continue to climb and budgetary pressures mount, states are becoming more aggressive in trying to limit utilization of prescription drugs and regulate pharmaceutical prices.

Medications for people with chronic mental illness are being scrutinized and targeted for cost containment and utilization control strategies employed by Medicaid agencies. Access to quality care is at risk when states implement cost containment strategies. Decisions regarding specific medications prescribed to persons with mental illnesses should be based on physician judgments of treatments, not on economic factors. Studies show that limiting needed medications can result in interruptions in recovery and increases in costs to the system through higher hospitalizations, more physicians visit higher medication costs. This will inevitably result in increased deaths, homelessness, incarceration in jails, prisons and juvenile justice systems and immeasurable suffering. People with mental illnesses are being cast away in the financing and economic storm that states and Medicaid programs are experiencing.

Crowding in the Life Boats

Not only have our delivery and funding mechanisms failed people with severe mental illness, but our research programs have failed them as well. NIMH was conceived in March 1946, for the specific purpose of doing research on severe mental illnesses. A 1999 National Alliance for the Mentally Ill (NAMI) study found that:

- Just over one-third (36 percent) of all NIMH research funds supported basic and clinical research on severe mental illnesses.
- Only 12 percent of NIMH research funds were directed to clinical and treatment-related research on severe mental illnesses.
- At least 15 percent of NIMH research funds supported research on diseases that are the primary responsibility of other NIH Institutes.
- NIMH is funding a large number of behavioral research projects on diverse aspects of human behavior but almost no behavioral research that is relevant to severe mental illness.

It was concluded that NIMH has failed in its primary mission to support research on those illnesses posing the greatest public health burden — severe mental illnesses (34).

Lost at Sea

The subtle shifts in the mental health system were to have tragic consequences for many chronically and severely mentally ill persons most in need of assistance. In the 1970s and 1980s people with chronic mental illnesses were cast adrift in communities without access to support services or the basic necessities of life. For such persons the transition from an institutional to a community-based system proved devastating. By the 1980s the presence of homeless mentally ill persons in many communities served as a stark reminder that new mental health public policies had negative as well as positive consequences. Although, some constituencies benefited from their innovative policies, many people who required the most assistance were the chronically mentally ill — lost. Unfortunately, there are two levels of being lost — losing out in the mental health policy debate and missing all totally abandoned.

As highlighted in Fuller Torrey's *Nowhere to Go*, the major-
ity of mentally ill persons discharged from hospitals have become officially lost (36). Nobody know where they were.

A walk through the parks of any large city will tell an observer that the deinstitutionalized mentally ill are personally lost. Large numbers of them sit anonymously on benches talking to unseen voices. Later, they shuffle through food lines in soup kitchens and sleep in public shelters where they may not have to register. They can go for weeks or months at a time never being identified or even having to identify themselves. People were placed onto rowboats with no compass in the middle of a dark, angry sea.

What is more disturbing for those of us accustomed to thinking of government as competent, however, is that the majority of these mentally ill patients were officially lost as well. These people have been thrown overboard into a swirling, angry sea. This became clear in November 1986, when the director of the NIMH testified before a congressional committee on the seriously mentally ill. In response to a question regarding how much was known about the distribution of persons with schizophrenia in the around the country, NIMH staff prepared a chart which was presented as part of the NIMH testimony (37).

What was extraordinary about this chart is not only that 58 percent of all individuals with schizophrenia had been officially lost but that nobody at the senate legislative hearings seemed shocked by the revelation. The NIMH, with an annual budget of over $250 million, did not even appear to be embarrassed about it. One would not expect federal officials to know where every single released patient was living or receiving care; it would seem reasonable, however, to expect federal officials to have conducted studies to ascertain more precisely the result of the massive shift in a patient population that has taken place with deinstitutionalization. When 957,000 individuals with serious mental illnesses have been lost to follow-up care and services, then something is terribly wrong (38).

The Imperative to Locate a Moral Compass

We have reviewed that just 40 years of legislative efforts to improve services and care for people with chronic mental illnesses, and several reports that have made far-reaching recommendations to improve the system. As recently as 1999, the landmark report entitled, "Mental Health: A Report of the Surgeon General," showed that there are a range of effective treatments for people with mental illness. But stigma and a sense of hopelessness about the opportunities for recovery are frequent barriers to obtaining needed treatment. The New Freedom Commission interim report states that America’s mental health service delivery system is in disarray. The report states that the system is in need of dramatic reforms and that the fragmented nature of the system is impeding the delivery of effective mental health services.

For those people with severe mental illnesses who do not benefit from the treatments and try to manage their illnesses every day, we must find new ways to care for these people — they must have hope of surviving and thriving.

Further, serious mental illness can strike at any time and among all elements of the population. The ensuing impact on the individual, family, and society is immense, for it often leads to disability and dependency.

Where should we begin to correct the broken promises to the mentally ill? Gerald Grob says it all:

"The public and their elected representatives have often accepted without question the illusory belief that good health is always attainable and purchasable. The result has been periods of prolonged disillusionment that have sometimes led to abandonment of severely incapacitated persons. Public policy has thus been shaped by exaggerated claims and unreasonably high standards. Largely overlooked or forgotten are the ethical and moral considerations. All societies, after all, have an obligation toward individuals whose disability leads to partial or full dependency. If the means of complete care are beyond our grasp, it does not follow that we ought to ignore those whose illnesses incapacitates them. To post an absolute standard of care leads to a paralyzing incapacity to act in spite of evidence that programs that integrate mental health services, entitlements, housing, and social supports often minimize the need for prolonged hospitalization and foster a better quality of life. It has often been noted that a society will be judged by the manner in which it treats its most vulnerable and dependent citizens. In this sense, the severely mentally ill have a moral claim upon our sympathy, upon our compassion, and above all, upon our assistance (39)."

Is such a view attainable? We know that present mental illness delivery system is awash in tragedy. If we do not aspire to correct the decades of injustices, the alternative is to continue to let people with chronic mental illnesses to drift along the currents of hopelessness and despair and occasionally wash up on our shores.

This year’s resolution asks the question of whether or not “the United States federal government should establish an ocean policy substantially increasing protection of marine natural resources.” This is not a new question: environmental advocates and political interests have been debating this question, although not with great frequency, for thirty years. Since oceans make up over 70% of the land mass of the earth, and arguably provide the raw materials necessary for human survival, it is an important question.

"Given the breadth of the topic, only a strategic approach can prevent the negative from literally drowning in a sea of affirmative ground."

The case to answer the question in the affirmative is a strong one. There are a large number of reputable studies that indicate that our ocean ecosystems are facing many serious threats and that the survival of these ecosystems is critical to the survival of the human species. Affirmatives will be able to choose from hundreds of different, specific proposals to advance the protection of marine ocean natural resources and negatives will struggle to link broad negative disadvantages and kritiks to a plethora of different affirmative cases. The breadth of this topic and the relative weakness of generic negative positions will leave most negatives in search of dry land.

This article begins with examining some of the key terms in the resolution. In order to provide some background to the core topic areas, the article includes a history of U.S. ocean policy and then introduces the harm areas, solvency mechanisms, likely genetic disadvantages, and kritiks. It concludes with a discussion as to how to approach the topic from a strategic point of view. Given the breadth of the topic, only a strategic approach can prevent the negative from literally drowning in a sea of affirmative ground.

**Definitional Issues**

Leaving a larger topicality discussion of each word in the resolution for a later day, this discussion will focus on the words and phrases that make this topic unique and that are important for establishing negative ground. One of the most important phrases in this year’s resolution is “ocean policy.” Although the phrase is used frequently in the literature, I have yet to see any definition of the term, vague or otherwise. Until then, it is useful to define each word separately.

**Oceans**

“Oceans” are defined by the American Heritage Dictionary of the English Language as: “The entire body of salt water that covers more than 70 percent of the earth’s surface. The “ocean” is divided into a number of oceans, “including the Atlantic, Pacific, Indian, Arctic, and Antarctic oceans” (Ibid).

There is a popular misconception that ocean waters are not U.S. territory. This is not true. The U.S. has always claimed legal authority over ocean water within three miles of its territory. In 1983, ocean waters where the U.S. retains the exclusive right to develop resources were enlarged from the edge of the continental shelf, which is often less than 10 miles from the coast, to 370 km (about 200 miles) offshore and its territory was extended from 3 to 12 miles. This 200 mile EEZ was established under the Convention of the Law of the Sea. Although the U.S. has not ratified the Convention, it does accept the 200 mile EEZ.

There is no strong argument that the affirmative’s policy has to cover the entire ocean or, more specifically, all oceans. First, there is nothing in the resolution that requires the policy to apply to all oceans. Second, in the resolution, “ocean” is singular, suggesting, at the very least, that the policy does not have to apply to all oceans. Third, it is really even illogical to argue that the affirmative has to cover all oceans since no “environmental policy” would deal with all aspects of the environment. It would be rather silly to require the affirmative to adopt a “one size fits all” approach since it is unlikely that any one ocean policy could solve all problems. Finally, the affirmative’s policy should be designed to protect the entire ocean ecosystem.
Under this interpretation, the only topical affirmatives would be ones that are not legally feasible.

It will also be difficult for the negative to force the affirmative to operate only on ocean waters. As Buck (1997c) explains, “Fish stocks migrate across jurisdictions and do not recognize international waters.” Policies that apply to “oceans” also affect non-ocean, domestic waterways. Although the affirmative’s policy may be an “ocean policy,” it is likely to have benefits that extend beyond the ocean.

**Policy**

A policy is generally defined as “a course of action.” So, an “ocean policy” is a course of action related to oceans. It is important to point out here that the resolution does not call for any “policy” that protects oceans, which would have allowed the affirmative to win cases which indirectly protect marine natural resources, but rather for an “ocean policy” which protects marine natural resources.

**Marine Natural Resources**

The ocean policy that the affirmative needs to establish is one that protects marine natural resources. *Merriam-Webster* defines marine as “of or relating to the sea” and the *Wordsworth Dictionary* defines natural resources as “the sources of wealth and edification that occur in nature, such as fresh water, mineral deposits, timber, wildlife, and park land.” Since marine is the adjective, the natural resources that the affirmative “protects” must be found in the sea.

**Protect**

The existence of the word “protect” in the resolution is important. “Protect,” as defined by the *Merriam-Webster Dictionary*, means to: 1: to cover or shield from exposure, injury, or destruction; guard 2: to maintain the status or integrity of especially through financial or legal guarantees as a: to save from contingent financial losses b: to foster or shield from infringement or restriction c: to direct with protected territories; specifically: to restrict competition for (as domestic industries) by means of tariffs or trade controls.

How narrowly or broadly this word is interpreted will have a big impact on negative ground. For example, a strict interpretation may require the affirmative to physically protect the resources, such as with the military. This interpretation obviously establishes a substantial amount of negative ground. A broader interpretation may permit the affirmative to simply sanction or fine non-violators – to legally enforce the protection. An even broader interpretation may enable the affirmative to simply provide companies with incentives not to destroy habitats. Since most of the best negative disadvantages stem from affirmative placing legal restrictions on resource exploitation, and strong negative counterplan ground stems from providing incentives to companies not to exploit marine natural resources, it will be important for the negative to win that at the very least the affirmative can not provide incentives.

**Harm Areas**

**Species Extinction**

This year, the primary affirmative harm is species extinction. The extinction of ocean species, including fish, plant life, and other species supported by those species, are driven by a number of causes.

**Over-fishing.** Over-fishing refers to the idea that fish are being caught at a faster rate than they are replenishing themselves. Almost every species of fish is arguably in risk of extinction due to over-fishing. Fish species drawing the most attention include Dolphin, Tuna, swordfish, shrimp, sea bass, and Atlantic Halibut.

**Fishing.** Over-fishing is not the only direct threat to species populations. Even “sustainable” fishing threatens other animal species that are often caught in fishing nets and have habitats destroyed, such as the Gulf of Maine harbor porpoise, by fishing (Buck, 1997a).

**Whaling.** Countries such as Norway, Russia, and Iceland are engaged in commercial whaling. Japan has threatened to resume whaling. Many biologists argue that whales are a “keystone” species that the rest of the ocean ecosystem depends on.

**Noise Pollution.** One of the most commonly cited causes of noise pollution in the ocean is the military’s use of sonar (Common Dream, 2002).

**Oil Spills.** Sinking ships often spill millions of gallons of oil into aquatic ecosystems. Relatively recent oil spills that have caused extensive environmental damage include the Exxon Valdez oil spill off the coast of Alaska and one last summer off the coast of Spain.

**Pollution.** General ocean pollution can stem from a number of causes; the dumping of hazardous waste into the ocean, discharge of waste material from cruise ships, discharge of waste materials from coastal properties. The discharge of waste materials from coastal properties includes “sewage, chemical, and garbage disposal, and runoff from agricultural and forested lands” (Greenwood, 1997).

**Resource development.** The development of deep sea oil wells and mineral resources also threatens the oceans (Greenwood, 1997). Minerals being developed include “gold, platinum, chromites, and titanium. Many of these minerals are in the EEZ, which has not yet been substantially developed” (Mielike, 1997).

**Coral Reef Depletion.** Coral reefs are “are massive structures made of limestone that is deposited by living things. Although thousands of species inhabit coral reefs, only a fraction produce the limestone that build the reefs. The most important reef building organisms are corals. Coral reefs support over twenty-five percent of all known marine species. As one of the most complex ecosystems on the planet, coral reefs are home to over 4,000 different species of fish, 700 species of coral and thousands of other plants and animals.” (International Coral Reef Information Network, 2002). Many of these reefs are threatened by fishing, tourism, and boating.

**Starvation.** Depletion of fish stocks threatens that survival of a number of people throughout the world that rely on fish for their dietary intake. Even if substantial declines in fish populations do not cause life-threatening species extinction, the lower supply of fish raises prices, putting the lives of many at-risk.

**Climatic Change**

Our oceans drive our climatic cycles (Justus, 1997). Substantial disruptions in ocean ecosystems threaten climate patterns, increasing the risks of deadly storms and climate disruptions.
History of Ocean Policy

Ocean policy in the United States was developed in 1969 when the Stratton Commission delivered a review of the state of the oceans and made recommendations for U.S. policy. The recommendations in the Stratton Commission Report are responsible for what we now know as NOAA — the National Oceanic and Atmospheric Administration. Founded in 1970, NOAA has a $3 billion budget and is responsible for everything from the weather to marine fisheries (Nature, 2002). Shortly after NOAA was formed, Congress passed the Coastal Zone Management Act in 1972 and developed the Magnuson-Stevens Fisheries Conservation and Management Act (FCMA) in 1976. This act governs federal management of fisheries outside of coastal state waters to 200 miles offshore (Buck, 1997b).

In 1972, Congress also passed The Marine Protection, Research, and Sanctuaries Act, which authorize enforcement of the Ocean Dumping Act. The Act prohibits the dumping of almost all materials other than dredge sediment into U.S. ocean waters. In 1992, Congress amended the Act to permit states to adopt ocean dumping standards that are more stringent than federal standards as long as those standards are consistent with federal law (Copeland, 1999).

Following a similar pattern, in 1972 Congress passed the Coastal Zone Management Act (CZMA). The purpose of the Act was to regulate, and limit, sources of pollution along coastal waters. In 1990, however, Congress amended the Act in response to failures to require that each state with coastal territory to implement a non-point source pollution plan. If a state does not submit an approvable plan, the state will lose its federal coastal management funds under section 219 of the Clean Water Act (CWA) (Solomon, 2001).

Status Quo Ocean Policy

Significant recent developments in U.S. ocean policy began under the Clinton administration. In May of 2000, Clinton issued a Marine Protection Area executive order which required the Environmental Protection Agency (EPA), acting under authority established in the Clean Water Act (CWA), to develop new, more stringent ocean discharge criteria (Craig, 2001).

In August of that year, the Congress passed the Oceans Act of 2000. This act established a 16 member commission on ocean policy (oceancommission.gov) that started meeting in 2001 to make recommendations to the President regarding what U.S. ocean policy should be. The recommendations are due in 2003 and are expected to focus on

One thing that is notable about current U.S. ocean policy is that it is not directed by, or coordinated by any particular agency in the federal government. Instead, "US oceans are controlled by a matrix of nine government agencies, the budgets of which are overseen by 44 congressional committees and subcommittees." (Nature, 2002)

Potential Affirmative Plans

There are a number of advocates for specific affirmative policies that will protect the ocean's marine natural resources. The list that follows is just a sampling of the many different proposals that activists will be able to choose to advocate.

Fish quotas. The National Research Council (1999, Sharing) notes that a legislative prohibition on fish quotas should be removed and that they should either be established based on numerical fish catches or among different communities or groups. When these quotas are designed it may be desirable to consider the impact of declines in certain fish populations on the food supply of other marine animals.

Sea Turtle Protection. Prior to current sea turtle preservation efforts, over 10,000 sea turtles a year were going extinct due to shrimp harvesting with drift nets. Turtle mortality has been reduced because the U.S. requires shrimp trawlers to use Turtle Exclusion Devices (TEDs). In 1990, Congress debated sea turtle conservation, but did not require shrimp farmers to take more aggressive measures to limit damage to sea turtles (Buck, 1997c).

Whaling Sanctions. Since the United States does not engage in any commercial whaling (U.S. citizens are prohibited from whaling by the 1972 Marine Mammal Protection Act), it is no surprise that the United States is a member of the International Whaling Commission (IWC) and is a strong advocate of measures to crack down on commercial whaling, primarily through the threat of unilateral sanctions (Buck, 1997a).

In 1971, Congress passed the Pelly Amendment to the 1954 Fishermen's Protective Act, which enables fishery product imports to be prohibited from countries that undermine international fisheries agreements, such as whaling agreements. Although the United States has never sanctioned any country under the Pelly Amendment, it has used the threat of sanctions to obtain concessions from offending nations.

The IWC does contain a provision that allows for commercial whaling for research purposes, which both Japan and Norway have taken advantage of. Moreover, Norway and Iceland have withdrawn from the IWC and have resumed commercial whaling (Buck, 1997b). Clearly, U.S. whaling policy has been a failure. One approach the U.S. could take is to stop its push for an exemption to the IWC by Washington State's Makah tribe. Another approach is to reduce the threat of sanctions and claim that a cooperative approach is more likely to lead to sustainable whale harvesting.

Marine Protected Areas. The National Research Council (2000, Marine) argues that marine protected areas should be established in certain areas to limit human activities such as recreation and fishing.

Oil Spill Reduction. In 1990, Congress passed the Oil Spill Reduction Act of 1990 to reduce the risk of oil spills as well as to support restoration measures in the event of a spill. Provisions of the Act include requiring all tankers in U.S. waters to be double-hulled by 2025, establishing liability for costs and clean up (although the liability is limited to about $150 million), and establishing a trust fund for responding to a spill. Although the number of oil spills has decreased, the affirmative can make a case to change liability standards, require barges to be double-hulled, and increase resources for restoration (Lee, 1997).

Pollution discharge regulation. Discharge regulation is primarily a state and local matter, but affirmative can make a case for stronger federal enforcement, federal coordination of enforcement efforts, or the development of federal standards (Solomon, 2001). Specific pollutants, such as chemical or sewage wastes, could be addressed.

Antarctic Ocean Protection. The U.S. Commission on Ocean Policy noted in 2002 that "The Arctic is a key component of global climate change, a known sink for contaminants, the habitat for one of the Nation's largest and most valuable fisheries, and the basis of subsistence for northern peoples" (p. 2). Substantial efforts have been devoted to the protection of these resources.
Wake Forest Summer Debate Workshops

Fifty Years of Workshop Experience
Year-Long Debate Instruction for the 21st Century

This summer, Wake Forest University will be celebrating a fifty year commitment to the instruction of debaters from across the United States through our Summer Debate Workshop programs. Four different programs are available to students to choose from:

The Summer Debate Workshop. Team-taught laboratories, divided by experience level, allow each student to receive intensive, individualized instruction as students are taught each phase of the debate process. Each lab of no more than eighteen students is led by two of the listed faculty members and is assisted by one Wake Forest debater.

The Policy Project. Other institutes have been playing catch-up in curricular design ever since we began the Policy Project. Now, while others are advertising shared evidence, early frequent practice, and other features we have long since refined, we are finding new ways to tailor the debater's experience to their specific needs. You and/or your coach can choose the specific lab you want. Lab choice is a function of the affirmatives you want to work on and/or the coaches you want to spend the most time working with. Regardless of your lab choice, your practice rounds, theory discussions, and other activities for which tracking is important will be with people at your level. We never track by age, only ability. We aim to simply have the best overall group of debaters of any age and provide appropriate experiences for each of the ability levels.

The Fast-Track. What would it be like to be coached by those who have coached national champions at both the high school and college level? By coaches who contribute to the cutting edge of debate theory and argument construction at both the high school and college level? If you are selected for the Fast-Track you can experience the answer. Jenny Heidt and Ross Smith will get you, and a small, select, group of your peers off to the fastest start possible with practice drills and debates, discussions, seminars, and focused research. We will argue together about strategy, tactics, and key issues on the coming topic. You can apply individually or with a partner. The program is limited to the most talented and experienced debaters applying, but is not restricted by year in school.

Policy Analysis and Strategy Seminar. Debaters who want to start off with a unique intellectual opportunity are invited to attend a special seminar week before the beginning of the Policy Project. The Policy Analysis and Strategy Seminar provides directed readings and discussions on core topic issues; analyzes the arguments produced by early workshops and handbooks; and discusses high-level strategy, theory, and tactics of special interest.

Tentative Dates*
Summer Workshop: June 15-July 3
Policy Project: July 5-August 1
Fast-Track: June 20-August 1
PASS, June 27-July 4

Last Year's Prices*
Summer Debate Workshop $1575
Policy Project $2875
Fast-Track $3475

Why Attend Wake Forest?
50 years of workshop experience
Year-round learning
Affordable opportunities for all
Cutting edge strategy and curriculum
Professional, experienced staff
Safe and comfortable environment

*Please visit our website for updates on the most recent dates and prices.

Wake Forest Summer Debate Workshops

Fifty Years of Workshop Experience
Year-Long Debate Instruction for the 21st Century

In partnership with PlanetDebate.com, the Wake Forest Summer Debate Workshop programs are happy to announce that we will be providing the first ever year-round workshop experience, with a summer stop in Winston-Salem.

Instruction for students who attend any of the summer workshops will begin in mid-May with an introductory audio lecture on the topic, access to over 1000 to topic-specific articles on the web, at least 25 essays on the topic, comprehensive bibliographies to support research at home and in Winston-Salem, and a practice debate affirmative. When students leave Winston-Salem, they will have continued access to a special collection of Planet Debate resources, which include:

- Over ten thousand cards on from leading debate handbooks and college debate coaches. The evidence is available 24 hours a day, 7 days a week in a searchable database;
- Special chats for Wake workshop students only;
- Special message boards and forums for Wake students where questions will be answered by lab leaders throughout the year;
- The delivery of audio lectures throughout the year on important topic-related arguments.

An extensive link directory to topic and instructional resources that will support your debating all year long.

2003 Faculty Includes*

Ross Smith, Director, Debate Coach, Wake Forest
Jarrod Aitchison, Asst. Coach, Wake Forest
Stefan Bauschard, Debate Coach, Boston College
Amy Collinge, Senior Debater, Lewis & Clark
Becca Eaton, Senior Debater, Wake Forest
Justin Green, Debate Coach, North Texas
Terry Heidt, Director of Debate, Westminster School
Casey Kelly, Asst. Coach, Wake Forest
Tom Lyke, Director of Debate, Clarion University
Kristen McCauliff, Asst. Coach, Wake Forest
Tim O’Donnell, Director of Debate, Mary Washington
Kim Shanahan, Director of Debate, Fort Hays H.S.
Patrick Speice, Senior Debater, Wake Forest
Ed Williams, Director of Debate, Marist School

*See website for updates and bio of the faculty

The Antarctic Treaty, which entered into force in 1961, is the foundation of a group of organizations that are often referred to as the Antarctic Treaty System. Forty-three countries are contracting parties to the original treaty. In response to concerns that the consultative body was too exclusive, the UN General Assembly, between 1983 and 1994 took up the “Question of Antarctica.” As a result of its efforts, a “Protocol on Environmental Protection” to the treaty was negotiated, which essentially bans the development of arctic resources. The United States ratified the treaty in 1996 and deposited the instruments of ratification in 1997 (Browne, 1997). Despite these efforts, some argue that the Protocol is not strong enough and that additional action is needed.

**Law of the Sea.** One of the more popular cases on this topic is likely to be the U.S. ratifying the Law of the Sea Convention. The case is relatively easy to research, has large advantages, and is very topical.

Although the treaty entered into force in 1994, the United States did not ratify it to the 1982 United Nations Convention on the Law of the Sea (UNLOS) because it opposed its limits on seabed mining and did not think that it had enough influence in the governing council’s decision-making. In particular, the U.S. objected to the requirement that seabed mining applicants would have to turn over one-half of their mine site to the Seabed Authority to be developed by the Authority and to transfer technology to developing countries.

In an effort to gain U.S. ratification, the Secretary of the U.N. entered into negotiations with the U.S., and other countries who engaged in deep seabed mining, to address any outstanding issues and the Clinton administration negotiated an agreement relating to implementation which basically exempted the U.S. from parts of the treat. On October 7, 1994, Clinton submitted the treaty to the Senate for its advice and consent for ratification, but no action has occurred (Browne, 1997).

Affirmatives could make a pretty strong case for ratification of the treaty. Since most U.S. demands have been acceded to, it will be difficult for the negative to win any case-specific disadvantages, such as the negative impact the treaty may have on the seabed mining industry. At the same time, however, it will be hard to win that the treaty does much to protect oceans since it includes many exemptions/concessions to the U.S., including the U.S. ability to protect its coastal waters within the 200 mile EEZ.

Although the affirmative may have trouble winning an advantage that stems specifically from the enforcement of the UNLOS Treaty, the affirmative can likely claim an advantage from boosting U.S. environmental leadership as a result of ratification.

**Ballast Water Regulation.** As ships move from port to port across international waters they inevitably take on and discharge large volumes of water. The water that is discharged is referred to as ballast water. One problem with ballast water is that many non-native species are discharged that when introduced in new environments, threaten native species. Mcgee (2001) suggests technological and port-based solutions to the problem.

**Macro-level change.** In addition to these specific policies, the affirmative could make the cases for more systemic change, such as the creation of a cabinet-level Oceans Department or of a coordinating policy to integrate different ocean preservation efforts across the federal government (Nature, 2002).

**Military sonar.** There are proposals for changing the military’s sonar technology and policies to reduce noise pollution (Common Dreams, 2002). Other military affirmatives may include such things on bans on underwater mines or deployment restrictions.

---

**Disadvantages to Protecting Marine Natural Resources**

There are a number of generic disadvantages to protecting ocean marine resources. Most of these disadvantages will not link to every affirmative, but many will link to most.

**Economy.** There are a number of ways that policies to protect marine natural resources could negatively impact the economy. First, a general argument can be made that policies to protect ocean resources will inevitably end up restricting access to marine resources that private groups and individuals want to develop. These private groups and individuals range from large-scale mineral developers to more traditional fisher people. Restricting access may mean more economic problems, poverty, and depression amongst groups worldwide that depend on these resources. Second, negatives can also make a more general business confidence argument, contending that environmental regulations on businesses are likely to undermine business investment in the economy.

**Culture.** Many traditional fisher people and cultures rely on accessing ocean fishing and marine natural resource for their livelihoods. Restrictions on ocean development may threaten these peoples.

**Energy Dependence.** Restricting access to ocean resources, particularly along the coastline of the United States, is likely to make it more difficult for U.S. companies to develop oil there. This may raise oil prices and generally increase U.S. oil dependence. Michael French, Director of Technology Assessment Division, Louisiana Department of Natural Resources, explained in 2002 that “the full potential of the OCS (Outer Continental Shelf) is to ever realized...all areas of the OCS must be opened up to exploration and production.”

**Trade Wars.** To protect ocean resources outside the 200 mile EEZ the affirmative may have to threaten countries with trade sanctions to get them to change their practices. Owen (2000) argues that such sanctions risk trade conflicts.

**Politics.** Ocean policy is not exactly a hot political issue, but that does not mean that the negative will be unable to win a politics disadvantage. Policies that protect oceans by restricting industries are likely to alienate business groups and require an investment of political capital to pass. Since pro-environment policies are often opposed by conservatives, the plan could threaten Bush’s conservative base or undermine GOP (Republican) unity.

**Federalism.** As discussed in the definitional section on oceans, states are generally responsible for the regulation of waters within three miles of their coasts. Federal regulations generally cover the body of water beyond three miles to the end of the 200 mile EEZ.

Affirmative cases that regulate water pollution within that three mile area arguably link to federalism. Craig (2001), in explanation of Clinton's 200 Marine Protection Act Executive Order, states that "EPA effectively limited the new requirements' applicability to a coastal zone three to 200 miles offshore. EPA's self-imposed limitation reflects basic jurisdictional divisions between the state and federal governments regarding the ocean...The ocean is not a unified body for regulatory purposes. The history of divided regulatory authority over the ocean between state and federal governments is a complex progression originating from the concept of "navigable waters"...States have also brought claims for jurisdiction further out to sea, such that Florida and Texas have conse-
Kritiks of Protecting Marine Natural Resources

There are many “kritiks” of protecting marine natural resources. In this section, two of the more useful and generic ones are discussed.

Deep Ecology. In 1973 Norwegian philosopher Arne Naess published a summary of a lecture that he gave in which he drew seven distinctions between deep and shallow ecology. Naess (1995, reprint) characterizes deep ecology in the following ways:
- Rejection of the “human-in-environment” image in favor of the “relations, total-field image”
- Biophysical egalitarianism — human are equal, not superior creatures
- Principles of diversity and symbiosis
- Anti-class posture
- Fight against pollution and resource depletion
- Acknowledgment that ecosystems are complex
- Support for local autonomy and decentralization

The most intriguing, unique, and frequently debated characteristics of deep ecology are the first two. Humans are just another part of nature, not something that is, or should be, set apart from it and that we should not be afforded any normative priority in the ecological order. In fact, some of the most radical deep ecologists are Earth Firsters — a group that wants to put saving the global environment ahead of saving humans.

The deep ecology kritik argues that as long as we continue to prioritize human aspirations, such as maintaining economic growth, environmental problems will not be solved. Naess thinks that we need to reconceptualize our role in the world beyond an anthropocentric one to include larger entities such as forests, bioregions, and the planet as a whole on our “care ego.”

Counterplans

There are a number of generic counterplans that the affirmative can advocate as alternatives to the affirmative plan.

States. As mentioned earlier, Discharge regulation is primarily a state and local matter, and so is coastal water management. The 1972 Coastal Zone Management Act (CZMA) “created federal incentives for coastal states and territories to plan and manage their coastal resources under several broad guidelines. . . . Water quality is controlled primarily through state-specific regulatory programs administered by the EPA under the Clean Water Act” (Zinn, 1997). Also, remember that under the MPA, the states have the authority to implement more stringent ocean dumping standards.

Courts. The courts are actively involved in interpreting existing environmental legislation to determine if it requires action by federal agencies to enforce particular environmental harms. The affirmative could have the Supreme Court, or other federal courts, rule that one of the existing pieces of ocean policy legislation requires federal government action in the area specified by the plan.

The most common net-benefit to this counterplan is the Politics Disadvantage.

Executive Action. If the affirmative specifies that Congress is to be the court’s agent of action, the negative could challenge to have the President issue an executive order or simply an executive agreement to initiate the plan. Rodgers (2001) discusses the role of executive agreements in environmental policy. The benefits include disadvantages to court and/or Congressional action. As explained earlier, in May of 2000 President Clinton issued an executive order to strengthen ocean discharge standards.

Study. In the original topic paper, Darren Eckstein (2002) suggests that a study counterplan may be a good negative strategy. Given that the final recommendations of the Ocean Commission have not yet been made, that study is going on in the status quo, and that “the oceans desperately need a more coordinated approach” (Nature, 2002), a strong case can probably be made that we should wait a little while longer to determine how we should act. Lautenbacher (2002) argues that additional research is needed on the role of the oceans in the ecosystem.

This strategy, however, is limited by a couple of arguments. First, the Ocean Commission’s report is due to be released in June of 2003, well before the start of the season. We will know their recommendations then. Second, the affirmative is likely to advocate the adoption of a very specific policy, for which they will argue that additional study is not needed.

World Government. Thanks to the State University of West Georgia, this counterplan has made its way back into debate. Alexander (1974) argues for establishing World Government to protect oceans.

Incentives counterplan. If the negative can win that the term “protection” requires the affirmative to physically and/or legally restrict access to marine natural resources the negative has a strong “voluntary” counterplan as its disposal, which instead of restricting businesses, provides financial incentives, such as tax breaks, for them not to exploit the resources. Net-benefits to this counterplan include the Business Confidence Disadvantage, the Trade Wars Disadvantage, and the Politics Disadvantage.

Strategic Thoughts

It will be very difficult, if not impossible, to be able to debate each and every case on its individual merits. Smart negative teams will not risk drowning in a sea of affirmative ground by approaching the topic on a case-by-case basis and instead will develop some strong generic negative strategies that they can use against most, if not all, affirmative. To have a strong attack, negatives will need to have some basic tools at their disposal.

Solvency Attacks. The weakest point of most of these affirmative cases is solvency. Although it will be desirable to have as many case-specific solvency takeouts as possible, a number of general solvency arguments will also be applicable to most affirmatives. One, the United States can only regulate the oceans within 200 miles of its shore. This leaves an awful lot of ocean left to destroy. Since the ultimate impact to the affirmative harms will likely assume the total loss of all ocean ecosystems, this will be a significant solvency problem for the affirmative. Affirmatives that attempt to regulate beyond the 200 mile border are likely to link to trade disadvantages because trade sanctions are a popular means to enforce U.S. law extraterritorially. Two, negatives can argue, either in the form of a kritik or a solvency argument, that a more integrated (Davis, 1993; Scheibelher, 2001), non-technological, nonlegal, and comprehensive solution to the problems of marine natural resource protection is needed because legal solutions are inevitably circumvented (Arda, 1994) and technological solutions are inevitably regressive (Liptak, 2001). Piecemeal approaches also tend to undermine overall, comprehensive policies. If the negative is able to deal a substantial blow to affirmative solvency claims they may be able to outweigh the affirmative case with one of the generic disadvantages discussed above, even if the link is tenuous.
held June 22-27, 2003 on the campus of Western Kentucky University located in Bowling Green, Kentucky, the WKU Summer Forensic Institute is an excellent educational choice, both for students wishing to cement their understanding of the fundamentals of competitive public speaking and also for those seeking to advance their performances to a higher level.

Costs for the institute are kept at a minimum: $300 for in-state students and $600 for out-of-state students. This fee includes room, board and all instruction for the week.

The approach of the WKU camp combines structure with a relaxed, comfortable atmosphere that strikes a balance between educational and competitive interests while allowing students to learn at their own pace. Attendance is intentionally restricted in order to insure a focus on individual instruction.
The WKU Institute offers personalized, intensive study in four major areas:

- advocacy: policy and Lincoln-Douglas
- interpretation: dramatic, humorous and improv duo; poetry, prose and solo acting
- limited preparation: extemp and impromptu speaking
- public speaking: original oratory

Our staff is comprised of a broad range of experienced instructors, including former coaches and competitors from Bradley University, Illinois State University, the University of Texas at Austin, Reitz High School and Brentwood Academy; national collegiate champions and finalists in I.D., extemp and impromptu; former NFL champions and finalists in addition to current members of the WKU squad.

The deadline for application is June 1, 2003. Visit our website at: www.wku.edu/forensics for more information and an application.

Or, you may contact Judy Woodring directly:

Summer Forensics Institute
Topicality. As discussed in the topicality section of this article, the interpretation of the word "protect" is more likely to determine negative ground than any other word in the resolution. Given the magnitude of the affirmative harms, and the obvious links to many of the disadvantages, it will be hard for the negative to supply "outweigh the case." A strong generic counterplan, such as the incentives counterplan, will probably get the negative far since it will likely be able to solve most of the affirmative harms.

Harm Attacks. Although it is always useful to have an arsenal of harm takeouts, it will be difficult for the negative to win that the oceans are not facing serious threats. As the U.S. Commission on Ocean Policy noted in 2002, "The oceans are in trouble. Our coasts are in trouble. Our marine resources are in trouble... all perhaps, in serious trouble. These are observations on which the 18 Commissioners of the U.S. Commission on Ocean Policy, after completing a portion of its extensive information gathering process, readily agree." (p. 1). Nonetheless, the negative will be able to argue that environmental impacts are often exaggerated. The combination of these two arguments will undercut the ultimate impact to the case in order that the negative can win that their disadvantage outweighs it.

A Biocentrism or Deep Ecology Kritik. Biocentrism argues that human manipulation of the environment cannot solve environmental problems and Deep Ecology argues that environmental problems cannot be solved until problems in capitalism are confronted. Since most affirmatives will rely on the assumption that humans can address environmental problems and few, if any, will address the consumptive problems of capitalism, both of these kritiks will likely be very applicable no matter how otherwise "unprepared" the negative is.

Conclusion

There is a strong case to be made that the United States federal government should establish an ocean policy substantially increasing protection of marine natural resources. These resources are arguably threatened by existing activities and most scientists agree that health oceans are important to the survival of life on the planet. Affirmatives will be able to advance a variety of proposals for protecting these resources.

Although the affirmative will enter next year’s debates with a substantive advantage that is driven by the support in the literature for protecting oceans, and a strategic advantage driven by the simple fact that there will be many affirmatives to choose from, smart negatives do not leave themselves out at sea to drown in a sea of different kritiks. Smart negatives will develop generic negative strategies that turn on solvency arguments, appropriate generic disadvantages; and, most importantly, the word “protect” in the resolution. Negatives that are able to hold affirmatives to more limiting interpretations of this word will be able to force them to adopt more radical legal restrictions and counterplan with incentive-based approaches. These incentive-based counterplans and generic disadvantages that function as net-benefits will serve as the dry land that the negative will need to survive in the sea of affirmative cases that they are likely to confront during the 2003-4 season.

(Baechend continued to page 103)
LINCOLN-DOUGLAS DEBATE DIVISION: Samford is so committed to Lincoln-Douglas debate that it hosted the nation's first Lincoln-Douglas workshop. The program is designed for students who are entering into debate or transitioning to the varsity level. In addition to providing a primer on the fundamentals of moral philosophy, the L-D Institute also seeks to develop fundamental skills such as flowing, briefing and casing. The Lincoln-Douglas workshop is directed by national champion coach Pat Bailey (Homewood H.S., AL).

POLICY DEBATE DIVISION: The SSFI Policy debate program is designed for students in their first few years of debate. Many of the nation's largest programs start their students at Samford. At the end of the institute, each student will have participated in writing a case, a disadvantage, a critique, and taken part in at least eight practice debates. For students beyond their first year of debate, the curriculum focuses on research and negative strategies. First year students focus on learning how to flow and the fundamentals of debate. Policy debate labs are directed by professional coaches, including: Michael Janas, Ph.D., Ben Coulter, MA. Ben Osborne, MA and Ryan Galloway, Ph.D..

TEACHER'S INSTITUTE: Designed for new teachers or those that find themselves in charge of a program for the first time, Skip Coulter (Mountain Brook Jr. H.S.) will conduct a workshop on the basics of debate coaching. We can help orient you to the bewildering world of high school forensics. We will help strengthen your confidence as you enter the forensics classroom for the first time. The cost of the Teacher's Institute is $200.00.

COST: $950.00 plus $50.00 deposit for student divisions. This includes all room, board, tuition and group copying fees. Housing is in air conditioned, double-occupancy Samford dormitories. Classes are held on the Samford campus and dining is in the Samford cafeteria. There are no additional lab fees. Dormitories will be directed by William Tate (Montgomery Bell Academy, TN). Financial aid is available for students with demonstrated need.

Samford

experienced staff study in the spirit of excellence
intelligent students
The Stanford National Forensic Institute offers unique national caliber programs conducted by the Stanford Debate Society of Stanford University, a registered student organization of the Associated Students of Stanford University.

The SNFI Swing Lab Program is a preparatory program available for advanced policy debate students. Students must be varsity level and must have previously attended at least one rigorous debate institute during the summer of 2003. Faculty include some of the most respected debate educators, the curriculum is rigorous and carefully executed, and students receive more debates than any other program of similar quality. The Swing Lab Program has a phenomenal track record: the 1994 through 2002 graduates have cleared at most national tournaments, including Greemhill, St. Mark's, the Glenbrooks, Redlands, MBA, Lexington, Berkeley, Stanford, Emory and NFL, nationals. Swing lab participants have won 1st place recently at USC, Berkeley, MBA, Stanford, Lexington, and have twice won the Glenbrooks and the TOC.

The Swing Lab curriculum focuses on Expertly Critiqued Debates. Swing Lab scholars will participate in a rigorous series of at least a dozen practice debates beginning on the second day of the camp, with an emphasis on stop-and-go and rebuttal reread debates. The Swing Lab program provides intensive instruction in Research, Argument Construction, and Advanced Technique. The kernels of arguments which are produced by other institutes will be used as a starting point. These arguments will be used by program participants to construct entire detailed positions which will include second and third level extension blocks, new cases, disadvantages, kritiks, counterplans, and in-depth case negatives. Scholars will be immersed in Advanced Theory through special seminars that offer unique and novel views on a variety of issues including flat competition, intrinsicness, permutations, kritiks, presumption, extra-topicality, the nature of policy topics, and many other issues from the cutting edge of current theoretical discourse.

Students will have access to a wide variety of Outstanding Faculty. The Swing Lab will be directed by Jon Sharp, who taught the Swing Lab at Stanford for almost a decade. As a debater, Jon and his partner won the West Georgia and Harvard tournaments, and the Dartmouth Round Robin; also, Jon was top-speaker at Pittsburgh, Louisville and the University of Kansas Heart of America tournament. As a coach, Jon has qualified teams for the National Debate Tournament every year, while assistant coach at the State University of West Georgia, the squad appeared in the finals of CEDA Nationals an unprecedented three times running, with two National Championships. Jon has also been named three times to the student-selected panel of "Critics Of The Year." Presently, Jon is an assistant coach and doctoral student at the University of California.

Admissions to the Swing Lab are selective and solely at the discretion of the program directors.

Phone: 650-723-9086 • Web: www.snofi.org • Email: info@snofi.org
The Stanford National Forensic Institute offers unique national caliber programs conducted by the Stanford Debate Society of Stanford University, a registered student organization of the Associated Students of Stanford University.

The Three Week Program: The Three Week curriculum balances improving students' debate technique through expertly critiqued practice rounds, with in-depth discussion of debate theory and the topic for the year. Students will work with each other and the faculty on research and argument construction to create a full set of evidence available to all SNFI students. Students may also apply to the Swing Lab, a special program within the larger Three Week session. The Swing Lab program is designed to provide a continuation of participants' prior camp experience with an advanced peer group and the finest instructors. To be eligible to apply students must have previously attended at least one previous debate institute during the summer of 2003.

The Four Week Program: The Four Week Program is fully integrated with the Three Week Program, but adds an additional week, which focuses primarily on technique and practice rounds. Students are guaranteed to get 16 fully critiqued practice rounds in the final week, which effectively means that participants will have the equivalent of a semester or more of experience by the start of the school year! Four Week students are welcome to apply to the Swing Lab for the first three weeks of the camp.

Faculty: The SNFI faculty is composed of current and former competitors and coaches from successful programs all over the country. Initially confirmed staff for summer of 2003 include:

Dr. Anne Marie Todd - San Jose State  
Dave Arnett - UC Berkeley  
Jon Sharp - University of Southern California  
Sarah Holbrook - West Georgia  
Casey Kelly - Wake Forest University  
John Hines - University of North Texas  
Chris Maederlane - University of Southern California  
Erik Holland - University of Southern California  
Mikaelfogosz-Soltar - Macalester College  
Anna Armbrust - UC Berkeley  
Elliot Tarloff - Harvard University  
Beth Schueler - Whitman College  
Matt Fraser, Executive Director - Stanford University  
Robert Thomas, Academic Director - Stanford University

The institutions noted are where the relevant SNFI staff member works, debates or debated, and/or studies during the academic year, and are for identification purposes only.

In *History of Civilization in England*, Henry Buckle wrote that "Every new truth which has ever been propounded has for a time caused mischief; it has produced discomfort, and often unhappiness..." Turner Debate is a new truth for all our speech programs. The reasons for its creation are good and sound. But like all new truths it can produce discomfort as we all struggle to decide how to approach it, and that begins with the question of how to research and write cases.

*The full case should be written to consciously include power words and action phrases...*

Turner Debate cases should start with an acceptance of the time limits for each first speech, four minutes. This is a small amount of time and inherently limits how much can be contained in the affirmative and negative cases. The limited time should also be used to guide and focus research on each new topic. The debater's research must serve not just to identify the likely issues, but also to identify the two to four best arguments on each side.

Before researching each new topic the debater should list the key words in the topic and their most common synonyms. This list should be used for internet web search entries. As research produces results you should modify your key word list, usually by expanding it, to incorporate new ideas you had not thought of but the articles you find suggest.

After calling twenty to thirty good articles on the topic the debater will read, highlight and or mark quotes, examples, and good ideas in each article. These important bits of evidence and information, utilized in conjunction with the key word list, should suggest the best affirmative and negative arguments. To be doubly sure a meeting with the debate coach should compare ideas and cultivate an educational sharing that improves the final selection of central case ideas.

What types of ideas should a debater look for? What arguments are most likely to win a lay judge's ballot? Four categories are most likely to be successful: real world, philosophical, historic, and economic.

Real world arguments argue the way things are. They say that we may or may not like our world but if we are to succeed in it we have to accept what is before we can make it better. We might get angry, for example, at the fact that women often get paid less than men for the same work but anger solves nothing. Only by looking for the reasons for this bigotry can we take the first step towards solving it. Or we might pontificate against pollution. But unless we identify and learn about the economic realities that create pollution we can change those realities.

Philosophical case arguments identify the moral or ethical beliefs we hold most dear and use them to construct case issues. If you believe the audience will hold liberty as more important than justice or religion then liberty might form the center of a key case argument. If you were debating on increasing income taxes you might have a contention about the social contract or utilitarianism to give the judge the philosophical underpinnings to vote for your position.

Historical arguments are pragmatic. They are a special class of examples, which argue that since the past proves a certain approach to be good or had the judge should use that information to view the topic (which should be clearly analogous) as good or bad. The position reflects Santayana's axiomatic observation that "Those who cannot remember the past are condemned to repeat it". If the topic, for example, argued that the United States abandon deploying the anti-missle defense system the negative could talk about how weak British and French defenses encouraged Hitler's European invasions and attacks in 1938 and 1939. The affirmative could counter with the example that Iraqi development of new weapons systems, especially weapons of mass destruction, almost initiated a preemptive Persian Gulf War and invasion by the United States in 2002.

Economic arguments give the debater a facet, a mental approach, too often missing in many debate cases. With an economic approach the case, or one part of it, argues that costs should drive the judge's decision. If the topic calls for admitting a new member to NAFTA the affirmative could argue that more exports creates more...
jobs. The negative could counter with a study showing that the United States would actually lose some jobs, especially low-skilled jobs that the working poor are most in need of. If the topic was on the prison system the costs of crime verses crime control could be debated.

After the debater selects two to four central ideas she must next outline a case for each side, affirmative and negative. In structuring case ideas, whether they are called contentions or issues or observations or truths, the writer should use enthymematic constructions. An enthymeme is a logical argument where one or more of the premises is assumed or unstated. Since the speaker has only four minutes to make his or her case such arguments save time. A good enthymeme uses the beliefs of the judge to begin the argument. Francis Bacon explained it well in 1620: "For what a man had rather were true he more readily believes." If you can tap into what the judge wants to believe your job is easier.

Thus if you wanted to argue for a free press you might just say that press restrictions are unconstitutional, but not state why the constitution is good and deserves our support because almost all lay judges will grant that the United States' constitution should be supported. Or if you were negative on a topic calling for increased federal government funding of mass transit one contention might argue that more and larger federal programs are inherently bureaucratic and inefficient. Such an argument takes advantage of the beliefs of many Americans and thus reduces the evidence and time burden placed on the negative speaker. In the mass transit example most negative speakers would not feel obligated to cite studies which show that increased size means increased bureaucracy, nor would the speaker usually be criticized for omitting evidence that the federal government is especially prone to bureaucratic expansion with its resultant inertia. (In point of fact both these suppositions are debatable, but lay judge belief sometimes make it not worth the time to challenge the enthymeme or the implied assertion.)

When the outlines are done both partners should agree on their approaches. Then the coach should be consulted for her or his input. Only then should a verbatim transcript be typed.

The full case should be written to consciously include power words and action phrases. These rhetorical tools make the judge more likely to vote for the speaker's side in the debate. Power words are usually adjectives. They convey importance and or a need to act; they are words which command attention. It is good to argue that "rights should grow", it is more effective to argue "vital human rights must be aggressively increased". If something is vital we must have it, and a human right is more important that a right. An "aggressive increase" commands more attention than growth. Words have power, the Turner debater must learn to harness and use that power to win a lay judge to his side.

But there is a second power tool the debater should consider. The American culture shows a healthy respect for science, mathematics, and empirical research. Both affirmative and negative cases should use this audience predisposition to win judges to their side. How? By using numbers, statistics, statistical claims, and scientific related phrasing so that their case sounds empirically grounded. If the topic argues that airline pilots should be armed in the cockpit the affirmative could say, "terrorists will be deterred by a pilot with a gun". Or the affirmative could say, "empirical data gathered by El Al Airlines statistically proves that terrorists are deterred by armed pilots".

After the first drafts of the affirmative and negative cases are done they should be timed and practiced. Is the speech too long? Too short? Boring? Insufficiently evidenced? Lacking in persuasive examples? Is the wording powerful and persuasive without sacrificing thoughtful content? Winners will use these questions to critique their work and then rewrite or edit both cases.

Then the really good debater will write a second version that is half the length of the first version. Why? Because half the time your team will not be giving the first speech, you will lose the flip and go second (or win it and choose to go second). That means you will have already heard the other team's case and want to attack it. But if your case fills your full four minutes you cannot start your attack in your first speech. And you should start your attacks as early as possible; the longer a position or claim goes undenied the less likely the judge will reject it. The stronger or more important an opposition argument the more important that it be attacked early and often. So your first speech, if it is not the first speech in the debate, should leave ample time for attack and refutation.

When both versions are done the team's first speaker should practice an assertive delivery. Judges are influenced by how you say it every bit as much as by what you say. An assertive delivery has strong volume, frequent direct eye contact, and a gesture plus facial expression package that clearly emphasize important points. Your ethos (credibility as a speaker) is also improved by good grammar and appropriate advanced vocabulary.

At the end of case researching and writing your cases should be checked to be sure they reflect the following elements:

They comfortably fit the 4-minute time limit
They are both well researched
They include at least 3 out of 4 argument categories: real world, philosophy, historical, and economic analysis
You have used enthymemes
Your rhetoric uses power words, active words
Numbers and science are incorporated
You have 2 affirmative and 2 negative case versions to use when your side goes first, and when it speaks second
Your grammar and vocabulary add to your team ethos

TOWN, STATE, ZIP _______________________________
Knowledge, Experience, Integrity:
We demand all these from our staff. Shouldn't you demand them as well?

The Kentucky National Debate Institute is proud to announce our 2003 LD staff. We have never been content to hire only popular names or strong records, and this year is no exception. Once again, our staff combines proven debate skill with extensive teaching experience and superior academic qualifications. And, of course, all of our teachers share Kentucky's traditional commitment to clear, principled, educational debate. This year, six returning Kentucky instructors will welcome two new colleagues:

Jason Baldwin, M.A., compiled one of the finest records in the history of LD while debating for Vestavia Hills High School (AL). A graduate of Wheaton College and a former coach at Vestavia, he is currently a doctoral student in Philosophy at Notre Dame. His students have won the Glenbrooks, St. Mark's, Bronx, the MBA Round Robin, Emory, and the TOC.

Kevin Farrell, currently an English and History student at the University of Illinois, debated for Elk Grove High School (IL). He was the 2000 champion of the Catholic Forensic League, reached late elimination rounds at the Glenbrooks and NFL Nationals, and won numerous other awards. This summer will be his first teaching at Kentucky.

Kate Hamm, M.A., has taught English, Speech, Theater, and Debate at Iowa City-West High School (IA) for many years. She has coached numerous students to the late elimination rounds of most major national and Midwest-region tournaments. This summer she brings her expertise in rhetoric to Kentucky for a third consecutive year.

Jennifer Larson debated for Millard West High School (NE). She qualified three times for the TOC, won the 2002 TOC, and placed at many other major national tournaments. She is now an assistant coach for Edina High School (MN) while studying Math and Political Science at Creighton University. A former Kentucky student, she joins our staff for the first time this summer.

Peter Myers is currently a sophomore Math major at Princeton University. He graduated from Needham High School (MA), where he won the Manchester tournament three consecutive times and placed in many other major competitions. Peter is a former Kentucky student and will join us this summer for the third straight year.

Scott Robinson, Ph.D., debated at Duncanville High School (TX) and coached at Newman Smith (TX) while an undergraduate at the University of Texas at Dallas, where he is now an Assistant Professor of Political Science. Author of numerous Paradigm Research LD publications, his students have won almost every major national tournament.

Andrew Vaden, M.A., debated for Newman Smith High School (TX), winning the Greenhill and Gulf Coast Round Robins. Formerly an assistant coach for Valley High School (IA), he graduated from the University of Chicago, where he is now a doctoral student in the history of political thought. His students have won St. Mark's, the Glenbrooks Round Robin, and the TOC.

Tom Zimpleman, B.A., will graduate this spring with a degree in Philosophy from the University of Chicago. As a debater for Valley High School, he was the champion and top speaker of the TOC and winner of St. Mark's, the Glenbrooks Round Robin, and numerous other awards. This summer will be his third at Kentucky.

2003 INSTITUTE FELLOWS

DAVE ARNETT: Director of Debate, University of California Berkeley; Champion NDT Debater, University of Louisville; Institute Instructor, Stanford, 1998-01; Kentucky Institute Staff, 2002.

MARIE DZURIS: Director of Debate, Centerville High School; Institute Instructor, University of Michigan and Northwestern; Kentucky Institute Staff, 2002.

NERMIN HALL: Champion debater Emory University; 2000 Kentucky Fellow; Kentucky Institute Staff, 2001-02.

RUSTY HUBBARD: Runner-up 2002 NDT National Champion, University of Kentucky; Kentucky Institute Staff, 2002; Debate Coach, University of Kentucky, 2002-03.

CALUM MATHESON: Champion debater, Michigan State University; NDT first round 2001 and 2002; first place team & second place speaker, Northwestern, 2002; Kentucky Institute Staff, 2002.

DAN SHALOM: Champion Debater, University of California; TOC and NFL National Champion; 1999 Kentucky Institute Fellow; Kentucky Institute Staff 2001-02.

SummerDebate.com

THE NEXT GENERATION OF DEBATE EDUCATION is Partnering with

MARQUETTE UNIVERSITY

Three Great Ways to Use SummerDebate.com...

A Summer Debate Institute:
- Work with great lab leaders and America's finest faculty
- Learn the topic and debate theory
- Learn online at your convenience from June 1-August 15
- Extremely Affordable!!
  Policy $349
  LD $299 or LD (Topic only) $199

A Comprehensive Classroom Resource:
- Summer coach participants can use the program in which they participate as an online textbook for their own students.
- Program includes self-grading quizzes and assignments for each appropriate unit.
- Online text access for only $25 per student!

Summer School or Professional Development:
- High School Seniors can earn 3 optional credits through Marquette University ($1750 fee)
- Coaches participating in the institute can earn three optional continuing education units through Marquette University ($100 fee)
- Coaches can learn to teach the program as an online course to their own students during the school year!

VISIT WWW.SUMMERDEBATE.COM
Any of us who’ve lived through any part of the 20th century have witnessed quantum leaps in what could arguably be dubbed the “Century of Communication.” The previous one hundred years bore witness to the birth of the radio, television, computer, and finally, the Internet. As speech communication professionals, we must aid our students’ use of information technology, without letting them be dominated by these tools. The old adage rings true with new technology: a little time invested early will save a great deal in the long run.

**Rules Still Apply**

**The Internet allows people to instantaneously share information in ways that were previously never imagined.**

The wise character of Morpheus cites that the “dream world” in the science fiction film *The Matrix* is based on rules that dictate behavior. Our “infoculture” has advanced so quickly; we struggle to keep up, which results in the constant arbitrary manipulation of traditional rules of communication. I, for one, receive far too many e-mail messages fraught with lack of capitalization and punctuation (no, it is not e-e cummings poetry!). Does pressing the “shift” key really take that much more effort and time?

With lack of face-to-face contact, we also are more apt to write things in e-mail messages we would never say directly to another person, and unlike putting the angry letter in a drawer or circular file, it is so easy to just hit “send.” Once that’s done, it’s too late to turn back.

As educators, we need to help our students tame their use of technology and not let it dictate their behavior. Up until now, technology has developed at a pace that we could handle. Now, we need to catch up to it and (as the computer command says) “undo” some of the bad habits our students have developed.

**Show Me the Way**

Leading by example is a common pedagogy among forensics coaches. By delegating responsibilities to students, we help them mature into responsible young adults. In a world where students are busier than ever with a multitude of extra-curricular activities and jobs, they must balance their time carefully. Scheduling forensics practices has become increasingly difficult, so I have embraced information technology as a supplemented means to connect with students on a new level.

I call the phenomenon “e-coaching.”

One night, a student e-mailed me to ask for some advice on tweaking the introduction and transitions on her poetry program. After choosing from the options she offered, I thanked her for taking the initiative to contact me. The depth of thought in writing we were able to achieve in our e-mail exchange was much more valuable than the occasional telephone consultation I previously had with students.

Since that night four years ago, I have corresponded with students hundreds of times. Sometimes, it’s just a message to let me know that the student can’t make it to a meet – which catches me before I send in my registration and incur drop fees. E-mail enhances communication between me and my students, especially since I’m an “out-of-the-building” coach.

E-mail is also a great way for me to review my students’ early drafts of Student Congress legislation and original speeches. With legislation, I can make whatever minor formatting and grammatical adjustments are needed, and send it in with registration to tournaments. I then provide students with copies of both, and explain what I did to correct their mistakes. Students usually learn from these, making my job even easier thereafter. With original speeches, I can either e-mail back line-by-line comments or print a copy out and then meet with the student to discuss the draft. And, I always point out those e-e cummings capitalization and punctuation errors.

The forensics community, particularly debate, has recognized the Web as a vast source of evidence to assist in building credibility in persuasion. Search engines, reference sites and indexes continue to be refined. This same power can be harnessed in interpretation events. NFL rules obviously require literature to come from bound, published sources. So, while I discourage my students from pulling their pieces directly from the Internet, using the Web to search for literature – especially great works – is invaluable. Bartleby.com is one example of a site where students can often find complete works online, and then cross-reference by collection to find the bound version in the library.

**Getting Connected**

Many teams have their own Web site, where they post a calendar of meets, information about events and their rules, and links to other helpful Web sites. After
doing this for a number of years, our team has graduated to a "portal." Portals are sites on the Web that are both starting-point and information clearinghouse. One such portal—"Yahoo!"—was the Web's first comprehensive index, and continues to evolve in the services it offers.

At the beginning of this school year, I set up a Yahoo! Group for my team, which includes an e-mail message list, interactive calendar, file download area, link page, voting polls, and a chat facility. I post our tournaments, practices and other team events on the calendar, which can send automatic e-mail reminders to the students. In the file download area, I’ve posted event rules, permission slips, forms, meet invitations and maps, and instructional materials for students to read. I use the polls in more unconventional ways: as a means for students to sign up for various events and tasks. I set up the poll to log who votes for what, and I can then print out the results.

Yahoo! is far from perfect as it offers features that appeal to the widest possible audience. But it does allow me to make the group "private," which protects our students' and team's sensitive information. I was also able to designate my student officers as group "moderators," giving them the authority to delete inappropriate posts and help me maintain the site. After overcoming the necessity of creating a Yahoo! profile, reaction by students has been quite positive. Our mutual favorite feature is the ability to send mass e-mail messages with reminders to the team. While it took a handful of hours over a few weeks to initially set up, the benefits of the group pay great dividends in convenience in the long run.

Not Just for Members Only

The most significant problem with the use of the Internet to streamline team communication processes is the "Digital Divide," the gap between technology "haves" and "have-nots." While a great majority of my students have a computer at home, some of those do not have Internet access; most do not have high-speed broadband access; and a handful still do not have computers. That said, almost all of the students have been taught how to use the vast resources of the Web to their advantage, and are fairly resourceful in finding times and places to use computers, including school labs and the public library. Still, it is important to be sensitive to the Digital Divide and not rush to make Internet applications the de facto standard.

The Internet allows people to instantaneously share information in ways that were previously never imagined. As NFL coaches, we have already realized the streamlined miracle of recording students' merit points online, now using the back of outdated, tedious paper forms to print debate evidence on. But just as we must be cognizant of forensics as a means to our students' more successful futures and not an end in competition itself, we must remember that the Internet is a means to streamlining the process, but not itself the full process of communication. In the words of historian Arthur M. Schlesinger, Jr., "Science and Technology revolutionize our lives, but memory, tradition and myth frame our response" (New York Times Magazine, July 27, 1986).

(Adam J. Jacob is Director of Forensics at Rufus King High School in Milwaukee, WI and Webmaster for the Wisconsin Forensic Coaches' Association and Wisconsin Debate Coaches' Association. He was recently appointed Congress Recorder for the John C. Stennis National Student Congress.)

We don't mean to badger you or butter you up for assistance. We'd just like to know about the state of forensics in your state, And your favre-ite events (excuse us, that's the other NFL). Sorry for being cheesy, but now that we have your attention:

BE HEARD!

The Wisconsin Forensic Coaches' Association would like your input in a comprehensive survey to look at how rules and practices differ from state to state and what common threads and standards are apparent throughout the nation.

➢ Access the survey online at: www.wfcaforensics.org/survey

What's in it for me?

In the spirit of communication and fostering dialogue between states, we will be happy to share our findings with the entire forensics community.
The 24th Annual Marquette University Debate Institutes

Regent Program – July 26-August 9
Our flagship policy program, the Regent program has had alumni qualify to elimination rounds at every major national tournament, including the TOC, NFL, and NCFL. The program also has had outstanding success with novice and beginning debaters. Regent participants leave campus with every piece of evidence photocopied at MUDI from all policy debate programs!
Resident: $949 Commuter: $649

Scholastic Program – July 26-August 2
The more affordable counterpart to the Regent program, Scholastics will work with Regents during their week on campus. When they leave they receive all evidence compiled by all Scholastics and Regents up to the point of their departure.
Resident: $649 Commuter: $499

Lincoln-Douglas Program – July 26-August 3
Students get a balance of philosophy and practical skills. Our coaching staff has produced national circuit and state debate champions. Learn from a proven curriculum that has been modeled by other institutes.
Resident: $649 Commuter: $499

Debaters from our program have enjoyed great success including:
Wisconsin State Champions: Nov, JV, Varsity Champions of Harvard, East Grand Rapids, MI Elimination Rounds as NFL Nationals; CFL Nationals; TOC, KY; Glenbrooks, IL, Iowa Caucus; New Trier, IL; Greenhill, TX; Emory, GA; and many more!

Our 2003 Faculty Tentatively Includes:
Tom Noonan, Marquette Univ. High School
Doug Roudout, Univ. of Wisconsin-Oshkosh
Kevin Thom, Marquette Univ. High School
Alex Inman, Marquette University

Jessie Wachs, Madison West High School
David Jacobus, Fordham University
Tim Dale, Notre Dame University
Greg Miller, Baylor University

MUDI prides itself on its open educational philosophy. Every participant has access to all faculty members and each participant leaves with a complete set of evidence from all labs. We never exceed the 6:1 lab ratio and provide excellent dorm supervision.

Policy Debate:
June 22 through July 11, 2003

Lincoln-Douglas Debate:
June 29 through July 11, 2003

Novice Policy:
June 22 through July 4, 2003

THE CHAMPION CALIBER FACULTY INCLUDES:

Policy Instructors
Scotty Gottbreht, Northwestern University
Brian Lain, University of North Texas
Shawn Powers, University of Georgia
Johnny Prieur, University of North Texas
Alex Pritchard, Westwood High School
Steve Stein, Chattahoochee High School
Jason Sykes, Grapevine High School
Tara Tate, Colleyville Heritage High School
Bunny Tucker, University of Southern California

Lincoln Douglas Instructors
Peter Fan, Emory University
Dave Huston, Highland Park High School
Stephanie Oravetz, University of Texas
Ann Turpin, R.L Turner High School

Lincoln Douglas Research Assistants
Daryl Pinto, Highland Park High School
Frank Sun, University of Texas

JOIN THE SUMMER OF CHAMPIONS 2003!

On the Campus of The University of North Texas

Introducing

On the Campus
of
The University of North Texas

Speech Institute:
July 6—July 12, 2003

Why Attend
The Championship Speech Group?

- A champion caliber faculty
- A choice of two electives that deliver at least two scripts for dramatic and humorous interpretation, a complete file to begin the year in extemporaneous speaking, an oratory ready for competition, and poetry and prose selections ready for competition
- More individual attention than you ever imagined, with hours of critiqued practice.
- A closing institute showcase with extended critiques by the best judges in the country
- Videotaped practices for fine-tuning your speech
- Friendships from all over the country that will last a lifetime
- A summer to remember!

THE CHAMPION CALIBER FACULTY INCLUDES:

Instructors
Karen Gossett, Strickland School
Michael Harlan, Westlake High School
Demond Wilson, Spirit Productions
Dixie Waldo, Southlake Carroll High School

The Championship Speech Group has assembled a core faculty with years of successful coaching experience. National championships, state championships, and hundreds of individual tournament winners are what this staff has produced.

EXPERIENCE THE SUMMER OF CHAMPIONS 2003!

For more information, please visit us online at www.thechampionshipgroup.com OR email us at info@thechampionshipgroup.com
The most comprehensive Lincoln-Douglas resources available!

Perfection Learning is pleased to announce the acquisition of Clark Publishing. Together, our companies have served educators for over 125 years, and we look forward to offering you the great selection of Clark textbooks in forensics, speech, drama, and journalism.

Lincoln-Douglas Debate: Values in Conflict
2nd Edition ©2000
The basics of Lincoln-Douglas debate for novice and intermediate debaters
The most complete introduction available on preparing for and participating in the Lincoln-Douglas (L-D) debate format. Short, well-designed chapters move students through L-D analysis, case construction, and case defense procedures. Students learn about:
- L-D theory
- The difference between L-D debate and policy debate
- How to choose and research value topics
- Preparing cases
- Developing rebuttal strategies
- Improving delivery skills
A Teacher’s Manual features activities, additional L-D topics, bulletin quizzes and answer keys, and more!

Teaching & Coaching Lincoln-Douglas Debate
©1998
Resources for teaching value debate
Practical, everyday materials help teachers build and sharpen their instructional practices. This book contains something for every instructor, regardless of experience, including:
- The basics of L-D debate
- A grounding in theory
- Development and construction of value debate cases
- Activities and lectures on three levels
- Options for unit length
- Improvement of delivery

Philosophy in Practice: Understanding Value Debate
©1996
Philosophical theories and concepts in understandable terms
This book is an invaluable resource for value debate preparation! Students can use authoritative insight from philosophers such as Hobbes, Locke, Rousseau, Kant, Nietzsche, Aristotle, and others. The material is presented in an easy-to-use format and is ideal for novice, intermediate, or advanced debaters. Chapters on L-D debate theory are also included.

It's only three minutes per side -- six minutes total in a 32 minute Lincoln-Douglas debate. Yet in this brief time period, much acrimony can occur and many controversies can arise -- some necessary, some irrelevant, some distracting and even unpleasant. Nevertheless, most coaches, judges and debaters would probably agree that cross examination affords a unique opportunity for each side to set up or even score memorable and decisive points.

Unfortunately, as implied in the previous para-

Coaches, debaters and judges all agree that cross examination can be the liveliest and most entertaining part of a debate.....as long as both sides maintain a sense of purpose -- and a sense of humor!

graph, cross ex is also frequently abused or poorly handled. Some students preface their line of questions by DEMANDING strictly "Yes" or "No" answers to all questions, no matter how complex they may turn out to be. Such debates seem to forget that all students in the U.S. have basic First Amendment rights, and very few are willing to be stripped of these rights by a debate opponent (more on this subject later). Other debaters ask questions that seem primarily to be used for shock value to unsettle the opponent. In one round last year a male (debating the Negative side of "The public's right to know ought to be balanced over a candidate's right to privacy") asked his female opponent if she was a virgin, and if she bathed frequently. The reader may be relieved to know that this debater failed to impress the judge with this tactic and did not win the debate. However, it illustrates the degree of rudeness and poor decorum that can occur in the free atmosphere of cross examination.

With the above travesties in mind, some coaches and debaters may ask themselves if anything substantive can be accomplished in such a short period of time. In preparation for this article, I made and administered a questionnaire to survey twenty-three of the participants (coaches, judges and debaters) at our February county league tournament. From this survey, the overwhelming consensus was that cross examination is a one of a kind learning experience and a crucial state in the Lincoln-Douglas debate format.

The survey questionnaire was an attempt to explore some of the perennial controversies that surround cross ex. First and foremost among these is the demand often made by the examiner (the debater doing the asking) that all questions be answered "yes" or "no" by the examinee (the opponent being questioned). A small majority of those surveyed felt that this is a legitimate demand, since the examiner has the right and responsibility to control the cross ex period when doing the asking. However, all but one of the respondents in the survey went on to state (when answering question 4) that it is also acceptable and in many cases desirable for the examinee to attempt to give more elaborate answers than a mere yes or no. As one judge put it, the examinee has the right to ignore the request for yes/no answers; another judge said that it is the examinee's duty to "sneak in more information to support their case, just as the other side should try to stop them." Most of the respondents went on to state that the key here is for the examinee to elaborate briefly beyond the "mandated" yes/no limit, and to do so courteously and with relevant information (i.e., NOT with the intent to filibuster and take up the opponent's valuable time for questioning). Thus the other extreme -- students giving long-winded vacuous responses just to rob the opponent of time -- was seen, especially by the judges, as equally obnoxious as the dictatorial demand for yes/no responses.

The next two questions in the survey deal with the strategies used effectively or ineffectively by debaters to cut off filibustering and to regain control of cross ex. As one judge put it in her response to these questions, the art of debate includes "masterfully saying: Thank you and then proceeding with one's own questions." The method for ending wordy responses by the opponent endorsed by the majority of respondents was

1) Say "Thank you."
2) Say "I have another question" or "On to my next question" and
3) Ask the next question.

Even opponents who ignore 1 and 2 will realize that they are going to appear rude and inconsiderate if they refuse to answer the next question that has just been asked.
we seen a debater rattle off a list of questions, get some interesting and potentially useful responses, and then fail to use them in the rebuttal speeches that follow? The beauty of this situation is that a good judge will explain on the ballot how the debater could have used responses given by the opponent in the rebuttal speeches that followed, but failed to do so because the debater either did not listen to the opponent’s answers, or neglected to note the responses on the sheet of cross ex questions. Ideally, the judge’s skill in listening will teach the debater to listen better and take brief notes in future rounds.

Coaches, debaters and judges all agree that cross examination can be the liveliest and most entertaining part of a debate. The examiner wants quick yes/no answers; the examinee wants to elaborate to give speech—length responses to take over the three minute period. Both aims are legitimate. Ironically, these two contradictory agendas are exactly what make the exchange lively—as long as both sides maintain a sense of purpose—and a sense of humor!

I would like to acknowledge the specific contributions of the following, whose survey responses were quoted directly or indirectly in this article: Jon Vrinten debate coach at Bethesda-Chevy Chase high School; Judy Rothstein, coach at Paint Branch HS; Valerie Maunwaring, Naomi Vlessing, Stefanie Weldon, Jay Heapner, Chuck Rideout, Mike Hankinson, Nancy Russo and Donna McDowell, Montgomery County Debate League judges; and Amanda Murphy, John Rawlins, Sarah Woodward, and Oliva Zamaray, senior debaters.

(William [Rusty] McCrady is Forensics and debate coach at Walter Johnson High School in Maryland. Also, Rusty is President of the Montgomery County Debate League.)

---

**QUESTIONNAIRE ABOUT CROSS EXAMINATION**

*Note: Questionnaire used in preparation of this article.*

1. What do you see as the purpose of cross examination in Lincoln-Douglas debate?

2. Do you think that most debaters use their cross ex time effectively?

3. Is it acceptable for a debater to demand ONLY yes or no responses to a list of questions? (Explain or elaborate as much as you desire.)

4. Is it acceptable for the opponent in such a case to attempt to give more than yes or no responses as he/she may feel necessary? (Explain or elaborate if you so desire.)

5. Have you witnessed any rudeness or inappropriate verbal behavior during cross examination? (Please elaborate, without naming names or schools.)

6. What do you see as an acceptable way of cutting off an opponent who is giving a lengthy answer to a cross ex question?

7. What do you think debaters in general could do to improve their performance in cross ex?
BAYLOR UNIVERSITY
A tradition of excellence in high school forensics education for over 60 years

❄ Outstanding Faculty at every level

The Baylor faculty have been successful coaches at the high school and/or Intercollegiate level. The focus is on teaching students the skills they need to become better debaters and to succeed in their region or at the national level. The student-teacher ratio is maintained at 10 to one in order to facilitate as much individual instruction as possible.

❄ Extensive library resources for all of our students

Students have access to the physical and electronic holdings of the Baylor University libraries. In addition, a reserve collection created just for our workshop, will assist students in preparing for their upcoming season.

❄ Challenging curriculum for every experience level

For **policy debaters** we emphasize the skills of refutation, extensive analysis of the topic and contemporary debate theory, briefs specific to the topic and practice debates and speeches.

For **LD debaters** we emphasize instruction in analyzing values and value propositions, preparation for the upcoming possible topics, practice speeches and debates, as well as instruction in LD practice and strategy.

For **Turner debaters** we emphasize current events research, crossfire cross examination skills, argumentation and persuasion skills, and audience analysis.

For **teachers** we emphasize the information necessary to administer a speech program and to effectively prepare your students.

We offer instruction at the novice, junior varsity and varsity level.

---

**ENROLLMENT IS LIMITED TO THE FIRST 200 STUDENTS. APPLY EARLY!**

OF ENDINGS AND BEGINNINGS IN FORENSICS
by
John J. Bueftler

The Farewell Line is a tradition at our school. Immediately after the conclusion of our graduation exercises, the faculty line up on the path leading to our track and, on their way to the gym where we have refreshments set up, the just-graduated seniors pass along the line of faculty shaking hands with each in turn. Last June, I stood in that line of faculty awaiting the arrival of Tom, a very special student for me. He was a student whom I had coached for four years in original oratory and who had had considerable success on the national level. But there had been one great disappointment this year - by virtue of an unexpected judging decision, he had not qualified for NFL nationals. Today, in contrast, on his graduation day, he had achieved his greatest triumph. He was the class valedictorian and, bringing all of his forensic experience to bear on this once in a lifetime occasion, he had delivered the only valedictory in the history of our school to be accorded a standing ovation. As I stood waiting for him to reach me in the line, I thought back to two earlier occasions during the year that for me, and I think for all coaches, bring into focus just what forensics is all about and why we all do it.

The first of the occasions was the "great disappointment." March, NFL District qualifiers. Tom arrived at the tournament with every expectation of success. So far, he had had an excellent year - especially considering the strength of the competition in our district. With two or three other outstanding orators, he had consistently placed high or won at all of the local and regional tournaments. Finals at Emory, semi-finals at Harvard, neither he nor I had any doubt that he would be one of the two qualifiers from our district for NFL nationals. The early rounds bore out our expectation and, as we found out later, he advanced to finals in first place. But at the awards assembly, unbelievably, he was announced in third place. Of course, we all kept on our poker faces and congratulated the winners, but the disappointment was devastating. When the assembly was over and the coaches and students were dispersing back to their schools and homes, the poker faces broke. I looked at Tom and he was stricken. Tears welled up in his eyes as he said, over and over, "I don't understand what happened. I don't understand what happened." We looked at the ballots and saw that in the final round Tom had probably not done his best. No first places, ranks mostly from 2 to 4. Under normal circumstances his lead going into the round was large enough that that would not have mattered - except for the proverbial one judge who seemed particularly off-put by his presentation and ranked him last, seventh, in the round. This was enough to put him into third place by one rank. So here I was, in the library of LaSalle High School, with a student who was practically another son to me, as he looked at me for answers. "I just don't even feel like going on," he said. "This is everything I've worked for. To go to NFL nationals in my senior year. Everything. It doesn't feel like there's any point in going on." In my heart I knew that this was not right. That this was just his disappointment and frustration talking, but I also didn't know what else to say. So like any good forensic coach, I just started talking. What came out was something that I have believed since I began coaching but which I really had never put into words - at least not these words - before. "Tom," I said, "I understand how you feel. I can't imagine why this happened. But you have to understand that this is not everything that you have worked for. This is just forensics. It's great, but it's not everything you've worked for. You don't know yet what you've worked for. You've told me you want to be a lawyer. Well, someday, when you are standing in a courtroom before a judge or jury and you are making a plea to save the life of an innocent person or to achieve justice for some poor person, that will be what you have worked for. When you save that life or get that justice, and you do it with your eloquence and your passion and your conviction, that will be why you have done forensics for these past four years. So don't think that everything that you have worked for has gone for nothing. Trust me, what you've
worked for hasn’t even happened yet.”

We got through that traumatic experience and Tom went on to have an otherwise very successful conclusion to his senior year. He won our local CFL championship, our State championship, placed third in CFL nationals. The disappointment of NFL districts receded into the background, but was never, of course, completely forgotten. We moved forward toward what would be, for me and for Tom, the second event that would put forensics into perspective for us.

As the end of the year approached at Holy Ghost Prep, we turned our attention to selecting the valedictorian. At our school, students over a certain GPA are invited to submit speeches to the Principal. After he removes the students’ names and makes a note of who wrote which speech, he turns copies of them over to the members of the Honors Committee. After the speech is chosen, the student is sent to me to polish it and work on delivery. Tom’s speech was the one chosen and, of course, I was thrilled. This meant that he and I would have one last chance to work on a speech together. In Tom’s case, though, after four years in forensics, not too much polishing was needed in either area. His speech was superb and I knew he would deliver it with passion and panache.

The day before graduation, after the practice which made sure that everyone knew where to go, how to stand and where to look so the photographer could get good pictures, Tom and I were standing alone under the huge tent which would house the commencement exercises the following morning. We had waited behind for everyone else to leave so that he could practice the speech and get a feel for the microphone and the environment. We talked about the usual things – sound system, wind, etc. – and then, as he turned to go up to the lectern to begin, he stopped and turned back and said, “Well, Mr. B., this is the end. It’s all over after tomorrow.”

“Yes, sir,” I said, with a nostalgic smile, “this is it. It’s all done. But it’s been a great run.” As soon as I said this, though, something else struck me and I said, “You know what – it’s not done. It’s not really the end. For the last four years you’ve gone out on weekends to stand in rooms filled with other competitors to be judged by coaches or parents or whomever. When you think about it, that’s really an artificial situation. Tomorrow is real situation. Tomorrow, you will be delivering the first real speech of your life. No judges, no competition. Just people listening to you and your chance to communicate your thoughts and feelings, the thoughts and feelings of your classmates. People are looking to you to do this. So, if you think about it, Tom, this isn’t the end. Remember, when you saw me after NFL districts, that you didn’t know why you should go on because that was everything you had worked for, and I said that it wasn’t, that what you had worked for hadn’t happened yet. Well, tomorrow is the beginning of what you’ve worked for. It’s starting to happen. It’s the beginning of your real career as a communicator.”

So there I was, graduation morning, standing in the Farewell Line as Tom reached me. I had tears in my eyes and could hardly talk as I gave him a long hug and told him how proud I was of him and that he was the only student ever to receive a standing ovation for his valedictory. In the succeeding months, I’ve thought of this often and of all the other young men and women who thought that their forensic careers ended in June, of coaches like myself, who have used to wipe away tears, give hugs of reassurance and pep talks to go out and do it all again the following week. Why do we do it? Of course, we enjoy the awards and the recognition and we work for them, but the majority of the thousands of young men and women in forensics do not become national champions or even district champions or state champions. They do, however, after college, after year, write speeches, cut and memorize literature, research information, build cases and practice, practice, practice – to try to win, of course, but I also believe that in the back of their minds, and ours as coaches, there is the constant presence of the conviction that while winning is fun, it’s not the whole thing. Somehow we know, but don’t often put into words the fact that this wonderful artificiality that is forensics is not an end and when graduation comes, it’s not the end. Rather we know in our hearts, as Tom and I learned this year, the real reasons why we do forensics has happened yet. And when forensics is all over, it’s really just the beginning.

(John J. Buettler has been teaching Latin and Psychology and coaching forensics at Holy Ghost Prep School, (PA) for the past 34 years. He has coached numerous State and National champions and finalists. John’s four sons are distinguished NFL members and CFL competitors in oratory and interpretation events. During the summer John Buettler is head of the Original Oratory division of the Florida Forensic Institute.)

---

2003

LINCOLN FINANCIAL GROUP/NFL NATIONAL TOURNAMENT

JUNE 15 - 20, 2003

GEORGIA STATE UNIVERSITY
ATLANTA, GEORGIA
Stanford National Forensic Institute

Individual Events

The SNI Individual Events program offers a comprehensive program which accounts for regional differences in style, content, and judging. Students will have the opportunity to work with coaches and national champions from around the nation. The Institute is designed to provide a strong technical foundation in an enjoyable atmosphere, students at all levels of experience will be accommodated.

Dramatic Interpretation...Humorous Interpretation
Oratory...Extemporaneous...Impromptu...Expository
Thematic Interpretation...Prose...Poetry...Duo Interpretation

The Two Track System of Placement allows advanced students to focus on specific events at an accelerated pace, while also ensuring that the beginning to intermediate level students advance at a more relaxed pace while participating in and learning about a variety of different events. This ensures that upper level competitors leave camp prepared to immediately step into high level tournament competition. Seminars are designed to cater directly to areas of student interest. Workshops are provided to instruct new competitors in basic speaking techniques, and novice workshops meet the needs of both new competitors and those solely interested in improving general speaking skills without the intention of later competition.

Team Instruction provides students who are involved in a recently formed Forensics team basic techniques on student teaching. We teach students of all levels how to teach themselves during the course of the year to maximize their competitive experience and success. The research facilities unique to the Stanford campus provide an excellent resource for the creation of a comprehensive script library. Institute staff has on hand hundreds of scripts both to assist student, and to serve as sample material. Resource packets are provided specifically for this group.
The 2003 University of Texas National Institute in Forensics

Why learn to debate at the 2003 UTNIF?

Because we have the best libraries for the 2003-2004 high school debate topic,

Resolved: That the United States federal government should establish an ocean policy substantially increasing protection of marine natural resources. We have evidence that other schools only dream about. In the Life Science Library, the Marine Science Library, the Walter Geology Library and the Petroleum Engineering Library you will find the most comprehensive listing of books, government reports and periodicals dedicated to unpacking the contours of ocean policy.

Because we have the most topic-experienced faculty.

Which university compiled a full year’s worth of elimination-round-qualifying-debate on the Double-Hull Tankers affirmative on the environment topic? Which university brought teams to the National Debate Tournament because of its success running the Oil Spill Response affirmative? Which university earned a first round invitation to the NDT running their Ban Driftnets affirmative? The answer to all of these is the University of Texas. You will access to more than just evidence at the UTNIF. You will have access to experienced debating and coaching no other camp can provide.

Because we are more than evidence production.

At other camps you can collect evidence but at the UTNIF we do more than research, we teach you how to use it. We will provide students with evidence and the sense to understand how to deploy it strategically in a debate round. Students will be handed two affirmatives and two negative case strategies upon arrival. These balanced debates will be researched by directors Jarius Grove and Brian McBride to enable students to debate as early as the first day. One affirmative will be a policy debate and the other will be a critical debate. Students will be given an affirmative and a negative strategy which may comprise a counterplan and various net benefits, case arguments and a DA or critical arguments which addresses the affirmative’s solvency claim. We do this so that we can understand student experience level prior to research and to provide a model early on for what we mean by strategy. Additionally, arguments produced and debated at the UTNIF will be balanced. On the negative side, affirmatives researched will have various negative strategies that students can choose and practice. On the affirmative, negative counterparts, kritiks, DAs, and topicality arguments will have arguments designed to deepen the debate on the issue. We believe students learn to debate through competitive equity and as such we will strive to maximize this environment as much as possible. We want students not to stumble into debating hoping something they say will stick, we want them to understand how all of their arguments work together and where they should be in the 2AR and 3AR.

Because our camps are the most affordable on the planet.

Check it out for yourself! You will not find better quality for this price anywhere. We keep our prices low because we know what it’s like to sell off your comic book collection to go to camp.

Because nowhere else will students receive such top-notch kritik instruction.

Learn from the best innovators and agitators in the critical business. The UTNIF has assembled one of the best kritik staffs in the country. David Breshers, Jarius Grove, Kevin Kuswa, Brian McBride, and Joel Rollins, just to name a few, will help you to retain a working knowledge of critical thinking’s place in debate, making often obtuse philosophical ideas palatable and strategically deployable in any debate context. While other institutes will fill their kritik positions by hiring a couple of current “kritik-friendly debaters” to teach the whole camp, every lab and lab instructor at the UTNIF is highly qualified in both critical and policy strategies. Our instructors were there at the very beginning, struggling to maneuver critical practice within the confines of policy debate. Our staff doesn’t simply teach kritik debating, they helped bring it to life.

Because our staff is dedicated.

At the UTNIF we believe that students learn best through instruction with lab leaders. Unlike other institutes, our teaching faculty will spend time with students all day. Lab leaders will not be phased in after hours of droning lectures. Check it out for yourself; even the most reputable institutes pride themselves on the fact that lab leader/student contact exists for maybe 5 hours of the day. At the UTNIF, lectures are kept at a minimum and their purpose is to inform students about the topic not to cause lab leaders from student exposure.

Plan One: June 29th – July 11th: $1999
Plan Two: July 15th – August 6th: $1699
Supersession: June 23rd – July 11th: $2999

This year we also will be offering a scholars program for experienced debaters (acceptance by application only) and novice instruction in both sessions (at a discounted price). Check out our website for more information: http://www.utexas.edu/oc/cms/utnif/
What Do All of These People Have in Common?

California National Debate Institute
2003 Policy Debate Camps
at the University of California, Berkeley

Tentative Dates & Prices

Policy Debate
2 Week Session: June 14 - June 29, $1525
1 Week Session: June 22 - June 29, $775

Lincoln Douglas Debate
2 Week Session: June 14 - June 29, $1525
1 Week Session: June 14 - June 21, $775

"This camp is by far the best I have attended. The staff and intensity are unparalleled anywhere else."
- 2002 CNDI Participant

The California National Debate Institute is a national caliber two-week summer forensics program located in Berkeley, California. The CNDI provides serious debate students with the opportunity to interact with some of the finest and most renowned forensics instructors in the nation at an incomparable cost for a program of this nature, quality, and location.

Two Week Session: This two week policy debate program offers intensive instruction for students of all levels of experience and skill. Students will receive topic and theory lectures, numerous critiqued debates with rebuttal reworks, small-group seminars, and access to the best evidence researched at other NFC camps. Strictly limited lab size ensures personal attention from an elite staff who have been carefully selected for both their knowledge of debate and their multiple years of experience as lab-leaders.

One Week Program: This special CNDI program is designed to be a shortened version of the regular CNDI curriculum. The lab features in-depth topic analysis, extensive explorations of debate theory, affirmative and negative argument construction, practice rounds, seminars, and lectures. This lab will give participants a strategic perspective on researching the topic as well as the theoretical clout to put it all into action.

Faculty: The CNDI is directed by Robert Thomas. Robert has coached successful teams at both the high school and college level, and has taught at or directed over 40 summer institutes. He is currently the NDT coach at Stanford University. Other initially confirmed staff include Dave Arnett of UC Berkeley, Sarah Holbrook of the State University of West Georgia, and Judy Butler, of Georgia State.

Mail: 1675 Shattuck Avenue #305, Berkeley, CA 94709 • Phone: 510-548-4800

To Exist or Not – that is the Question?

by

Paul Harens

Policy Debate is dying. Contrary to what Ms. Peters thinks there is a problem and something needs to be done. Yes there are lots of different events, but the primary event that made the NFL what it is today is Policy Debate. However, before I get yelled at, jumped, or mugged realize several things:

1. I do believe in this activity or I would have left it a long time ago (29½ years). I have coached or I am coaching: Debate, Interp, Oratory, Exttemp, and Student Congress.

..."Policy Debate is worth saving. It is the basis of thinking and argumentation that students have and/or could use for the rest of their lives"...

2. My novice debaters do the research - they do the work...

3. I teach basics and never even talk theory, speed or spread (they learn that from other places).

This new event is scaring many people and justifiably so. We have Ted Turner Controversy Debate because Policy Debate has evolved into something that is not real world or real communication. Some of us are dinosaurs and have watched the evolution (or de-evolution) of Policy Debate. Be honest. Policy Debate is close to its last breath. Schools are dropping programs, numbers are down, budgets are getting cut, and schools are not starting policy programs. There are NFL districts that don’t even offer Policy Debate at their qualifying tournament.

The reason for this sad state is that we, the coaches (and/or judges), have allowed it to happen. We allow the speed, spread, weird arguments, theory arguments, no case arguments, effects topically, squinelly cases, critiques, and the lack of communication/explanation of the real issues within the topic (to name a few).

A clear decision needed to be made on whether Policy Debate is worth saving. I think it is. It is the basis of thinking and argumentation that students have and/or could use for the rest of their lives (but not the way it is now). If an educated person cannot walk into a policy round and understand what is going on, it must change or die.

There are a number of different styles (cliques – as one author has put it) of Policy Debate. To me they are: small school, large school, state, regional-states, and national circuit. The big question is: How long can any one of the cliques survive if others die? With the number of schools/states/NFL districts that are dropping Policy Debate we need to do something to change that trend.

So, what do we do? Several questions (and editorial remarks) need to be answered if we want policy debate to continue.

1. Will we continue to accept cases that skirt the resolution or not debate the resolution?

When someone takes a small minute portion of the topic (i.e. fetal alcohol – hermaphrodites – transgender prisoners – tele-pharmaceuticals) that can really debate and they win we have a problem. What’s wrong with just debating the topic?

2. Will we continue to select resolutions that require novice topic limits?

Look at the resolutions that are offered for debate. They are so broad and unfocused we have the weird stuff coming out of the woodwork. We are required to do a foreign topic every third year. It has been said that we need these resolutions for the education of debaters. What happens when we have no debaters to educate because of the resolutions?

3. Will we continue to ignore the basics of debate?

Paper is being wasted by not flowing a debate. The first CX question is usually, “Can I have a copy of the first AC?” Then everything is off case arguments. You can watch negative teams and about half the time they don’t even flow. What ever happened to listening and flowing?

4. How fast will we let them go?

Right now we have asthmatic delivery, no eye contact, no real analysis or explanation of the evidence. Speed kills the activity and that is the reality of things. Any speech that is given should be a speech to convince. If we can’t understand you and you don’t explain how can you convince anyone of anything or why should you win?

CELEBRATING 50 YEARS
The National Debate Institute - D.C. offers an exciting opportunity for students to attend a national caliber debate institute at a cost competitive with the fees of most regional camps. The NDI-DC has a hand-picked staff of the best instructors in the nation, and the program curricula have been carefully developed and successfully implemented over the last 10 years.

30-ROUND POLICY DEBATE PROGRAM: No other program in the country offers students the opportunity to improve as quickly and extensively: each student is guaranteed the opportunity for 30 full-length debates with extensive post-round critiques. Such concentrated and directed practice allows students to make improvements in argumentative sophistication and technical proficiency that normally take a semester or longer. The staff is carefully selected to provide a balance between high school coaches, assistant coaches, and current college debaters, and the 4:1 student/staff ratio ensures that each student will receive individualized feedback from every instructor.

POLICY DEBATE IMMERSION PROGRAM: This program features an accelerated lab with a focus on teaching the skills and concepts needed to make the transition to higher-level debate. The curriculum features in-depth topic analysis, advanced theory seminars, rigorous technique drills, intensive evidence production, and a special focus on in-round decision-making. The lab will provide a comprehensive blueprint of advanced debate strategy, preparation, and execution, allowing students to model their approach to debate on that of two extraordinary debaters.

TENTATIVE 2003 DATES & PRICES
JULY 7 - JULY 21, $1525

The National Debate Institute - D.C. offers an exciting opportunity for students to attend a national caliber debate institute at a cost competitive with the fees of most regional camps. The NDIDC has a hand-picked staff of the best instructors in the nation, and the program curricula have been carefully developed and successfully implemented over the last 10 years.

The NDIDC Lincoln Douglas Program offers an intensive curriculum, taught by an experienced faculty of former championship debaters and veteran coaches who have led students to late elimination rounds at competitive national tournaments. The programs are carefully planned to provide balance between philosophical/theoretical instruction and rhetorical practice through speech seminars and practice debates. The curriculum is also structured to include both concepts from moral and political philosophy that are directly relevant to the year's topics as well as introductions to more general material that thoroughly ground the students' preparation in the history of ideas. Plus, the faculty's extensive teaching experience enables them to adjust to the needs and interests of students of a wide range of styles and abilities.

The Stanford National Forensic Institute offers a unique national-caliber program conducted by the Stanford Debate Society of Stanford University, a registered student organization of the Associated Students of Stanford University.

Two Week Program: This program allows students of LD or Events to spend two weeks studying and practicing with other gifted students from throughout the nation. The LD camp provides students with 14 expertly critiqued practice debates. One of the finest LD faculties in the nation will teach students both fundamentals and advanced techniques in a rigorous, carefully structured environment.

Three Week Program: The outstanding highlight of this program will be an extra 20 fully critiqued practice rounds. Students attending other camps during the summer can avail themselves of this one-week experience or students in the regular camp can extend their stay for a total of 34 practice rounds between the two programs, for a total of three intensive weeks.

Stanford Advanced Seminar: An exclusive SNFI workshop dedicated to in-depth issue examination. This seminar will be taught by some of the top instructors from the SNFI staff. Ideal for students with previous institute experience; open to all experienced students returning to SNFI for a second or third year, and others by application.

SNFI Regents: The Regents Program is intended for graduating seniors and college or university students interested in working at one of the nation's most prestigious speech and debate institutes. Regents' time is divided between administrative tasks and working in labs. Regents are provided room, board, and a compensatory stipend. Please direct all application inquiries or questions to SNFIRegents@asu.com

Faculty: The SNFI LD faculty is composed of coaches and former competitors who have achieved the highest levels of success in the activity. This year's faculty will include: Dr. Michael Major, Director; Jon Gegenheimer, Assistant Director; Jonathan Alston, Newark Science High School; Michael Aron, New Orleans Jesuit High School; Cherian Koshy, Apple Valley High School; Richard Re, New Orleans Jesuit High School; Michael Ososky, Stanford University; Adam Lauridesen, Bellarmine College Prep; Hetal Dosu, Emory University; Noah Grabowitz, Stanford University; Gigi Garmendia, Harvard College; Matt Baelus, Trinity Prep; John Lynch, Ohio State University; and others. The institutions noted are where the relevant SNFI staff member works, debates or debated, or has studies during the academic year, and are for identification purposes only.

SOME DO NOT’S FOR ORATORICAL CLARITY
by Wayne C. Mannebach

PART FOUR:
CLOUDY IMAGERY, VAGUE PRONOUNS, IMPROPER SUBORDINATION, AND WEAK PARALLELISM

LEARN WHAT NOT TO DO!
As stated in Part One of this series treating oratorical clarity (See Rostrum, March 2002, p. 43), perhaps the most practical way to improve oratorical effectiveness is to emphasize what not to do. In other words, the orator should focus on those features which compete with clarity. Like the first three, this article does not treat every obstacle to clear thought, for such endeavor would be futile for any person. Instead, this article covers four of the most notorious obstacles and sufficiently warns the orator to examine carefully language usage. The author

assumes from his teaching and coaching experience that, if the orator knows what should not be done, he or she will employ what should be done. This article stresses cloudy imagery, vague pronouns, improper subordination, and weak parallelism.

DON'T USE CLOUDY IMAGERY!
Imagery traditionally means the ability of words to evoke mental pictures. To evoke clear mental pictures is a trait which all orators should master, but unfortunately some fail to do so. Some orators are ineffective because they employ imagery that is incongruous with nature. For instance, a high school student referred to "an obscure climate of the human intellect." What clear thought can an audience receive from such words? What is an obscure climate of the human intellect? In fact, what is any climate of the mind? Another high school student informed her hearers that "abstinence is healthy if practiced in moderation." Huh? How does one abstain by taking only a small portion?

A college student bragged that his state "has an iron chain of mountains running through her center, which God placed there to milk the clouds and to be the source of her silver rivers." What corresponds to a chain of mountains drawing milk from the clouds? Such imagery taxes the audience to discover resemblances which fail to exist.

In a keynote address to freshmen during orientation week, a college professor alluded to "Cadmus, Agenor, and Europa"; to "Lesbian and Chian wines"; and to "the lord of the Apsilian swine and the comatose bellies of the scurvy." The professor employed imagery that only people familiar with the classics could interpret. Many of the professor's audience were not so trained in high school, so communication broke down.

Other orators hamper communication by employing highly emotional but vague adjectives. For example, what homogeneous image can an audience achieve from such words as awful, elegant, fantastic, fabulous, glorious, lovely, magnificent, sensational, stupendous, and wonderful? Yet these words appear frequently in contemporary discourse.

Confusion also can come from such commonly used words as bald, overweight, heavy, large, old, middle-aged, young, short, tall, thin, and wide. For instance, what does it mean to say that someone is bald? Does a bald man lack hair all over his head? Just on the sides? Just in front or in back? Is a heavy person 200 pounds? 300 pounds? A person who is 120 pounds could be heavy for the balancing bar in gymnastics; a person who is 260 pounds could be small for defensive tackle in professional football; and a person who is 350 pounds could be small in sumo wrestling. Someone who is 35 could be old for some professional sports, yet an 80-year-old parachutist could be young in attitude and health.

Other commonly used, but often unnecessarily vague, words are many, most, few, several, lots, some, least, and the like. Students of oratory should not abandon these words completely, but if precise numbers can be employed, then statistics rather than the above adjectives should be used. For instance, if 65 students out of 100 students taking an examination passed, then the orator should report that "65 out of 100 students taking the examination passed." This is clearer than saying, "More than half of the students taking the examination passed"; or "Many students passed the examination"; or "Some students did not pass the examination." Orators who use such vague expressions unnecessarily perhaps are too lazy, apathetic, or even timid to research the facts and specify their thoughts.

Oratorical ineffectiveness also occurs from the em-
ployment of adjectives that function not to present objective description, but to express personal feelings. Examples occurred when students described a young, wealthy man as "that poor old man"; women who get abortions as legally protected murderers; and unmarried, teenage mothers as "little old ladies at home." Confusion occurs when the audience is uncertain whether the orator's words are to be taken literally or figuratively. Adjectives should clarify, not confuse.

To improve their use of imagery, students of oratory should read the works of speakers and authors known for their mastery of evoking clear, mental pictures. For example, clear imagery indeed appears in Wilfred Owen's poem, Dulce et Decorum Est, which describes the horror of a gas attack during World War I. The poem constitutes a commentary on the ancient Latin patriotic motto in the last two lines: "It is sweet and becoming to die for one's country."

Beat double, like old beggars under sacks,
Knock-kneed, coughing like hags, we cursed through sludge.
Till on the haunching flares we turn our backs
And towards our distant rest began to trudge.

Men marched asleep.
But limped on, blood-shod. All went lame; all blind;
Drank with fury; deaf even to the hoots
Of disappointed shells that dropped behind.

Gas! Gas! Quick, boys!—An ecstasy of fumbling,
Fitful sobs of半天; just in time;
But someone still was yelling out and stumbling
And floundering like a man in fire or time.

Dim, through the misty panes and thick green light
As under a green sea, I saw him drowning.

In all my dreams, before my helpless sight,
He plunges at me, guttering, choking, drowning.

If in some smothering dreams you too could pace
Behind the wagon that we flung him in,
And watch the white eyes writhing in his face,
His hanging face, like a devil's sick of sin;
If you could hear, at every joint, the blood
Come gargling from the froth-corrupted lungs,
Obscene as cancer, bitter as the cud
Of vile, incurable sores on innocent tongues;
My friend, you would not tell with such high zest
To children ardent for some desperate glory;
The old Lie: Dulce et decorum est
Pro Patira Mori.

Indeed, Owens described scenes which unlikely will occur today, but he well exemplifies how imagery can be clear, real, and intense; and that unclear imagery is useless in an orator's repertoire.

DON'T USE VAGUE PRONOUNS!

Whenever an audience has to ponder over the substantive to which a pronoun refers, oratory is ineffective. For illustration, a clergyman remarked that "men look upon evil eye upon the good that is in others, and think that their reputation obscures them, and that their commendable qualities do stand in their light; and therefore they do what they can to cast a cloud over them." Who are they? To whom does "they" refer? Who or what is "their"? What is the meaning of any pronoun in such a mess? Little wonder why the clergyman's parishioners criticized his sermon.

A university student working for the Admissions Department on campus informed a group of prospects that "at this university nearly all of the students know their professors and they are in the habit of calling them by their first names." Do the professors call their students by first name, or do the students call their professors by first name? The campus atmosphere seems informal, but who is doing what according to the speaker?

After interviewing his university's president, a student reported that the president "recalls vividly the beautifully written letters he has received from his father since he has left home." Did the father leave home, or was it the son? To whom does the last refer?

A university student reported that "the Memphis (Tennessee) draft board has declared a Catholic priest draftable and rescinded his draft exemption, less than a week after a Memphis bishop announced his support for the anti-war movement." To whom does his refer? Did the priest or the Bishop support the anti-war movement?

Students of oratory should review their grammar and make certain that their pronouns clearly point to correct antecedents.

DON'T USE IMPROPER SUBORDINATION!

Confusion can occur when sentence elements of unlike importance are linked together as equals. In other words, a less important element should be subordinate to a more important one.

For instance, a young missionary visiting his family in Wisconsin reported to a group of Rotarians that "during my first night in Africa, a young native with a gun broke into my office and demanded money, but I was engaged in an important discussion with the church elders." It appears that the missionary was too busy to give money to the demanding and threatening thief. This is not what the missionary meant. However, the missionary caused thoughtless coordination, for he treated the motive for the act as if it were the matter of importance. The act itself was relegated to the subordinate position. The missionary should have said, for example, "During my first night in Africa, while I was engaged in an important discussion with the church elders, a young native with a gun broke into my office and demanded money."

Orators who fail to recognize sentence elements of unequal importance should not expect favorable feedback from the audience.

DON'T USE WEAK PARALLELISM!

The main principle of parallelism is that similar meanings should have similar construction. For instance, in his Inaugural Address John F. Kennedy generated clarity by putting into similar construction ideas of similar importance. He said, for instance, "Let every nation know, whether it wishes us well or ill, that we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and success of liberty."

Later, in the same address, Kennedy alluded to "those nations who would make themselves our adversary," and said: So let us begin anew, remembering on both sides that "civility is not a sign of weakness and sincerity is always..."
University of Oregon
Summer Forensics Institutes
2003
~ August 3-16 ~

Our Programs Include:
Cross-Examination Debate Institute
Lincoln-Douglas Debate Institute
NCFCA Home School Debate Institute
Teacher’s Institute

Exceptional faculty

University credits available for all participants

At least 15 debate rounds for each debater

Full access to excellent libraries

Free photocopies

Exclusive, full-time access to a computer lab

High-quality evidence

"When I first came to ODI I had never debated before. I was a true novice and very nervous. The camp taught me valuable research and speaking skills that have greatly aided me in debate this year. I left the camp with a very thick stack of evidence and cases for each possible LD topic. At CSU Long Beach, my second tournament ever, I made it to the final round in junior division. A month later, in senior division at the USC tournament, I went 6-0 in prelims and made it to semi-finals. I began as a novice and now I compete successfully in senior division at large tournaments - all because of ODI."

SPARTAN
DEBATE
INSTITUTES

Two-Week Institute: July 13 – July 25, 2003 - $925
Three-Week Institute: July 13 – August 1, 2003 - $1250
Coaches Workshop: July 13 – July 19, 2003 - $450

These prices include housing, food, copying of finished lab evidence, T-Shirt, and a 2003 SDI Evidence CD from the student’s session

✓ Coaches’ Workshop – A unique opportunity for coaches to gain familiarity with both the topic and theoretical issues of their choice.

✓ Curriculum Diversity – Staff Members and lab placement are available for all skill levels, ranging from novice groups to those choosing to polish varsity skills.

✓ Superb Instruction – the SDI staff is not just a dedicated group of successful high school coaches, college coaches, and current college debaters who have excelled...Our staff members are chosen because they are experienced and dynamic teachers who have a passion for debate.

✓ Emphasis on Practice Debates – By providing SDI students with a packet of affirmative and negative positions at registration, practice debates and speeches typically begin the second day of the camp. All sessions conclude with judged tournaments for relaxed, yet structured opportunities for students to validate their educational experiences.

✓ Excellent Library Resources – The newly renovated MSU Library offers a superb selection of materials that are housed in one easy to use facility. An in-house library in the residence hall also contains computer based research facilities. Student dormitory rooms each contain full Ethernet access.

✓ History of Competitive Success – SDI Alumni have won tournaments or Top Speaker awards at the Tournament of Champions, St. Marks, the Glenbrooks, the Michigan-Michigan State Round Robin, and various state championships.

✓ Scholarships – Limited need-based financial assistance is available.

✓ Competitive Prices – SDI is committed to offering outstanding debate institutes at affordable prices, which include tuition, room and board, and copying of lab evidence.

✓ Access to Our Unique “Evidence CD” – As part of SDI tuition, each student will receive a 2003 SDI Evidence CD that includes a scanned copy of every file produced within their particular session.

Spartan Debate Institutes
10 Linton Hall, East Lansing, MI 48824
The 2003 Spartan Debate Institutes
East Lansing, Michigan

We are pleased to announce a new four-week debate intensive workshop for students ready to reach the next level! If you want to be taught by the best lab leaders in the nation, the 2003 SDI at Michigan State University is the place for you!

Dates: July 13th - August 8th
Price: $2,800

The new four-week session of the 2003 SDI is set to include the following amazing staff members:

Michael Eber - Interim Director of Debate at MSU - SDI Director and former champ debater at the University of Kansas.
Kamal Ghali - Debate coach at Emory and two time NDT Finalist for Emory University. 1997 T.O.C. Champion.
Colin Kahl - Professor of Political Science at the University of Minnesota. 1991 NDT Finalist and long time lab instructor.
Adriana Midence* - 2nd Speaker at the 2002 NDT and former champ debater at the University of Michigan.
Elizabeth Repko* - 1995 CEDA National Champion. Widely considered one of the very best lab leaders around.
Will Repko - Head Debate Coach at Michigan State University. SDI Director and 2000 Coach of the Year.

(*refers to staff tentatively scheduled to work at SDI)

Compare our price to similar four week camps! We offer perhaps the best and most experienced staff around at a substantially lower cost and no hidden charges. Prices include housing on the MSU campus, food, lab copying expenses, several fun activities, a t-shirt, and a copy of our Evidence CD.

Why choose the four-week SDI?

* More actual debates. Each four-week student will start debates on day two using our opening evidence packet. Four-week SDI students will receive at least 18 practice debates.

* Increased emphasis on YOUR personal skills development with high quality instructors, not just mass lecturers.

* A maximum 8-1 student to teacher ratio.

* A new kind of demo debate: the Pro Debate Tour's last stop will be in East Lansing.

* Intense but fun atmosphere in East Lansing, Michigan.

* All four-week students will receive our unique Evidence CD which includes a scanned copy of all SDI 2003 files.

Please visit our newly updated website at http://www.msu.edu/~debate
It includes additional information and application procedures concerning our four-week session. You can also email us at debate@msu.edu or contact Mike Eber at (517) 432-9667.

Information Guide

WELCOME TO

Georgia!

The Lincoln Financial Group / National Forensic League
National Speech Tournament
ATLANTA, GEORGIA • 15–20 June 2003

Hosted by the Georgia NFL Peach and Mountain Districts
at Georgia State University in downtown Atlanta

www.GeorgiaNationals.org
Welcome!

On behalf of Georgia’s NFL coaches and programs, it is our great pleasure to welcome you to Atlanta for the 2003 NFL Nationals. We are hard at work to make your trip South especially rewarding, a wonderful and unforgettable experience for your students. It may come as something of a surprise to realize that in the long history of the NFL, Georgia has never hosted the national tournament. Georgia’s legendary Sandra Siver’s long dreamed of hosting the Nationals; today, coaching community is fulfilling that dream, to return in some small measure the wonderful hospitality our students have enjoyed in your state. The Georgia Nationals will showcase our two very active NFL Districts, the city of Atlanta, and Georgia State University, where pre-finals competition events will be hosted.

While many of you have traveled to Atlanta for one reason or another, others may be unfamiliar with the central city corridor. For that reason, and to ease your planning, in the coming months we will be making extensive information available. Kostum will review logistical arrangements in detail, summarize opportunities for fun in the region, and highlight special events planned in conjunction with the tournament. Qualifying schools will soon or have already received a detailed information packet that offers additional information. We and encourage you to frequently visit the website for this year’s event: www.GeorgiaNationals.org.

Above all else, we’re committed to hosting a Nationals centered on enhancing the experiences of the outstanding students who have qualified to compete for national championships. From beginning to end, the Georgia Nationals will be first and foremost focused on students, and helping them feel immediately at home in the tournament neighborhood. We are committed to ensuring your safety in the downtown area.

All the tournament hotels are located just minutes from the GSU campus and other tournament venues, and regardless of the contracted properties, you will never have to fight Atlanta interstate traffic. And once on the Georgia State University campus, you’ll feel right at home — GSU is a 50/500 student Research University whose facilities could not have been more perfectly designed for the Nationals. Registration and week-long hospitality will be available in the University’s new multi-million dollar Student Center, and participants will compete in many new and newly renovated classroom spaces and buildings. The campus is easy to navigate and surrounded by restaurants and tourist venues, like the World of Coca Cola and Underground Atlanta.

We are pleased to enjoy the support of the tournament’s principal corporate sponsor, the Lincoln Financial Group, and once again our friends at Schwalm’s Food have agreed to assist in making the tournament fun for all participants. We are hard at work securing additional support from the region’s many Fortune 500 companies and nationally prominent law and communication firms. Participants will enjoy a number of occasions to interact with Georgia’s most visible public figures. For example, it is fitting that the Georgia Nationals will play host for the first time to students qualifying in the new Turner Controversy Event. Ted Turner, an Atlanta legend, has agreed to lend his name and support to this new public debate event and to judge the final round.

We’re eager to introduce you to landmark city sites where the modern civil rights movement was born. Finalists in the Barbara Jordan and Ted Turner events will speak at the same pulpit where Dr. Martin Luther King, Jr. preached, in the old Ebenezer Baptist sanctuary, a national historical monument. Finalists in many other events will compete for championships at the new Ebenezer sanctuary, a stunning monument to the ongoing struggle for equality and social justice, built across Auburn Avenue from Rev. King’s gravestone. And we are finalizing plans which will allow Congress finalists to compete in Super Session at the gold-domed Georgia Capitol, only two blocks south of campus and just restored to its original glory.

Please don’t hesitate to make contact with either of us or other Georgia colleagues if you have any questions!

See you soon, here in Georgia!

Richard Bracknell
Leslie S. Watkins

The Lincoln Financial Group / NFL National Speech Tournament  
Georgia State University
Tournament Highlights

Stay tuned for major announcements about the tournament in the coming weeks. In the meantime, here are highlights already planned:

- All hotels are in the GSU neighborhood, so you'll avoid traffic.
- Finals at the historic Ebenezer Baptist church, where the Rev. Martin Luther King, Jr. preached.
- A range of planned final day activities, organized with the King Center for Nonviolent Social Change.
- Spectacular venues for Student Congress.
- A wonderful opening, starting on registration Sunday with a gala hosted by Schwan's.
- Ready use of the university's best and newest facilities, including the new Adelhold Learning Center.
- A week-long hospitality center for coaches and students.
- Events designed to celebrate Atlanta's role in pioneering the urban debate leagues.

In the coming months, we encourage you to frequently visit the Georgia Nationals website for information updates.

We're thrilled you'll be joining us!

The Nationals Neighborhood

Week-long contest events will take place on the Georgia State University campus, located in the heart of downtown Atlanta. The Georgia State Capitol is two blocks south of campus, the King Center five blocks northeast of campus, and all the contracted hotels are within four blocks north of the campus venues. Atlanta's subway system, MARTA, makes it possible to travel almost door-to-door between the airport, hotels, campus, and final day events.

We are using hotels located in the heart of the city's convention district—a full range of restaurants and shopping opportunities are within walking distance. For instance, within two blocks of the convention hotels are more than 30 restaurants, ranging in price and quality. Half a block away is the renowned City Grill, a four-star restaurant which serves Atlanta's downtown professionals. Nearby are fast and cheap Chinese, Middle Eastern, Italian, and sandwich shops.

Half a block off Peachtree, at Peachtree Center Avenue and International Boulevard, is Hau's, featuring Chinese artifacts, subtle lighting, polished service, and a kitchen that delivers excellent specials, including such novelties as soft-shell crab in black bean sauce and Szechuan beans in spicy pork. Morton's of Chicago, the well known chain restaurant, is also nearby, and serves a good round of meat. Morton's is on Peachtree Center Avenue, on the ground level of the Marquis Tower One. For an excellent breakfast for many patrons, or decent deli sandwiches, visitors often seek out Jack's Sandwich Shop in the 230 Peachtree Tower Building. With sublime cheese grits, fine eggs, and bacon, bagels and toast, and a good juice selection, Jack's is a penny-pinching treasure.

Underground Atlanta is a retail and restaurant complex next door to the GSU campus, and features restaurants of all varieties: Leonardo's (an Italian restaurant), a full Food Court with more than 20 fast food outlets (including good BBQ), Johnny Rockets, Micks, and the infamous Hoisters.

The city's main nightlife is centered in Buckhead, several miles north of the convention neighborhood, but easily accessible by car or cab.

A R o i m e 1 1 h e p a c e a 0 0 1 1 Georgia Nationals! Welcome to the 2003 Georgia Nationals! Georgia Peach & Mountain NFL Districts
For Schools on a Tight Budget

Our host committees understand that a week-long stay in a major urban area can pose a real financial burden, and for programs facing severe financial constraints we have some good news about the Georgia Nationals. Negotiating with Atlanta’s premier hotel properties, we have secured great rates across the board — for example, the rates at the Hyatt, Sheraton, and Marriott Marquis are all negotiated lower even than the rate today paid by the federal government, and these are premier convention properties.

For schools on an especially tight budget, we want to make you aware of two ways to save additional money:

- **On-campus housing options.** We are making available at a lower cost than the major hotel properties some opportunities for on-campus housing. For specific information on this, visit the [www.GeorgiaNationals.org](http://www.GeorgiaNationals.org) website. These venues are especially economical for large programs willing to squeeze students into apartment-style suites.

- **Nationals without a rental car?** The MARTA subway train comes right into the Hartfield Airport terminal, and brings you directly north to the convention hotel properties. Once at your hotel you can take MARTA back and forth to the campus, and restaurants are available within walking distance, or a short cab ride. While this option will seem less attractive to schools who have qualified students needing to carry extensive extemp or debate files, these files can be stored on a nightly basis in locked GSU classrooms. Beyond the savings from renting a vehicle you will also save in daily parking fees which can obviously add up.

We welcome the opportunity to help schools on a tight budget explore additional ways to economize, and encourage you to visit our website for more information regarding cost savings options.

---

High resolution maps of the campus area are available at the [www.GeorgiaNationals.org](http://www.GeorgiaNationals.org) website. All but the Congress hotel are located in the neighborhood in the above map covered by the detailed map of the University Village.
Getting Around Atlanta

Atlanta is the transportation hub of the southeast, so getting there is no problem whether you decide to fly, drive, or take the train. If you fly, you’ll arrive at Atlanta Hartsfield International Airport, one of the easiest airports to use in the world. Taxis, rental car companies, and Atlanta’s rapid-rail system, MARTA, connect the airport with downtown, a short seven miles away. If you drive, you will most likely enter the city on one of the three interstate highways that converge in Atlanta: I-75, I-85, or I-20. These are linked by a 68-mile perimeter road, I-285, that circles the city.

Parking in Atlanta is easy to find and relatively inexpensive. Even if you park in the city’s pay lots, you will likely not pay more than $8 per day. Most of the hotels are contracted with major parking companies, but the specific charges per property are detailed in the hotel section of this insert. Tournamnet participants will be able to purchase low-cost come-and-go parking passes which will enable parking in the Georgia State University parking decks.

GETTING AROUND BY CAR

Driving into Atlanta, visitors will most likely arrive by interstate: I-75 or I-85 from the north or south, I-20 from the east or west. These three routes converge on Atlanta like the spokes of a wheel, connected by the interstate perimeter that is I-285.

Any one of the three interstate routes takes you directly into and through the heart of the city. The perimeter essentially makes a big loop through Atlanta’s sprawling suburban outskirts. The tournament sites are located right at the heart of the city, and are easily marked by exit signs off that portion of the interstate where I-75 and I-85 run together, a stretch of highway known by locals as “The Connector.”

Interstate 285 encircles Atlanta. Sixty-three miles in circumference, it is known as the “perimeter.” I-75, I-85, and Georgia Highway 400 divide the rough circle created by the perimeter into six pie-shaped sections.

Georgia Highway 400, the only toll road in Georgia, starts at I-85 in northeast Atlanta and heads north in a straight line to a point just south of Dahlonega. While this is not an interstate highway, it has all the characteristics of one: six high-speed lanes, interstate-type signage, and high-speed entrance and exit ramps.

GETTING FROM THE AIRPORT TO HOTELS

There are many options for transport from Hartsfield to the downtown hotels, all either reasonably priced or free.

The Airport Train. One of America’s best urban transportation tricks is the MARTA train from the Atlanta airport to downtown. Travelers who have discovered it love it. The airport entrance to the train platform is near the baggage claim. It’s adequately marked when you reach the claim area. From there, for $1.75, you can quickly reach any place on the rail system map. The Peachtree Center MARTA station (the station nearest the hotels, one stop north of the centerpoint of the rail system, is called Five Points, not to be confused with the shopping and restaurant area called Little Five Points) is only 20 minutes away from Hartsfield. Many hotels in the downtown area and along the Peachtree Street corridor are within easy walking distance of a MARTA station, and this is true of almost all the Nationals hotel properties (in fact the only exception is the Holiday Inn, which is located next to Turner Field).

Hotel Shuttles. Some 42 hotels offer shuttle service to and from Hartsfield. Those properties with shuttle service meet passengers at curbside outside the baggage claim area and transport them to their hotel. Generally, hotels in the airport area provide free service, but some of the downtown hotels charge for it.

Taxis. Taxis are easy to find at the west side of the airport near baggage claim. The bullpen holds 315 cabs. During busy times many drivers are waiting their turn. Ten or so line up by the dispatcher’s booth on the sidewalk at any one time. The dispatcher is an employee of the city aviation department and is charged with keeping the taxi traffic flowing smoothly. Taxi fare from the airport to downtown is $15, but that amount may go up by June.
HIGH SCHOOL POWERCAT
DEBATE-FORENSICS CAMP
Kansas State University
Manhattan, Kansas
June 2003

For Student-Competitors and Coaches

DEBATE
One Week: June 15-21
or
Two Weeks: June 15-28

FORENSICS
One Week: June 15-21

Debate Camp Director
Susan Stantiel, Director/Head Coach of the nationally recognized KSU debate team

Forensics Camp Director
Craig Brown, Director/Head Coach of the nationally recognized KSU IE forensics team

Designed to meet the needs of a variety of student-competitors and staffed by the directors, coaches, and competitors of one of the top Debate-Forensics programs in the nation, the Powercat Student Camps are focused on two goals. First, we are looking to the upcoming season by preparing you with new evidence, strategies, topics, materials, and events. And second, looking beyond just this year, we will help you hone your understanding and debate-forensics skills. We want you to take what you learn far beyond any one season of debate-forensics.

The Powercat Coach Camps are designed to be flexible. Coaches can attend all student sessions, but there will be additional opportunities to work on learning or improving coaching skills and administrative issues, and to find new material, topics, and evidence for your competitors.

All camps offer room and board, with commuter options available.

Complete Debate Camp information and registration is on the Web at www.dce.ksu.edu/debate

To request a registration packet via mail call the Division of Continuing Education Registration Office at (785) 532-5566 or 1-800-432-8222, or e-mail info@dce.ksu.edu.
Tournament Hotels

Atlanta is one of the nation’s busiest convention cities, and the going rate for the major high property hotels is considerably higher than we’ve been able to negotiate. We’re pleased that no large-block hotel we’re using will be charging guests more than $95 per night, which is now much lower even than the rate granted the federal government.

Where Should I Stay?

We strongly encourage you to stay in one of the contracted properties for which information is provided in this insert. Every hotel of reasonable quality within a ten minute radius of the Georgia State University campus is under National's contract. Staying in these properties puts you in some of Atlanta's premier hotels, and also importantly will assure that you avoid the regular traffic mess typical of downtown. Staying at a property even ten miles away may oblige you to back and forth commutes exceeding an hour each way.

All but one of the contracted properties have set aside considerable blocks of double/double rooms, and some king rooms, for tournament participants. The exception is the Embassy Suites, located at the Olympic Centennial Park, where our block only includes 20 suites, to accommodate attendees who expressed a specific interest in staying there. All contract properties will ask you to pay a $2.90 per room per night rebate which helps underwrite the running of the Nationals.

Nearly all the major downtown hotels have leased their parking lots out to private vendors, which means hotel guests usually pay overnight parking charges as high as $20 per night. In many cases we were able to successfully negotiate these parking charges down or completely away. Parking charge information is provided here so that you can budget for it. Since these daily fees can add up, if the choice is between bringing multiple cars or renting one minivan, you will save considerably on parking charges by doing the latter. Whenever you stay in the city of Atlanta, hotel stays are subject to a 14% tax.

The University is making available some limited apartment-style housing, which would be economical for schools bringing large groups, where students don’t mind crowding into suites. Visit the web site GeorgiaNationals.org website for specific information about this alternative.

Many Student Congress events will be held at the Holiday Inn Atlanta Capital Plaza, and so we recommend that Congress participants plan to stay in that property as a first choice.

The following pages provide specific information about Nationals properties which supplements the overview data in the box shown on the next pages. Flat rates were negotiated for all hotels, and will not vary as a function of the number of people in each room.

Advanced Booking

Please remember that when you book your rooms, it is NFL policy that you provide a two night non-refundable deposit for each room or suite booked. This means non-refundable. You will be asked to send cash, check, or money order immediately to hold your rooms. If the money does not arrive in a timely fashion your rooms will be canceled and sold to others. Should you choose to use a credit card, the hotel will enforce NFL policy and bill your card immediately for the two night non-refundable deposit. If you book rooms, you will see charges on your credit card statement prior to Nationals.

NFL wishes to eliminate “speculative” booking (“I will reserve rooms now in case we qualify”) and double booking (“I will book two places and when I arrive choose the one I like and cancel the other”). If a coach chooses to book excess rooms on several properties, s/he will pay a two night non-refundable deposit for each room they book, even if canceled later.
Information About Specific Nationals Properties

Here is more detailed information about our contracted hotels. Each offers the amenities standard for comparable properties in its chain, and all are of high quality, regularly used by the biggest conventions coming through the city. Nearly all are within a mile of the campus (the Embassy Suites and Holiday Inn are both roughly 2 miles away but accessible by city streets which avoid interstate traffic tie-ups), and all are near to the King Center where Final Four contest rounds will occur.

Hyatt Regency Atlanta. The flagship property of the Georgia Nationals, the Hyatt Regency is also the location for Thursday evening Final Four contest events (to be held in the Hyatt Grand Ballroom). The Hyatt Regency adjoins the Peachtree Center complex, which includes an indoor connection to the Peachtree Center MARTA public rail center. Built around one of the most spectacular hotel atriums in North America (it was the first contemporary atrium hotel built in the world), the hotel features a range of restaurant options, a gift shop, a fully equipped business center, complete 24-hour concierge service, and access to world class fitness facilities. Cabs are available at the front door around the clock. The property was completely renovated and expanded in 1996. Class elevators will take you to your students to Polaris, Atlanta's landmark revolving rooftop restaurant under the hotel's famous blue dome.

Located at 265 Peachtree Street, rooms are available in double-double and king configuration, all at a $93 flat rate. Reservations can be made by calling 1-800-233-1234 or 404-577-1234. The hotel fax number is 404-586-4137. The group contract name is National Forensic League. The block closes on May 13, 2003. The Hyatt is attached to a major parking facility which charges $19 for overnight parking (less for daily hourly parking). The property web address is http://atl/. Should you have questions regarding your reservation, the sales manager for the NFL contract is Nicole Albin, available at 404-588-4065.

Atlanta Marriott Marquis. The Marriott Marquis, designed by John Portman, is among the city's most visible skyline hotels, an account of its 50-story atrium and the panoramic view of the city it provides. A Mobil Travel Guide 3-star hotel, the Marquis features on-site restaurants (the Marquis Steakhouse, Allie's, Champions, and others), 24-hour room service, a gift shop and newsstand, and business center service. The hotel also includes both indoor and outdoor swimming pools and health club access. Guest rooms include work desks with lamps and data ports.

Located at 265 Peachtree Center Avenue, rooms are available in double-double and king configuration, all at a $93 flat rate. Reservations can be made by calling 1-800-288-9290 or 404-521-0000. The hotel fax number is 404-586-9299. The group contract name is National Forensic League National Championships. The block closes on May 13, 2003. The Marquis is attached to a major parking facility which charges $19 for overnight parking (less for daily hourly parking). The property web address is http://www.marriott.com. Should you have questions regarding your reservation, the sales manager for the NFL contract is Lori Castonguay, available at 404-588-6591.

Sheraton Atlanta Hotel. The Sheraton Atlanta is a deluxe hotel, the closest property to the Georgia State University campus. Its recent renovation has won design awards, and part of the hotel surrounds a spectacular Savannah-style atrium pool with retractable roof, side by a whirlpool and great city views. Guest rooms include all the amenities you would expect from a high-end Sheraton, including in-room data ports. Hotel conference and restaurant spaces are among the most impressive in the city, and also benefited from the recent total renovation.

Located at 165 Courtland Avenue, rooms are available in double-double and king configuration, all at a $93 flat rate. Reservations can be made by calling 1-800-833-8624. The hotel fax number is 404-524-1256. The group contract name is National Forensic League - Forensic. The block closes on May 16, 2003. The Sheraton is attached to a major parking facility which charges $12 for overnight parking (less for daily hourly parking). The property web address is http://www.starwood.com/sheraton. Should you have questions regarding your reservation, the sales manager for the NFL contract is Andre Cherdtier, available at 404-586-3389.
The Sunshine Debate Institute is a cooperative venture between the Debate Coaches at The University of Florida and The Florida State University. The camp will offer instruction in CX Debate, LD Debate and Extemporaneous Speaking. The Institute staff has over 30 years of competitive speech and debate experience as competitors, coaches, and educators.

Important Information for Students, Parents and Coaches

- Date: June 27–July 10
- Cost: $985 ($400 deposit by 4/15/03)
- Location: Stetson University, Deland, Florida (25 miles north of Orlando and 25 miles west of Daytona Beach)

The staff includes:
- Frank Irizarry—Director of Policy Debate at The University of Florida
- Marna Weston—Director of Policy Debate at The Florida State University
- Cynthia Irizarry—former NDT Debater and Coach at Wayne State University and The University of Nebraska

Additional Staff will include Speech and Debate team members from The University of Florida and The Florida State University. Staff will be added based on the size of the Institute. We will strive to foster an educational atmosphere with smaller labs and more direct instruction.

**Holiday Inn Atlanta – Capitol Plaza.** The featured hotel for Student Congress participants, the ballrooms and meeting spaces of the Capitol Plaza Holiday Inn will be used for a number of important Congress events. Congress students will appreciate the incredible $20 million renovation, completed just two years ago, which has created lovely meeting areas. The hotel has been an Atlanta landmark for many years, and just became a Holiday Inn this past summer. Rooms have undergone a total furniture and internet access makeover. The hotel is right next door to the Ted Turner baseball stadium, home of the Atlanta Braves, and north side windows have an incredible view of the State Capitol dome and Georgia State University, just two miles north of the hotel. The Holiday Inn may be the most secure hotel property in Atlanta, since by virtue of its physical location it is walled on several sides. The hotel has full service restaurant and room service options.

Located at 450 Capitol Avenue, rooms are available in double-double and king configuration, all at a $79 flat rate. Reservations can be made by calling 1-800-589-7092. The group contract name is National Forensic League. The block closes on May 13, 2003. The Holiday Inn is attached to a parking facility which is charging tournament guests only $3 for overnight parking. The property web address is http://www.ahltiancapitalplaza.com. Should you have questions regarding your reservation, the sales manager for the NFL contract is Darryl Russell, available at 404-581-2015.

**Marriott Courtyard.** Standard, high quality Marriott property, located close to Georgia State University. To achieve a discounted rate for this downtown hotel, we negotiated a rate that does not include breakfast. The Courtyard does not charge any parking fee for hotel guests. Amenities include a business center and swimming pool.

Located at 175 Piedmont Avenue, rooms are available in double-double and king configuration, all at an $81 flat rate. Reservations can be made by calling 1-800-521-2211. The group contract name is Georgia Nationals. The block closes on May 1, 2003. Should you have questions regarding your reservation, the sales manager for the NFL contract is Devon Sapp, available at 404-659-7777.

**Fairfield Inn.** A recently renovated property attached to the Courtyard, and at the same 175 Piedmont Avenue address, the Fairfield is an inexpensive but convenient hotel for Nationals participants. As with the Courtyard, parking is also free at the Fairfield. The Fairfield rate includes a daily continental breakfast. Rooms are available in double-double and king configuration, all at a $71 flat rate. Reservations can be made by calling 1-800-228-2800. The group contract name is Georgia Nationals. The block closes on May 1, 2003. Should you have questions regarding your reservation, the sales manager for the NFL contract is Devon Sapp, available at 404-659-7777.

**Days Inn Atlanta.** A recently renovated high-rise, complete with restaurant and fitness center amenities, the Days Inn is also within a mile of Georgia State University, and is one of the most affordable properties under contract. The parking rate for Nationals attendees has been discounted to $10 per day, with cheaper charges available for come-and-go hourly traffic. The hotel is right in the middle of the major convention thoroughfares, and is close to a MARTA station. Room service and business center services are all available.

Located at 300 Spring Street, rooms are available in double-double and king configuration, all at a $69 flat rate. Reservations can be made by calling 1-404-523-1144. The group contract name is NST. The block closes on May 14, 2003. Should you have questions regarding your reservation, the sales manager for the NFL contract is Benny Benson, available at 404-404-523-1144.
Super 8 Downtown. A lovely downtown high-rise, complete with restaurant and fitness center amenities, the Super 8 is close to Georgia State University, and is also among the most affordable properties under contract. The hotel is right in the middle of the major convention thoroughfares, and is close to a MARTA station. Room service and business center services are available.

Located at 111 Cone Street, rooms are available in double-double and king configuration, all at a $60 flat rate. Reservations can be made by calling 1-404-524-7000. The group contract name is Georgia Nationals. The block closes on May 13, 2003. Should you have questions regarding your reservation, the sales manager for the NFL contract is Debbie Williams, available at 404-524-7000.

Embassy Suites Atlanta — Centennial Olympic Park. Located right next door to CNN World Headquarters, the Georgia Dome, and Philips Arena, and overlooking Centennial Olympic Park, the Embassy Suites are located only two miles from the Georgia State University campus. The Suites feature all the high quality amenities of Embassy Suite properties nationwide, including wonderful restaurant and common area spaces, roomy suites, and access to room service and business services. Because of the limited specific demand for Embassy Suite access, our block is small — if you wish to stay here, move quickly!

Located at 267 Marietta Street, rooms are available in double double and king suite configurations, all at a $120 flat rate. Reservations can be made by calling 1-404-222-2300 or 1-800-EMBASSY. The group contract name is Georgia Nationals. The block closes on May 15, 2003. Parking is available for an $16 overnight charge, and a $10 day rate. Should you have questions regarding your reservation, the sales manager for the NFL contract is Brian Weis, available at 678-689-0709.
Want to WIN or LEARN? How about Both?

HERE ARE SOME OF THE MANY WAYS YOU CAN...

Presenting the

Florida Forensic Institute
Student Congress Championship Lab

(Part of the Nationally Recognized FFI All-Events Institute)

Ms. Lisa Miller, Director of Student Congress
Coach of 4 National Champions & Winner of EVERY major Congress Tournament

With a Staff that Rivals the World!

- Scott Jacobson (Union College)—NFL, CFL, and Harvard Champion
- Jeff Hannon (University of Florida)—NFL Champion
- Ashley Keller (Harvard)—Founding Champion of the HNC, CFL Runner-up
- Matt Spritz (Emory)—CFL Champion
- Plus Sarah Mehlterter, Ben Seymour, and other Champions of major National Tournaments!

FFI Students have WON CHAMPIONSHIPS at the following IN THE PAST 2 YEARS:
- NFL
- NCFL
- HNC
- Barkley Forum
- Glenbrooks
- UPENN
- Blue Key
- And many others!

Additional Highlights:

**Logic, Evidence, and Political Analysis with Fr. John Sawicki**
**Double Training in Domestic & International Extemp**
**3 Full Sessions of Critiqued Debate and Scenarios**
**Rebuttal, Research, and Style Workshops**

And...poolside BBQ’s, Recreation, and the Best Accommodations Imaginable!

FFI also offers top-notch instruction in LD, INT, OO, and EXTEMP
July 25th-August 8th 2003

Rental Cars

Special car rental rates have been negotiated for the Georgia Nationals with National Car Rental and Alamo Rent-a-Car. The rate schedules for Atlanta are reproduced below in chart form.

For schools wishing to use National Car Rental, the rates listed assume an Atlanta Airport pickup, and cover the National Tournament week (from June 14-21, 2003). These rates are non-discountable and may not be used with certificates. Weekly rates are for five to seven days. Weekend rates apply Thursday, Friday, and Saturday. Specialty vehicles may need to be guaranteed with a major credit card at time of booking. The rate for a vehicle class not listed on the National chart is the lowest leisure rate available at time of booking (less 10%). Standard age, driver, and credit qualifications apply. Minimal rental age at most U.S. locations is 25. Rates do not include taxes, governmental or airport fees, or optional charges such as refueling services or additional driver fees. Loss Damage Waiver, Personal Accident Insurance, Personal Effects Coverage, Supplemental Liability Insurance of any other optional items or services. The 24-hour toll free reservation number for National is 1-800-227-7366. The group rate ID number is 6901085. Cars may also be reserved online at www.nationalcar.com.

Schools wishing to use Alamo Rent-a-Car, the rates listed assume the same dates and pickup constraint. Convention rates may be reserved for use one week prior to and after the tournament dates. Alamo makes no additional charge for additional drivers. They require a five-day minimum stay for weekly rates to apply, and coupons are not valid on convention rates. Similar models may be substituted, and the convention rate includes vehicles equipped with automatic transmission, AC, and radio. If you return the car to a location different than where you rented, drop off charges may apply. Fuel, taxes, and other optional items are additional. Reservations must be made twenty-four hours in advance, and those can be guaranteed. This offer is only available to renters over the age of 25. Higher rates apply to renters aged 21-24 (minimum rental age for Alamo is 21). The 24-hour toll free reservation number for Alamo is 1-800-732-3232. The group rate ID number is 378110 RATE CODE GR.

Answering Questions

Is Parking On Campus Going to Be a Pain?

Not! The university has ample parking—the majority of GSU’s 30,000 students commute onto campus, and GSU decks and private lots ring the campus. GSU decks are well lit, safe and regularly patrolled by campus police (escorts to the decks are also available for free to anyone requesting one). To avoid early morning and mid-afternoon traffic jams at deck entrances, we will make parking passes available to tournament participants (more information on this to come, and available at the nationals website).

The venue where parking is most limited is the King Center and Ebenezer Baptist Church—the lots are free but limited, and although the Center and church are national tourist attractions, we recommend that participants carpool on Friday if possible. All the hotels have ample parking.

How Much Should I Budget Per Person Per Day?

It is always hard to provide an exact estimate, since student preferences range so widely. But restaurants are no more expensive than in any other urban area, and only slightly more expensive than you would expect to pay in the suburbs. Budget for parking expenses (many of the tournaments charge additional parking fees overnight), and you’ll have to pay to park on the GSU campus. As usual, concessions will be sold at the tournament site (including such items as T-shirts and prepared materials). The city subway costs $1.75 for each trip, or $3.50 for a round trip. Cabs charge on a zone system in the downtown area, and within zones the cost is very reasonable. If you stay in one of the contracted hotel properties, you’ll never experience any toll road charges. Parking is free at the King Center.

What Kind of Weather Can I Expect?

The weather will be warm and slightly humid. The metro-Atlanta area has experienced a rain deficit for each of the past three summers, but that doesn’t prevent some higher-than-normal summer humidity. The weather will not be that much different than you experienced in Charlotte. The Georgia Nationals website connects to other online weather information. Should temperatures soar, bottled water will be regularly available. All tournament venues are air conditioned, and contest events will be scheduled into building clusters designed to minimize the amount of hiking students must do between rounds.

What’s the Traffic Going to Be Like?

Atlanta traffic is notoriously bad, especially on the major interstates. On major city thoroughfares rush hour runs from 6-9 AM and from 4-7 PM. But if you stay in contracted properties, you’ll avoid all this—no need to travel on the interstates, and the hotels are one regular surface street drive away from campus. In fact, for most properties you’re no more than ten minutes away even in the worst traffic periods. If you choose to stay further out, prepare to sit in traffic.

Are There High Quality Health Care Facilities Nearby?

Yes, there are four major health care centers within ten minutes of the campus and major hotels. For instance, the city’s major hospital, Grady Memorial, is next door to campus and even shares a parking deck with GSU. 24-hour pharmacies are also available in the neighborhood.

Is the Downtown Campus Area Safe?

Yes! Georgia State University is proud to have been a part of downtown Atlanta for more than 85 years. The University's
proactive approach to preventing crime has succeeded in minimizing criminal activity, while promoting a strong sense of awareness and safety throughout the campus.

**Campus Security.** As a university located in the heart of downtown Atlanta, Georgia State is not alone in efforts to prevent and combat crime. The downtown area boasts several agencies assigned to provide security, including the Ambassador Force, men and women who serve as the extra “eyes and ears” of the Central Business District. Georgia State University Police have strong working partnerships with these agencies.

The Ambassador Force of Downtown Atlanta, a program of the Downtown Improvement District, Inc. (DID) sponsors an affiliation of Inter-Agency Law Enforcement (ILE). Agency heads or representatives from all the law enforcement agencies whose jurisdiction is within the DID meet monthly in a coordinated effort to improve the safety of people who come downtown. The purpose of ILE is to coordinate activities and programs designed to make your experiences downtown pleasant and safe. Members of ILE include Georgia State University Police, Georgia Tech Police, MARTA Police, Atlanta Police, Federal Protective Services, Georgia Building Authority Police, Georgia World Congress Center Police, Office of the City Solicitor, Fulton County Sheriff’s Department, Fulton County Police, Georgia Bureau of Investigation, Cobb County Department of Public Safety, Georgia State University’s Department of Criminal Justice, United Parcel Service, the Atlanta Journal-Constitution and the Ambassador Force.

Georgia State’s police department is located on the first floor of One Park Place South. The department provides a variety of services ranging from crime prevention to investigations. It currently includes more than 82 officers certified by the Police Standards and Training Council of Georgia, as well as 22 student cadets, nine security guards, two student assistants and five supporting staff members.

At present there are more than 46 emergency call boxes located throughout the campus.

**Security on the MARTA Train System.** Virtually every regular rider feels safe and secure on the system. MARTA has 300 people in its police services division, 265 of whom are certified police officers. Four Atlanta police precincts are located in MARTA stations: Five Points, Lakewood/Tort McPherson, Indian Creek, and Downtown. Each rail station has a closed-circuit television camera system plus constant police surveillance and patrolling by uniformed and plain clothes officers. Statistics say that one in 2,961,210 passengers is likely to experience a bodily crime.
What Accommodations Are Available For Persons With Disabilities?

Hartsfield International Airport is one of the most accessible airports in the country. Well-traveled disabled individuals rate it a solid eight on a scale of ten. Jetways, carpeting, the tram system, baggage retrieval, and helpful airline employees all combine to give it high marks.

All of the MARTA train system is accessible. Approximately 70% of the buses in the fixed-route fleet are lift-equipped, and as old buses are retired, the new ones arrive with the lift feature. MARTA has 77 para-transit vehicles in its fleet. Visitors must have proof of para-transit eligibility from their home city to qualify for the service on a when-available basis. The cost of the service is $2.50 each way.

Several companies in Atlanta rent lift-equipped vans, including: Wheelchair Getaways (770) 557-9651, rates about $109 per day; Adaptive Mobility Systems (762) 622-5242, rates about $119 per day; and Access Rent-a-Van (770) 222-9674, rates about $115 per day. All three companies have special fees for weekly and monthly rentals.

The Georgia Relay Service relays calls from "Hello" to "Good-bye" between individuals who are deaf, hard-of-hearing, or speech-impaired and people who can hear. The service operates 24 hours a day, seven days a week. Phone (800) 258-0135. The Center for the Visually Impaired has compiled a list of Atlanta services targeted specifically for the visually impaired. Copies of their lists can be received by writing them at 763 Peachtree Street, NE, Atlanta, GA 30308; (404) 875-9011.

A Disability Coordinator in what is called the Mayor's Office Center can answer general questions about disability access in Atlanta; call (404) 330-6026. For general information about disability access in Fulton County (which contains Georgia State University and the city of Atlanta), call the Fulton County Office on Disability, (404) 730-7390. The office can provide access information for county buildings, services, and programs. The Atlanta Convention and Visitors Bureau, at (404) 521-6600, publishes an Access Guide to Atlanta and selected attractions in Georgia.

The Handi Hotline is an information source for wheelchair users; call (770) 998-0211.

In addition to all this, Georgia State University and all its facilities are fully accessible to any users, regardless of impairment or physical limitation. The University and its personnel will eagerly work with NFL participants to make all events and facilities accessible to all those attending.

Please stay in contact with your Georgia colleagues if you have questions — we're eager to offer you our best Southern hospitality!
"Sun Country Forensics Institute is a great experience for debaters at all levels, novice to national caliber would benefit from this institute."

Dan Shellen, 2001 Copeland Award recipient; debuting at UC Berkeley, 2000 lab leader

**THE PROGRAM** — The policy and LD programs offer instruction for students of all levels (beginning, intermediate, advanced). Learning is targeted to both national circuit debaters and regional competitors. The instructional staff includes accomplished collegiate and high school coaches as well as current collegiate debaters who are former NFL, Catholic and TOC National qualifiers.

**OPPORTUNITY** — Choose either policy or Lincoln-Douglas debate and receive instruction and practice in individual events for no additional cost. Labs are scheduled to promote both debate and IE experience.

**EXPERIENCED STAFF** — Stan Banks (Bingham High, UT); Stephanie Budge (Peac University, NY); Rob Gordon (University of Utah); Ryan Hoglund (Rowland Hall, UT); Nathan Kestolner (Rhode Island Urban League); Kirk Knuston (The Meadows, NV); Melinda Murphy (Albuquerque Academy, NM); Kim Pullan (Pine View High, UT); Leslie Robinett (Jordan High, UT); Mike Shackleford (Weber State, UT); Michelle Shinmin (Hillcrest High, UT).

**CURRICULUM**

**Policy** — Lectures focus on the topic, debate theory, unique and rival views of positions, and "cutting edge" argumentation. Labs focus on research, position briefing, technique, and practice.

**LD** — Lectures focus on philosophy, values, criteria development, and several relevant topics. Labs focus on affirmative and negative case construction, delivery skills, research, and practice.

**IE** — Lectures and labs for all NFL events.

**12 CRITIQUE ROUNDS** — There will be 8 tournament rounds and 4 practice rounds (minimum).

**RESEARCH FACILITIES**

Dixie State College features a "state of the art" computer lab
- Each student will have their own terminal (250 stations on the floor)
- Each student will have full time internet access including LEXIS-NEXIS
- The institute library will contain over 400 books and documents from Brigham Young University, University of Nevada, Las Vegas and University of Utah libraries.
- All evidence is shared. The institute functions as a research team to produce a high quality, uniform set of relevant evidence (4,000 pages). Includes 8: affirmatives, 12 off-case positions (DAs, counter plans, kritiks).

**COLLEGE CREDIT** — Each student will receive three (3) hours of transferable college credit (COMM 220).

**COST**

$555 includes room (apartments, air conditioned, pool, kitchen) and board (two meals per day)

*Fly in/out of Las Vegas*

$315 for commuters (no room and board)

**Lab Fees** (maximum): Policy $60 / ID $30

**INDIVIDUAL EVENTS ONLY WORKSHOP**

July 18-26

Lectures, labs, practice and 4 tournament rounds in all NFL events.

**COST**

$355 includes room and board - $205 for commuters
**UTNIF**
**SUMMER 2003**

**Cross Examination Debate Programs**
- CX Plan I \(\text{June 23rd to July 11th}\) \$1199
- CX Plan I Experienced Lab \(\text{June 23rd to July 14th}\) \$1799
- CX Plan I Novice \(\text{June 23rd to July 11th}\) \$1099
- CX Tutorial Extension (plus plan I = \$1,599; plus plan II = \$1,899)
- CX Plan II \(\text{July 15th to August 6th}\) \$1699
- CX Plan II Novice \(\text{July 15th to August 2nd}\) \$1099
- CX Supersession \(\text{June 23rd to August 6th}\) \$2999

**Individual Events Programs**
- Individual Events \(\text{June 28th to July 13th}\) \$999
- IE Tutorial Extension \(\text{July 13th to July 17th}\) \$399
- Major/Minor Program $200

**Lincoln-Douglas Debate Programs**
- Lincoln-Douglas Session 1 \(\text{June 28th to July 13th}\) \$999
- Lincoln-Douglas Session 2 \(\text{July 15th to July 30th}\) \$999
- Lincoln-Douglas Supersession \(\text{June 28th to July 30th}\) \$2099

**Coaches Program**
- Coaches Focus \(\text{July 12th to July 17th}\) \$599
Coaches are invited to any of the CX, LD or IE sessions for full Room and Board rate less $200

*Prices include lodging in an air conditioned dormitory, 3 meals per day, and library privileges. Prices also reflect 3% cash/check discount. Not included is a non-refundable application fee of $90 before May 1st and $125 after May 1st. Commuter rates are also available.*

**Your Institute Directors:**
- Dr. Peter Pober, UT, 2002 Educator of the Year, IEF’s and LD
- Dr. Joel Rollins, UT, 2001 National Coach of the Year, CX and LD
- Brian McBride, Northwestern University, CX
- Jairus Grove, Chicago Debate Commission, CX
The University of Texas Forensics Union invites you to UTNIF 2003.

Join us for our 10th Anniversary!

Low Teacher-to-Student Ratios
Fantastic Libraries
Internet Access
Air-Conditioned Dorms
Professional Staff
Documented Success
Affordable Tuition
Extensive Contact with Lab Instructors

The University of Texas has won the Overall AFA National Debate Tournament/National Individual Events Tournament Championship for 10 years in row!

DEBATING AGENT SPECIFICATION

It has become common for teams on the negative to object to affirmative plans because they either over- or under-specify the agent of action. Variously referred to as “A-spec” (for agent specification), “O-spec” (for over-specification), or “I-spec” (for implementation specification), the negative claim is that by specifying the agent as the plan does, they distort policy comparison in some important way and should lose. In my experience, the most popular version of the agent argument objects to plans specifying action through some particular federal agency. Thus, plans on the mental health topic specifying that action will be initiated and implemented through the Federal Bureau of Prisons or the Food and Drug Administration are criticized as overly particularizing how implementing action will happen. Or, to the contrary, negatives might argue that by failing to detail the grounds of judicial action (in other words, does the plan imagine action justified under the rubric of “equal protection” or “due process”?), the plan is insufficiently precise and should be rejected.

There is nothing especially brilliant or tactically tricky about the genre of A-spec positions. In fact, the claims back and forth are easy enough to flesh out. It survives because the position is unturnable except at the level of asserted counter-punishment claims, and as such
can be defended as a no-lose procedural objection like topicality. The position takes ten or fifteen seconds to initiate in the first negative constructive, and so the time tradeoff implications favor the INC. It seems reasonable enough as a theoretical objection to the plan, in many cases more reasonable than the older objections deriving from unnecessary vagueness in the plan text. And because most judges would object to having the plan modified mid-debate, the voting issue implications are fairly easy to articulate as well.

The most frustrating aspect of specification-centered debate is how often basic supporting claims rest on simple value judgments that do not lend themselves to evidenced or warranted support. Is debate better if it concentrates students on very detailed comparisons among potential implementing agencies, or better if it remains at a higher level of abstraction (“the federal government”)? Are the merits of plan specificity outweighed by the burdensome requirement that negative teams be required to research each and every outfit in the federal government? There are no better or convincing answers to these questions than to the old-school question of whether debate is benefited more by breadth or depth in interpreting the resolution. That is, one can only, finally, respond by expressing one’s own preference, in the same way one asserts a proclivity for Big Macs over Whoppers. Despite the frequent appearance of very detailed substructured argument, then, the result is often debates where a judge simply votes one way or the other based either on a visceral reaction or a technically mishandled claim.

In what follows, I review some of the major questions arising from debate over agent specification. As with other procedural objections, affirmatives have carefully flowed the logical claims and who efficiently respond in the 2AC should never lose on specification, probably even to teams who make it their stock in trade. Still, because some have made specification objections a favorite argument, and because there is no easy way to preempt all versions of it in the plan (provide detail and you’ve over-specified; omit detail and you’ve under-specified) it’s worth reviewing the issues it raises both ways.

**Are debates better served when the plan is very specific?**

Defenders of agent specification claim that permitting detailed designation of the part of the government which will implement the plan makes for better comparison. When the affirmative specifies the Bureau of Prisons as their implementing agent, debate is instantly made more concrete and focused on the benefits and consequences of certain action. And of course there is often a rich literature assessing the relative merits of this agency over that when it comes to mental health or oceans policy. Such literatures range from discussion of the respective costs of regulatory action as opposed to judicial enforcement to very detailed discussions about the problems likely to arise when one agency or another undertakes enforcement actions in the area of the plan mandates. Whole academic disciplines concentrate their energies on the mechanics of regulatory process, and so no one should be surprised to find treasure troves of evidence defending the courts or regulatory agencies or various taxation mechanisms as best equipped to accomplish certain legislated outcomes.

No one disagrees that a lot of evidence addresses the merits of these alternatives. The disagreement centers on whether this evidence is directly enough related to the resolutionary context to justify focus on the procedural issues raised. Is the constitution of Bureau of Prisons enforcement procedures an essential aspect of mental health policy when it comes to treating federal prisoners, or are such questions a total diversion from rightful attention on the nature of the provided public health services? A decent case can be made either way: an agent specifying affirmative can claim that solvency for their approaches can only be meaningfully assessed in the context of particular attention to the implementing agency, while the negative will reply that they cannot fairly be held accountable for each of the hundred potential actors. There is often a high quality literature that connects topic proposals with this agent or that; on the other hand, too high a degree of agent specificity can allow an affirmative to check on-point objections to their proposal when they select agents wholly separated from the central solvency literature.

The bottom line is that the quality of debate relating to implementing agency is probably a function of the solvency literature, and the closeness of fit between the solvency literature and resolutionary language.

**Is it right to think of plans as broadly self-executing?**

One of the most popular affirmative responses to agent specification objections is that normally implementing policies entails the involvement of the entire federal government, even if such involvement is not specified in the plan. In other words, even if the plan only names the Food and Drug Administration, enforcement would necessarily involve the courts, and other parts of the executive and judicial branches will play a role in funding and enforcement of plan mandates. If this understanding of ambiguously written plans is accepted, the affirmative gets the best of both worlds: they can plausibly claim to be defending the entire federal apparatus (which gets them off the theoretical hook) while preserving enough ambiguity to permute or capture counterplans that differently specify health service provision. Thus, if a counterplan has the courts order the plan’s actions be dictated by judicial order, the affirmative can capitalize on their FDA-only plan to defend a non-severance permutation, which does both.

This affirmative approach is not altogether unreasonable when one considers a popular argument used to defend counterplans relying solely on judicial or executive action. Advocates of the court counterplan regularly respond to disadvantages run in the 2AC by pointing out that the same

*For a fee in addition to tuition, student participants may register for course 36:002 Workshop in Debate and Forensics. All registration requests must be made through the offices of the National Summer Institute in Forensics and be indicated on your application form. All fees must be paid in full prior to registration for this section. Last year this program cost $850. Although tuition has not been set at this time, we don’t anticipate a significant increase. Iowa’s tuition is the lowest in the Big 10. These may be the least expensive credit hours you ever purchase.

www.iowadebate.com
disadvantages also apply to the plan, which would invariably end up in the courts as well. If the plan uses the Bureau of Prisons and the counterplan a court order, in other words, it is difficult for the affirmative to object to the court counterplan (with, say, a judicial activism disadvantage), since affirmative flat presumably would obligate the court to act in just as activist a manner to uphold the plan.

Another way to consider this question centers on the role of the resolution. Is the agent language in the resolution an umbrella term allowing specification in the plan? Or does the resolution dictate particular agent language? Favoring the former view is the fact that resolutional language is usually considered a broad framework out of which the plan can provide stipulation. For example, the resolutional requirement for “public health services” is not normally understood as coercing the affirmative to provide or defend all possible public health services – the plan can pick and choose in accordance with the requirements of solvency evidence. Favoring the latter is a view popular with some that agent language should be treated differently than other resolutional requirements. Some argue that the placement of agent language prior to the verb and object phrases in the topic sentence dictates a holistic defense by the affirmative, although this view seems difficult to grammatically sustain. Others claim that the term “federal government” should be treated as a kind of collective noun.

Either way, negatives will respond that specification cannot be implied in the plan, precisely because it enables this slipperiness in advocacy. The absence of detailed plan language, even if the affirmative is willing to defend the implicit involvement of other federal government actors, arguably permits teams too much latitude in sidestepping what are often reasonable issues of enforcement and implementation.

Is there a problem of infinite regress?

Regardless of the specification position defended by the negative, whether they say the plan is too specific or not specific enough, affirmatives will often reply that the negative demands produce a problem of slippery slope infinite regression. Negatives demanding a high level of specification will never be satisfied, or so the argument goes: they will start by demanding specification of the major implementing agency, but what will prevent the negative from next seeking precise budget figures, the names of oversight board members, details about the retirement packages for implementing officials, and ever-more absurd requests for programmatic detail?

The infinite regress problem works the other way too. Even when the negative argues for plans simply including the term “federal government,” affirmatives will reply that demanding negatives will require no plan at all, since any specification of the mandate ends up detailing the involvement of the federal government. The result is a slippery slope possibility that the plan will either end up taking eight minutes or more to introduce, or reduce to nothing more than a re-articulation of the resolutinal sentence.

The problem with slippery slope claims, of course, is that they are normally and rightly considered fallacious. Slippery slope arguments are usually misconceived because they presume an incapacity on the part of intelligent individuals to make case by case judgments. And so, to take a popular example from public decision making, when someone says the death penalty will invariably lead to state-sponsored murder of all criminal suspects, their criticism is reasonably dismissed – after all, presumably rational people can tell the difference between executing the guilty and executing the accused.

For this reason the infinite regress claim is relatively easy for negative teams to deflect, usually by simple assertion: “our demands for specificity are not unreasonable, and we’re not asking for an eight minute plan – all we expect is…” And such explanations are easy to back up by writing a frontline shell defending a precise demand for specificity.

Should plans that incorrectly specify their agent of action lose the debate?

What is the appropriate impact of specification mistakes? Negatives will argue the affirmative should lose the debate. After all, if agent language in the plan distorts negative strategizing from the very start of the debate – by precluding certain counterplan choices and nullifying disadvantage links – then the only possible penalty is to shut down the affirmative. No other corrective is available: the plan cannot be legitimately amended or otherwise fixed, and there’s no restoring the first negative constructive.

Despite this, many judges will be unsympathetic to a voting issue claim. Is the punishment of round loss really justified by the mere fact of slight over- or under-specification? And presuming some basis for reasonable latitude, compounded in this case by the normal affirmative claim that their specification doesn’t deny the likely involvement of other branches through the operation of normal means, some will be even more reluctant to make specification a voting issue.

Other Issues

Other questions are also a standard part of the specification repertoire. One centers on the issue of inevitable specification. If the plan’s agent is highly detailed, counterplans may be able to compete which refuse such specification or which specify in a different way: they can be easily written as mutually exclusive. And if the plan refuses such specification, then counterplans can be written which offer a higher degree of detail; although such counterplans may not appear to compete, negative teams can resist permutations as either necessarily requiring severance of the general mandate or its alteration.

All this raises an important question: if specification is an inevitable part of debates, one way or the other, then does
Iowa's National Summer Institute brings together some of the most talented and accomplished teachers and coaches of forensics in the nation. Their students include dozens of national champions from coast-to-coast. NFL National Council members, Key Coaches of the Barkley Forum, and NFL Diamonds describe many of them. All have extensive experience, and collectively have won every national forensics award in the country.

All staff members are successful LD debaters and coaches. Only debaters or coaches of debaters who have been in late elimination rounds at national tournaments are invited to be on the Iowa staff. Staff members come from Alabama, California, Florida, Iowa, Louisiana, Minnesota, New Jersey, New York, North Carolina, Oklahoma, and Texas. They bring different perspectives to the Institute and offer students a diverse experience.

Iowa is an intensive learning environment that is fun and productive for students but also well supervised and safe. We attend to the little details because we understand that students and teachers are more likely to reach their potential when they feel comfortable and know exactly what to expect. We also understand that parents have serious concerns about safety and supervision.

Iowa delivers full value. We are not-for-profit and were among the first major institutes to cancel charges for copying collaboratively produced research materials. There are no lab fees, no hidden costs. We produce results. Most of the best debaters competing today got started at Iowa and return each summer of their high school career. Our Lincoln-Douglas participants dominate round robins and national tournaments.

PATRICIA BAILEY
MARILEE DUKE, Co-directors, Lincoln-Douglas Debate

Ms. Bailey and Ms. Duke are recognized for excellence in and out of the classroom. At Iowa, they have built what many regard as the "only summer program" for Lincoln-Douglas debaters. Their standards, expectations and performance are nothing short of remarkable, and they demand and get the best from their very able staff. Their curriculum is organized, thorough and challenging to the very best students. They have found the right mix of theory and practice, and year after year, students come back for more.

IOWA LD OFFERS THREE DIVISIONS

The General Institute: Students who have never attended an institute will work in divisions based on their experience. Divisions and lectures will address philosophy, case writing, and skills that are fundamental to students who are attending their first workshop.

The Returnees: Students who have attended an institute in the past may opt to participate in the Returnee program. The emphasis in lectures and divisional meetings will be primarily on advanced skills and the more obscure yet valuable philosophies.

The Senior Philosophers: Students must be entering their senior year and have attended an Iowa LD institute in the past. The senior philosophers program is designed for students who have a firm grasp of theory and wish to explore approaches to the application of philosophy to debate. The program offers a unique institute experience.
IOWA'S LINCOLN-DOUGLAS FACULTY

CHAMPIONS TRAINING CHAMPIONS!

MICHAEL ARKON, Director of Forensics, New Orleans Jesuit: coached numerous debaters to the late elimination rounds of every major national tournament, including the NFL National Tournament and the TOC.

PATRICIA BAILEY, special consultant for LD Debate, Homewood High School; former Head Debate Coach, Homewood High School; B.A., Huntington College; M.A., Montevallo (Ala.); NFL Diamond Coach, Key Coach of the Barkley Forum; coached NFL LD champion, numerous national qualifiers, LD state champion for seven years running, Alabama Speech Teacher of the Year Award; National Topical Selection Committee for LD debate; Stanford and Iowa Lincoln-Douglas debate institutes; NFL Hall of Fame; NFLA Outstanding Speech, Drama, Debate Educator Award; co-founder of Iowa's Lincoln-Douglas Summer Debate Institute.

SHIKHA BHATTACHARJEE, Sophomore, Yale University; debater for Iowa City West High School; Shikha had more qualifying legs for the 2002 TOC than any other LD; former Iowa summer institute participant.

PAM CADY-WYCOFF, Director of Forensics, Apple Valley High School; B.S., Southwest State University; M.A., Mankato State University; NFL Diamond coach; TOC advisory board; coached numerous LD and IE national champions. Member NFL LD Topical Selection Committee. Ms. Cady-Wycoff has been invited to be a guest lecturer.

CLAIRE CARMAN-REDDIG, Debate Coach, Heritage Hall High School; B.A., Rice University; first place, Bronx Round Robin; St. Mark's national champion; former Director of Stanford University Lincoln-Douglas Summer Debate Institute.

MICHELLE CONDOY, Director of Forensics, St. James School; B.S., Spring Hill College; NFL Diamond coach; TOC advisory board; coached numerous national qualifiers, Key Coach of the Barkley Forum.

CHARLES DAHAN, Sophomore, UC San Diego: founded debate program at Los Altos High School; quarterfinalist at Emory; semifinalist at UC Berkeley; 2nd place at U Colorado Tournament and the 2012 Stanford Round Robin; Winner of the Hopkins Round Robin.

MARILEE DUKES, Director of Forensics, Vestavia Hills High School; B.S., University of Southern Mississippi; M.S., North Texas State University (Debate Fellow); former high school and college debater; 20-year teaching and coaching veteran; numerous state and national qualifiers; coached NFL and TOC champions; NFL Double-Diamond; Key Coach of the Barkley Forum; co-founder of Iowa's Lincoln-Douglas Summer Debate Institute; Blue and Gold Society.

RELLY DUNN, Graduate of Tulsa High School; Champion debater; participated in late elimination rounds of every major high school tournament; 3 years at the Iowa Institute.

SETH HALVORSON, B.A., Macalaster College; M.A., Stanford University; Ph. D. Candidate, Columbia University; former championshipdebater for Apple Valley High School; a veteran lab leader at the Iowa Institute.

MAC HAWKINS, Graduate, Loyola University, New Orleans; NFL National Champion; TOC qualifier; participant in late elimination rounds of every national tournament; assistant coach, Boston Newman School; coached students to late elimination rounds of every major tournament and state champion.

REN JOHANSEN, Sophomore, Grinnell College; former championship debater for Muscatine High School; 3 year participant at the Iowa Institute; late elimination debates at every major national tournament; champion foreign extemper; member of the inaugural class of The Senior Philosophers Program.

NADIR JOSHUA, B.A., Rutgers University, with honors; former debater Science High School, Newark, NJ; 2nd Stanford Round Robin; semi-finalist Harvard; semi-finalist TOC; participant in late elimination rounds of every national tournament; two time NFL National qualifier.

KANDI KING, Director of Debate, Winston Churchill High School; B.A., Incarnate Word College; former Texas Speech Teacher of the Year; State Officer of Texas Forensics Association for past 14 years and past President; charter member of the Iowa Summer Debate Institute; member of the National Forensic League Executive Council.
WILLIE WARREN, Debate coach at Homewood High School, former champion debater at Vestavia Hills High School; 2-time national qualifier; late elimination rounds at major high school tournaments; former debater for Samford University.

CYNDY WOODHOUSE, B.A., University of Iowa; Director of Forensics, Vesta Hills High School; former coach; Iowa City West High School; coached NFL and CFL qualifiers; former debater, Bettendorf High School; frequent participant in late elimination rounds at national tournaments.

JOHN WOOLLIN, Director of Forensics, Enloe High School; A.B., Wesleyan College; M.Ed. in Social Studies, UNC at Greensboro; Ed.D. in International Studies; certificates in Curriculum and Instruction and Social Sciences Education; NFL Double Diamond; Key Coach of the Berkley Forum; 100 students to NFL Nationals; Berkley Forum champion; state champion in extemp, oratory, H1/D1, LD; semi-finalist at NFL Nationals.

DANIEL YAVERBAUM, B.A., philosophy and physics, magna cum laude, Amherst; coached National Champions at Indiana Newman; former successful high school debater; runner of marathons.

IOWA HAS A LAB THAT IS RIGHT FOR YOU!

New Iowa provides several lecture alternatives that expose students to Lincoln-Douglas philosophies from numerous perspectives. Some lectures are designed for the entire institute, but most address the specific experience level of the individual student: theory and philosophy lectures which are more general for debaters with less experience, more advanced philosophy and strategy lectures for debaters with more experience. Students who have not attended workshops in the past may have lectures on rights and general theories of morality and justice in addition to the lectures on the commonly used philosophers like Mill, Locke, Rawls, etc. Debaters with institute experience (both at Iowa and at other workshops) are more likely to hear lectures on advance theory and on alternative philosophies, like existentialists or Foucault.

MAKE THIS SUMMER AN IOWA SUMMER.

TRAIN TO BE A CHAMPION!
it matter who does the specifying? Affirmatives will claim that they should enjoy the right of specification, since such a right is more consistent with their higher burden of proof and need to comport with the advocacy of their solvency authors. Negatives will argue that because they cannot anticipate every potential specification possibility, it is only fair that they have the specification power. Again the argument requires a subjective expression of preference by the judge. But the inevitability of specification does potentially take other issues off the table. For example, arguments about whether debate is better served with attention to detailed agent advocacy or not are nullified if specification will happen either way.

A related issue concerns the nature of the topic literature: does it matter if the affirmative has topic literature supporting their specification? Obviously any expert will envision some degree of specification when she or he advocates action. If that is so, then permitting affirmatives to specify in a way which matches their authors may be a context issue. That is, if the affirmative is denied the ability to specify in accordance with their authors, then they may be significantly distorting their solvency claims.

Though it sounds persuasive, this argument is nonetheless problematic. Negatives will be quick to point out that there is always a disconnect between solvency advocacy and the requirements of the resolution. Solvency sources never write with detailed knowledge of the resolution to be debated by high school students, and affirmatives are not usually afforded the right to stretch or modify the resolution to make their solvency advocate fit.

A final question concerns the role of cross-examination: is the opportunity for negatives to cross-examine the IAC a sufficient corrective for specification distortions? Affirmatives will obviously say yes: “We don’t have time to read infinitely long plans. They have a cross-examination where they can ask us about any of their concerns before they have to commit to a TNC strategy. So what’s the big deal?” Of course negatives have a ready reply: “Cross examination is no corrective. Clever IAC’s are skilled at perpetuating artful ambiguity. And what they call reasonable cross-examination latitude is nothing more than advocacy shifting.” Regardless of your own preference in this back and forth, the arguments relating to cross-examination are rarely persuasive for the affirmative.

Conclusions

The fact that agent specification typically implies no brilliant or special tricks should not diminish the importance of carefully responding to the position. Specification arguments are most often won by negatives when their opponents are technically sloppy in responding. Agent specification briefs should efficiently forward a series of responses: efficiency is important since the 2AC doesn’t want to over-allocate time to a position quickly defended in the first negative, but a balance has to be maintained so enough pressure is created that a debater in the negative black will have to invest real time in winning it.

Because specification objections can be offered regardless of what you do in the plan, I recommend that you write your plan in a manner most consistent with the solvency evidence. If the solvency evidence takes you in the direction of high specification, then simply write theory briefs defending against the theory argument; hopefully your defenses will involve a major defense of your author’s recommendations.

(Dr. David M. Choshier is Assistant Professor of Communications and Director of Debate at Georgia State University. His column appears monthly in the Roxsan.)

The National Summer Institute in Forensics and the University of Iowa invite you to visit our web site. All information and application material is available in pdf format. Credit card payments accepted exclusively on our web site. No credit card payments accepted by mail.

Beginning March 3rd, you may register on our secure website at:

www.iowadebate.com
Iowa LD is 12 years old and 18 former Iowa participants have appeared in the Final LD Round of the NFL National Tournament!

Update on Iowa participants at 2002 tournaments:

- Wakeforest University Earlybird
  All four semi-finalists were Iowa participants

- Grapevine Classic
  All four semi-finalists were Iowa participants

- Mid-America Cup
  Four of the eight quarter-finalists were Iowa participants

- Bronx High School of Science
  Seven of the octo-finalists were Iowa participants

- The Greenhill Fall Classic
  Six of the octo-finalists were Iowa participants

- Manchester Debate Tournament
  Two semi-finalists were Iowa participants

- St Marks School of Texas
  Six of the octo-finalists and both finalists were Iowa participants

- Apple Valley Debate Tournament
  Three of the quarter-finalists were Iowa participants

- The Glenbrooks
  Nine of the octo-finalists were Iowa participants

- The Ohio Valley Invitational
  Three of the semi-finalists were Iowa participants

- UT Austin's Longhorn Classic
  Both finalists were Iowa participants
THE UNIVERSITY OF MICHIGAN
SUMMER 2003
M DEBATE CAMPS

THE MICHIGAN NATIONAL DEBATE INSTITUTE

STAFF The following have already committed to MNDI 2003:

Tim Alderete, Director, East Grand Rapids High School
Kenda Cunningham, University of North Texas
Dan Davis, Coach, State University of West Georgia
Jason Peterson, Coach, University of Southern California and Damien High School
Greg Achten, Director, Pepperdine University
Rachel Saloom, Former Coach and Debater, State University of West Georgia
Aaron Kall, Assistant Director, University of Michigan and Former Coach, University of Kentucky

FEES The cost is $1,550. This fee covers the full cost of tuition, housing in the Residence Hall, the dining room plan, lab copying fees, and several social events.

THE MICHIGAN CLASSIC
JULY 13 - AUGUST 9, 2003

STAFF

Classic for Sophomores:
LAB ONE:
Tim Alderete, Director of debate at East Grand Rapids High School
Jason Peterson, Coach at University of Southern California and Damien High School

LAB TWO:
Russ Hubbard, NDT finalist 2002 and Coach at the University of Kentucky
Aaron Kall, Assistant Director at the University of Michigan and former coach of NDT finalist at the University of Kentucky

Classic for Juniors:
LAB ONE:
Kenda Cunningham, former first speaker at the Dartmouth Round Robin and quarter-finalist at the NDT
Daniel Davis, NDT finalist for the University of Georgia, coach of 2002 NDT semi-finalists

LAB TWO:
Kirk Evans, Semi-finalist at the NDT for the University of Texas
Jonah Feldman, University of Michigan, highest ballot count at the 2002 NDT Prelims, third speaker at Harvard 2002, participant at the 2002 Kentucky Round Robin

Classic for Seniors:
LAB ONE:
Rachel Saloom, former CEDA national champion for the State University of West Georgia
Tara Tate, Coach Colleyville Heritage High School, recipient 2002 Acolyte Award as the best argument coach in the country from St. Marks school of Texas

LAB TWO:
Caulin Matheson, Michigan State University, former semi-finalist at the NDT, former finalist at the CEDA nationals
Scott Harris, Director of debate, University of Kansas, coached teams to elimination rounds at the NDT every year of his tenure at the University of Kansas

FEES The cost is $1,200. This fee covers the full cost of tuition, a room in the residence hall, the dining room plan, lab copying fees, and several social events.

SEVEN-WEEK LABS AT MICHIGAN
JUNE 23 - AUGUST 10, 2003

STAFF

Scott Phillips, Emory University, one of the most successful high school debaters ever. A finalist at Georgia State University and Harvard University 2002 and participant in the 2002 University of Kentucky Round Robin.
Josh Hoe, Director of Debate, the University of Michigan. Former CEDA national champion and two-time first speaker at the Heart of America. Coached teams in out-rounds of the NDT for the past five years, and coached multiple first-round "at large" bid teams to the NDT.

David Heidt, Coach Emory University, Former NDT champion and coach of NDT champions. Widely regarded as one of the best debate minds in all of America. Coached an average of two NDT first-round "at-large" bids to the NDT for the past five years.
Sun Young Choi, Coach, Harvard University and Lexington High School. Very successful debater and coach for Harvard University.

Thad Blank, a top five first-round "at-large" recipient last year and is well on his way to another top five showing for Whitman College in 2003. Thad is a great teacher and is one of the best debaters in the country.

FEES The cost is $4,600. This fee covers the full cost of tuition, a room in the residence hall, the dining room plan, lab copying fees, and several social events.

THE UNIVERSITY OF MICHIGAN DEBATE TEAM • (734) 761-3541 OFFICE • (734) 761-3671 FAX • jbhoe@umich.edu

CONGRATULATIONS TO:

Thad Blank,
Whitman College, for winning the Dartmouth Round Robin!

Scotty Phillips and coaches David Heidt and Eun Young Choi
for their second place finish at Dartmouth!

And, congratulations to Jonah Feldman and John Oden and coach Aaron Kall
for their invitation and participation at Dartmouth.

DIRECTOR OF FORENSICS

Expertise and experience required for a nationally recognized debate and speech program. The team travels both regionally and nationally and enjoys a strong tradition of excellence, of administrative support, and of community support. Four assistant coaches work cooperatively with the director in providing a comprehensive program. (Teacher certification is required.)

Valley High School, West Des Moines, Iowa, is a public high school of approximately 2,000 students in grades 10-12. The city of West Des Moines is a beautiful, rapidly growing suburb of the Des Moines metro area.

Teaching assignment to be determined. Competitive salary plus a comprehensive fringe benefit package including $500/yr tuition remission. The Head Debate Coach compensation is approximately $5100 plus an additional stipend for speech activities.

Send a letter of interest, transcripts, resume and credentials (or three letters of reference) to:

Human Resources
West Des Moines School District
3550 Mills Civic Parkway
West Des Moines, IA 50265

AA/EOE Employer
2003 Forensics Institutes

National Policy Institute: June 22 thru July 12
Lincoln Douglas Debate Workshop: June 22 thru July 5
Individual Speech Events Workshop: June 22 thru June 28

Excellence in debate has been a tradition at Bates since 1896, when the college christened its program by besting Boston University in the finals of the first New England Debating League Championship. Competitive excellence remains the hallmark of the Bates debate program. In addition to its active participation in debate tournaments throughout the U.S. and Canada, Bates conducts an annual debating exchange with Japanese universities and makes frequent international tours.

The Bates Policy Debate Institute was founded in 1974 by the late Professor Robert Branham. The Lincoln Douglas Workshop was added in the 1980s, and 1997 marked the addition of a one-week program in individual speech events.

The student-faculty ratio is carefully limited to 6:1. The program features daily supervised library and internet research, numerous critiqued practice rounds, and a full program of recreational and social activities.

Bates ensures that all instructional groups are led by professional forensics coaches with years of teaching and coaching experience, assisted by outstanding college debaters. All lab groups are led by senior staff, and each student works with each faculty member. The 2003 teaching faculty includes: R. Eric Barnes (author of Philosophy in Practice: Understanding Value Debate), Lynne Coyne, Shunta Jordan, Sheryl Kaczmarek, Mike Kelley, Mike Matos, Mindy Newman, Les Phillips, Jon Sharp, and Chris Wheatley.

Students live in double rooms in one of the college’s modern dormitories, supervised by Richard Bracknell, parent, grandparent, teacher and forensics coach at Carrolton (GA) High School, and full-time director of residential life for the Bates Institute since 1993. The pastoral 109-acre campus located in Lewiston, Maine, is about 140 miles northeast of Boston and within half an hour’s drive to the coast.

Comprehensive fees include tuition, handbook and copies of the institute briefs (policy debaters), videotaped critiques (speech participants), room and board. All meals, including a lobster bake, are included in the comprehensive fee. LDers receive copies of the Bates LD Reader and Eric Barnes’ book, Philosophy in Practice: Understanding Value Debate. No hidden costs. Policy Debate Institute, $1,325; Lincoln Douglas Debate Workshop, $975; Individual Speech Events Workshop, $575. Need-based financial aid and payment plans available to qualified applicants. This year, applications will be processed on a first-come, first-served basis – apply early for best chance of admission.

Come to Maine! Study with the best at Bates!
(Harens continued from page 55)

5. How many handbook companies are we going to support?

We have allowed the companies to run what we do and how we do it. How many handbooks do your team have? If we really debated the topic, how many would you really need?

6. Will we let college judges/debate camps select what will happen in our activity?

These college students come in and tell the debaters this is how it is done. The HS students come back and tell the others and we get what we have now. I used to take half of the season to teach what some of my best debaters had been taught in camp. Not all are that bad, but most are.

7. Will we, as coaches/judges, take the stand and stop what is destroying policy debate?

So, now the question is what do we do? It’s simple: we do a switch in paradigms. We become interventionist if we have to. As one popular commercial has put it, “Just say NO!” Say no to the speed, spread, weird arguments, everything else, the exchange of the first AC, we stop the things that are destroying policy debate. It is also called judge adaptation.

Let’s return debate back to what it should be, the clash of opinion that calls for the attempt to convince. No matter what anyone says, it is a communication activity. It always has been and always will be a communication activity. It is not just issues and evidence. It is what you say, how you say it, and how you explain it.

Policy debate is worthwhile or some of us have wasted most of our adult lives teaching, coaching, and judging this activity. I don’t want to see it die because it has a place in education as long as it can educate. Right now, there’s not much education.

I have left out one other important factor. It is not definable, you can’t quantify it, but with the kids and some coaches it is there. I call it the fun factor. Two basic rules in all of my years of coaching:

1. Did you learn anything?
2. Did you have fun?

For many of the students it isn’t fun anymore. For coaches, like myself, it isn’t fun anymore. If something isn’t fun or you’re not learning, why do it? This is one big reason why many coaches and students are no longer doing Policy Debate.

So, it is now into the laps of all coaches and judges. Do we save the activity or do we let it die? Your choice, your decision, but it needs to be made now or it will be too late. Don’t try and justify the education of all the speed, spread, critiques, off case, theory, and the list could go on and on. The bottom line, do you want the activity to survive? If so, do something about it. If not, just keep going the way you are going and shortly it will be gone. My vote is to change and save the activity. What’s yours?

Paul Harens, has coached forensics for 29 years. He is a triple diamond coach. Paul has qualified students to the National Tournament several times in various events. He’s a dinosaur.

(Mannebach continued from page 62)

subject to proof. Let us never negotiate out of fear, but let us never fear to negotiate. Let both sides explore what problems unite us instead of belaboring those problems which divide us. Let both sides, for the first time, formulate serious and precise proposals for the inspection and control of arms and bring the absolute power to destroy other nations under the absolute control of all nations. Let both sides seek to invoke the wonders of science instead of the terrors. Together let us explore the stars, conquer the deserts, eradicate disease, tap the ocean depths, and encourage the arts and commerce. Let both sides unite in the common goal of the earth the command of Isaiah to “undo the heavy burdens and let the oppressed go free.” And if a breach should occur in cooperation may push back the jungle of suspicion, let both sides join in creating a new endeavor, not a new balance of power but a new world of law, where the strong are just and the weak secure and the peace preserved.

Unfortunately, not all communication is like the above. For instance, a university student declared, “Henry rushed out of this mechanical and monotonous society to get rid of restraints, and he dared challenging sea life.” The statement is confusing because of the mixed verb forms. The student would have been clearer by saying, “To rush out of this mechanical and monotonous society and rid himself of restraints, Henry dared to challenge sea life.”

A university student reported to the fraternity he was hoping to pledge: “I enjoy hunting moose, hiking in forests and rock concerts. I also like to play the piano and be at tournament chess.” For better parallelism and clarity, he could have said, “I like hunting moose, hiking in forests, attending rock concerts, playing the piano, and playing or observing tournament chess.”

An audience distracted by uncoordinated relations can fail to comprehend what immediately follows the structural errors, because it is too engaged in trying to extract the sense of the errors. The portion not understood could be the thesis, or key idea, of the address. When an audience fails to comprehend message, oratory fails.

CONCLUSION

Only by striving for clear imagery and proper reference, subordination, and parallelism can orators hope to be persuasive. If forensic coaches seem a bit relentless in their criticism, orators should meditate on Shakespeare’s line in The Merry Wives of Windsor (V.iiii), namely, “Better a little clashing [during practice] than a great deal of heartbreak [from poor performance at a forensic tournament].”

(Dr. Wayne Mannebach directed debate and forensics at Ripon College for nine years, and for the past twenty-five years he has taught English at St. Mary Central High School in Neenah, WI.)
Heart of America
SUMMER DEBATE INSTITUTES
Kansas State University at Salina

Institutes for high school debaters taught by high school coaches. Squad leaders will be former outstanding high school and college debaters. Institute evidence will be available electronically to all registered students. We use www.debateaddict.com and its database software will be available to all institute members. Scanners are also available.

POLICY DEBATE INSTITUTE
Low student-to-instructor ratio. The right blend of high school & college.

Rookiecat Workshop
Lab Leader - Tom Grice
Assist. Coach, Topeka High School
July 6-9, 2003
Fees:
$395 without meals & room
$450 with meals & room

Wildcat Institute
Lab Leader - Steve Wood
Coach, Lawrence High & Free State High Schools
July 6-19, 2003
Fees:
$500 without meals & room
$800 with meals & room

Wildcat Workshop
Lab Leader - Ken Troyer/Mark Kapfer
Coaches, Lyons H.S./Blue Valley West H.S.
July 6-12, 2003
Fees:
$375 without meals & room
$550 with meals & room

Powercat Institute
Lab Leader - Ken Troyer
Coach, Lyons High School
July 6-26, 2003
Fees:
$900 without meals & room
$1950 with meals & room

City ST ZIP
Midwest Debate Institute

Rockhurst College, Kansas City MO

Beginning and advanced seminars help students develop research, listening and speaking skills that will be of lifelong benefit. Emphasis is placed on original research. All briefs will be developed by students from original research created during the institute.

Midwest students have consistently been successful in regional and national competition: 1st in Congress, 1st in Original Oratory, 2nd in CX Debate and 9th in CX Debate.

Students will return to their schools with a broad subject-matter background on the topic as well as improved understanding of the skills and techniques necessary for successful high school debating.

July 14 - 25, 2003

Tuition: $450
Housing/Meals: $350
NO HIDDEN COSTS!

Deadline: June 20, 2002
Staffed exclusively by high school debate coaches.

Open to Coaches!
Scholarships available!

IDEA PRESS / NEW BOOKS AND BACKLIST

IDEA Press Books can be purchased from on-line bookstores such as Amazon (www.amazon.com) and Barnes & Noble (www.bn.com). For institutional and bulk orders or queries about IDEA Press books, please contact Martin Greenwald (greenwald@saronyr.org).

William Ertz and Joseph Zinnelli
The book provides a practical introduction to the Karl Popper Debate format. It discusses the importance and nature of educational debate in an open society and presents rules and guidelines for preparing and running a debate events, training judges and involving the community. The revised edition contains a transcript of a full debate on International Efforts to Eliminate Human Trafficking with step-by-step critiques, as well as new and expanded sections on logic and debating in an "unscripted" setting, and on choosing and selecting topics. The work also includes 50 exercises to be used in the classroom or debate club. (1b)
Price $29.95 / ISBN 0-9702130-9-3

The Democracy Reader: Sontra Wiers (Editor)
Forward by Benjamin Barber
A comprehensive tool for understanding democracy and the central role that citizens play in making democracy work. The first section contains texts by distinguished scholars and distinguished questions on the basic elements of democracy; the second, using the same format, deals with the obstacles encountered on the way to democracy and strategies for addressing them. The third is an album of civic stories, accounts of civic epiphanies and transformations from around the world. (1b)
Price $25.95 / ISBN 0-9702130-3-4

Using Sides: Debate Across the Curriculum
Alfred C. Snider and Maxorel Schurter
A comprehensive guide for using debate in an educational classroom setting, including plans to integrate debate into the curriculum, designing proper questions, developing topics for debate, preparing students for debating, and selecting the debates, audience involvement and evaluation of classroom debates. (1b)
Price $24.95 / ISBN 0-9702130-4-2

Art, Argument and Advocacy: Mastering Parliamentary Debate
John Meany and Kate Shuster
Provides a theoretical and practical foundation for effective participation in academic parliamentary debate competition. It explores contemporary American and international parliamentary debate formats, offering a comprehensive examination of argumentation, construction and extension, case development, critical evaluation of government responses and persuasive speaking. (1b)
Price $24.95 / ISBN 0-9702130-7-7

On That Point! An Introduction to Parliamentary Debate
John Meany and Kate Shuster
This is the first parliamentary debate textbook for secondary school students. The text is designed to provide a theoretical and practical foundation for effective participation in parliamentary debate in competition or in the classroom. (1b)
Price $25.95 / ISBN 0-97029541-1-1

The Debatabase Book: A Must-Have Guide for Successful Debate
By the Editors of DEBATBASE
An invaluable resource for debaters, this book provides background arguments and resources on approximately 150 debate topics in areas as diverse as business, science and technology, the environment, politics, religion, culture and education. Each entry presents a resolution and an introduction to the question in context; arguments pro and con, sample motions and web links and other resources for further research. Organized in a handy A-Z format, the book also includes a topical index for easy searching. (1b)

Transforming Debate: The Best of the International Journal of Parliamentary Debate
Jack D. Rogers (Editor)
Represents the very best scholarly work published by the International Journal of Parliamentary Debate. It is an essential work for anyone interested in the art of academic, competitive debate in shaping the international movement. (1b)
Price $24.95 / ISBN 0-9702130-1-0

Perspectives in Controversy: Selected Essays from Contemporary Argumentation
Kenneth Broda Cahn (Editor)
Brings together recently published essays from the Journal of Contemporary Argumentation and Debate into a single volume. These essays explore current controversies in the theory of competitive academic debate. (1b)
Price $24.95 / ISBN 0-9702130-5-0

SOURCEBOOK ON CONTEMPORARY CONTROVERSY SERIES

AIDS, Drugs and Society
Ann Alexander (Editor)
Brings together articles that address the interconnected epidemics of HIV/AIDS and drug abuse. Background readings in the introductory section show how these epidemics are connected. The substantive part of the book offers different sides of two key debates in the field. First, there are debates about policy aspects of the "war on drugs." Second, there are debates about the human rights aspects of viewing HIV/AIDS as a human rights issue. The editor places particular importance on harm reduction as a policy option to address the societal consequences of drug use without total prohibition of drugs. The book ends with source documents that offer examples of harm reduction initiatives, human rights treaties, guidelines and a glossary of key terms. (1b)
Price $24.95 / ISBN 0-9702130-2-6

Globalization and the Poor: Exploitation or Equalizer?
Julie Cahn (Editor)
Brings together articles that address both sides of the debate: does the global economy benefit or harm the poor? The first section argues that the global economic system is designed to exploit the poor; the second section refutes the first, arguing that globalization has the potential to empower and enrich the poor. The third section examines the role government and international organizations play in globalization efforts on the part of the poor. The final quarter of the book is a case study of the East Asian Crisis: how international organizations and governments responded to the crisis and how their policies affected the poor. The book concludes with original source documents and a glossary of key terms. (1b)

Roma Rights: Race, Justice and Strategies for Equality
Julie Cahn (Editor)
Brings together diverse materials related to combating anti-Romani racism. Early sections of the book present facts on the human rights situation of Roma in Europe. Subsequent chapters present arguments surrounding the strategies and approaches used by anti-racism activist in areas including the problem of hate speech, the promotion of minority participation in a democratic society; and methods of combating discrimination in the criminal justice system. (1b)
Price $24.95 / ISBN 0-9702130-6-9
IDEA YOUTH FORUM / Slovenia 2003
July 21 - August 1, 2003/Ljubljana, Slovenia

IDEA, in partnership with Za In Proti (ZIP), will host its 9th Annual International Debate Youth Forum. The Debate Youth Forum brings together secondary school students, university students and teachers from all over the world to discuss, learn, debate and meet one another.

The Forum features two debate tournaments: the national team tournament and the international mixed team tournament both using the Karl Popper Debate Format. The resolution for the national tournament will be "the nations of the world should strengthen the International Criminal Court" and the resolution for the mixed tournament will be "the separation of public and private is detrimental to women's rights".

The educational track for secondary school students rests upon three elements: content sessions on the topics, general sessions on debate and "lab" sessions centered on the preparation for debates.

All participants will stay in the Dijaski dom Ivana Cankakarja student dorms which have excellent conference facilities, comfortable rooms, an olympic size swimming pool, gym and outdoor fields and is a short walking distance to the center of Ljubljina. Additionally, participants will have the chance to explore the beautiful nature of Slovenia on a half day trip to Bled and a full day trip to the Slovenian coast.

The Slovenian staff and volunteers welcome you to one of Europe's smallest and most beautiful capitals. For more information on the Forum and registration please see our website: www.idebate.org. If you have any questions, feel free to contact us at the below addresses.

Participant price: $350 for non-IDEA members
$300 for IDEA members

Price includes: room and board for 11 days, full day and half day trips, banquet and educational materials. You must pay for your own transportation to the site. Each delegation of three students must bring a judge. If you are not able to bring a judge, there will be an additional charge of $100 per student.

International Summer Speech and Debate Institute/Duino, Italy

LOCATION:
The institute will be held at the United World College of the Adriatic campus, which is located on cliffs overlooking the beautiful Adriatic. In addition to the formal sessions, the campus offers opportunities for swimming, hiking and other outdoor activities. Sightseeing excursions to nearby cities such as Venice and Trieste will be offered.

SESSION 1: (June 30 - July 14)
Lincoln-Douglas Debate & Speech
The L-D workshop will be for students wishing to work on 2003-2004 NFL debate topics. The Speech workshop will offer instruction in Humorous and Dramatic Interpretation, Original Oratory, and Extemporaneous Speaking (including in-depth topic analysis). Students can cross-register in speech and debate.

PRICE: $1,400 USD

Institute Director: Eric Di Michele
(212) 288-1100, ext. 101 - Email: edimiche@regis-nyc.org

SESSION 2: (July 15 - 21)
“Bridge Program” to IDEA’s International Youth Forum in Ljubljana, Slovenia
For students interested in attending both the IDEA Speech and Debate Institute and IDEA’s 9th Annual Youth Forum in Ljubljana, Slovenia, a special one week program will be designed. Students will prepare for the Youth Forum debates through research and discussion. Students will also have the opportunity for advance research and discussion on the NFL topics covered at the Lincoln-Douglas camp. Additional sightseeing trips around Northern Italy will also be planned.

Session Director: Nina Watkins, IDEA
(212) 548-0185 - Email: nwatkins@sorosny.org

PRICE for Sessions 1 & 2 - $2,000 USD
Session 2 is not available without Session 1.

These prices include:
• Housing and meals
• Research materials
• a “survival” Italian course
• two excursions per session
• transportation to and from the Trieste airport or train station

Travel to and from Italy is not included. IDEA will be arranging a group travel discount for students departing from and returning to JFK International Airport in New York City.
What Makes Our Institute Unique:

Our camp provides the opportunity for intensive debate and speech preparation with the caring guidance of nationally recognized veteran coaches within an international community of students. Last year’s participants included students from the United States as well as Uzbekistan, Macedonia, Slovenia, Azerbaijan, Estonia, Albania, Croatia, Romania, Slovakia, Lithuania and the Czech Republic.

STAFF:

Eric Di Michele (Institute Director) has been the speech & debate coach at Regis High School in New York City for over twenty years. His teams have won the New York State Forensics Championship eleven times. He has coached NFL national champions in Lincoln-Douglas Debate and Foreign Extemp. (Seven of his students have been national finalists in extemp). He was the co-chair of the NFL Lincoln-Douglas Debate Working Committee for five years. As a consultant with the Open Society Institute, he has taught speech & debate seminars in over fifteen countries—from Haiti to Uzbekistan.

Lydia Esslinger, long-time forensics coach and an NFL 5-diamond coach, at Syosset High School on Long Island (NY), has extensive experience in all areas of speech and debate. She has coached over twenty-five New York state champions, and her students have advanced to semis and finals in every event at CFL nationals. NFL achievements include semifinalists and finalists in every speech event at nationals, a 1st place in Congress and Dramatic Interpretation. Her past seven summers have been spent reaching debate, extemp and interp in eastern and central Europe, as a senior consultant to the Open Society Institute. In her “day job” Mrs. Esslinger teaches AP English, coaches acting, and has directed more than twenty main stage musicals.

Noel Selegzi, (Guest Lecturer) has coached debate at Hunter College High School in New York City for thirteen years. His teams have won numerous tournament championships. In addition, he is the Executive Director of IDEA. A student of social and political philosophy, he specializes in the history of political thought ranging from the Ancient Greek philosophers to contemporary political theory.

Marcin Zaleski obtained his International Baccalaureate at the United World College in Duino, Italy. In 1995 he became the coordinator of the Polish debate program, and also wrote a book about debate. As a consultant for the Open Society Institute, he conducted trainings throughout Central and Eastern Europe. In 1999 Marcin was elected the President of the Board of Directors of the International Debate Education Association (IDEA), and continues to work as a debate trainer, curriculum developer and fundraiser for the debate program.

Additional Staff will be added in the spring and will be posted on our website: www.idebate.org

Award Criteria:

1. Student must be an NFL member with an earned degree of Superior Distinction - 750 points on record in the National Office.

2. Student must have maintained a 3.7 minimum GPA out of 4.0 (or its equivalent).

3. The student may apply during their 6th or 7th semester.

4. Student must have a score of 1400 or higher on the SAT Exam and/or a score of 27 or higher on the ACT Exam.

5. The student should demonstrate qualities of character, leadership and commitment, as verified by both coach and principal.

6. A chapter may present this National Forensic League All-American Academic Award to any NFL member who meets the criteria.

APPLICATION
NATIONAL FORENSIC LEAGUE
ACADEMIC ALL-AMERICAN AWARD

Name ____________________________
School __________________________
School Address ____________________
NFL District ________________________

To the National Forensic League:

The above named student qualifies for the Academic All-American Award by meeting all the criteria checked below:

___ NFL Degree of Superior Distinction on record (750 points)
___ GPA of 3.7 on a 4.0 scale (or its equivalent)
___ ACT score of 27 or higher or SAT score of 1400 or higher
___ 7th Semester student

Appropriate verification of these qualifications, including an official school transcript is included with this application.

We certify that the above information is true and accurate and that the student nominated, in addition to the above criteria, has demonstrated character, leadership and commitment.

NFL Sponsor (coach) ____________________ Principal ____________________ Student ____________________

Send this application and $10 fee to NFL, Box 38, Ripon, WI 54971-0038
A hand engrossed Certificate of Achievement (see opposite page) will be sent for presentation.

* Instructor for The Champion Series   ** Instructor for The Washington Group   *** Instructor for both sessions
There’s no debate about it. Nurturing a young mind is one of the most important things you’ll ever do. Teaching a child to think. To ask questions. To delight in learning. That’s why Lincoln Financial Group is a proud sponsor of the National Forensic League, A&E’s BIOGRAPHY® Project for Schools, and other educational programs for kids. After all, if there’s one thing we’ve learned as a leading financial services company, there are no smarter investments than the ones you make in young people. For more information, call the National Forensic League at 920-746-6205.

Never underestimate the power of a great mind.

“I love to dig up the question by the roots and hold it up and dry it before the fires of the mind.”

—Abraham Lincoln
